- Decommissioned
- Redesigned
- or continued

IVF (In-vitro fertilisation) Fertility Treatment Consultation

Consultation
14 November 2016 - 13 January 2017

What are the financial considerations?

If we do nothing the funding gap in mid-Nottinghamshire between 2013-2021 is calculated at around £200 million.

The immediate saving this financial year is £20 million.

How much does IVF cost?

IVF costs the CCG around £300,000 per year.

An average of £2,800-£3,000 per cycle.

How does Age effect IVF results?

AGE	Year of treatment	2014
	18-34	33.7%
	35-37	29.8%
	38-39	21.9%
	40-42	13.8%
	43-44	4.8%
	45+	1.2%

National data

Live births per treatment cycle started in the year ending 2nd quarter 2014 reported by HFEA 2014 (Human Fertilisation and Embryology Authority)

Age range	Numbers referred	Percentage
18-34	57	71%
35-37	13	16%
38-40	7	9%
41-43	3	4%
Total	80	

Local data

Age of women across mid Notts over a 6 month period

What are the IVF results over the past 2 years?

	14/15	15/16	Percentage
Number receiving IVF	98	106	
Number of pregnancies	23	35	28%
Not pregnant	28	34	31%
Cancelled	8	7	7%
Awaiting results	39	30	34%

What is the current policy?

- We currently fund one cycle of IVF. People sometimes pay privately for additional cycles as required.
- The current policy defines that the fertility assessment and treatment service is restricted to women aged 42 and under at the time of referral into the services. There is currently no age limit for men.

Options

Option	Rationale	Impacts
Reduce the female age from 42 to 40 years old.	The chances of IVF resulting in a live birth diminish with age. This would save an average of £15,000 per year	Women over 40 would not be eligible for IVF
Develop an age limit for men (There is currently no age range in the policy)	(Unable to calculate saving as there is no age limit at present)	There would be an age limit for men
Stop offering IVF on the NHS	There would be an annual saving of approximately £300,000	No new patients would be offered IVF on the NHS
Continue to fund 1 cycle of IVF for a very limited number of exceptional situations	This would involve a strict criteria and would save up to £240,000 A year	Only people with exceptional circumstances, would be eligible for IVF. This would be determined by a panel, with information from clinicians

How to have your say

- Complete the questionnaire in the back of the booklet

Or

- Fill out the survey on either website

www.mansfieldandashfieldccg.nhs.uk

www.newarkandsherwood.nhs.uk

Questions for consideration
