

## Health and Wellbeing Board

**Wednesday, 17 April 2024 at 14:00**

**County Hall, West Bridgford, Nottingham, NG2 7QP**

---

### **AGENDA**

- |   |  |         |
|---|--|---------|
| 1 | Minutes of the Last Meeting 13 March 2024  | 3 - 10  |
| 2 | Apologies for Absence  |         |
| 3 | Declarations of Interests by Members and Officers:- (see note below)             |         |
| 4 | Chair's Report   | 11 - 22 |
| 5 | Approval of refreshed Joint Strategic Needs Assessment (JSNA)<br>Chapter: Carers | 23 - 76 |
| 6 | Nottingham and Nottinghamshire NHS Joint Forward Plan - 2024-25<br>Refresh       | 77 - 82 |
| 7 | Work Programme   | 83 - 90 |

### **Notes**

- (1) Councillors are advised to contact their Research Officer for details of any Group Meetings which are planned for this meeting.
- (2) Members of the public wishing to inspect "Background Papers" referred to in the reports on the agenda or Schedule 12A of the Local Government Act should contact:-

- (3) Persons making a declaration of interest should have regard to the Code of Conduct and the Council's Procedure Rules. Those declaring must indicate the nature of their interest and the reasons for the declaration.

Councillors or Officers requiring clarification on whether to make a declaration of interest are invited to contact James Lavender (Tel. 0115 854 6408) or a colleague in Democratic Services prior to the meeting.

- (4) Councillors are reminded that Committee and Sub-Committee papers, with the exception of those which contain Exempt or Confidential Information, may be recycled.
- (5) This agenda and its associated reports are available to view online via an online calendar - <http://www.nottinghamshire.gov.uk/dms/Meetings.aspx>

Meeting: Nottinghamshire Health and Wellbeing Board

Date: Wednesday 13 March 2024 (commencing at 2:00pm)

**Membership:**

Persons absent are marked with an 'Ap' (apologies given) or 'Ab' (where apologies had not been sent). Substitute members are marked with a 'S.'

**Nottinghamshire County Councillors**

John Doddy (Chair)  
Sinead Anderson  
S Scott Carlton  
Penny Gowland  
Ap Tom Smith  
John Wilmott

**District and Borough Councillors**

Lynne Schuller	- Bassetlaw District Council
Colin Tideswell	- Broxtowe Borough Council
Henry Wheeler	- Gedling Borough Council
Angie Jackson	- Mansfield District Council
Caroline Ellis	- Mansfield District Council (Non-Voting)
Susan Crosby	- Newark and Sherwood District Council
Jonathan Wheeler	- Rushcliffe Borough Council

**Nottinghamshire County Council Officers**

Ap Colin Pettigrew	- Corporate Director – Children and Families
Ap Melanie Williams	Corporate Director – Adult Social Care and Health
Vivienne Robbins	- Acting Director of Public Health

**NHS Partners**

Dr Thilan Bartholomeuz (Vice Chair)	- Mid-Nottinghamshire Place-Based Partnership
Ap Dave Briggs	- Medical Director, NHS Nottingham and Nottinghamshire Integrated Care Board
Ap Fiona Callaghan	- South Nottinghamshire Place-Based Partnership

Dr Janine Elson	- NHS Nottingham and Nottinghamshire Integrated Care Board
Dr Eric Kelly	- Bassetlaw Place-Based Partnership
S Jill Langridge	- South Nottinghamshire Place-Based Partnership
Ap Helen Smith	- South Nottinghamshire Place-Based Partnership

### **Other Partners**

Sarah Collis	- Healthwatch Nottingham and Nottinghamshire
Prof. Daniel King	- Chair, Nottingham and Nottinghamshire Voluntary, Community and Social Enterprise Alliance

### **Substitute Members**

Councillor Scott Carlton (Nottinghamshire County Council)  
Jill Langridge (South Nottinghamshire Place-Based Partnership)

### **Officers and colleagues in attendance:**

Katy Ball	- Service Director, Strategic Commissioning, and Integration
Martin Elliott	- Senior Scrutiny Officer
Carol Ford	- Senior Public Health and Commissioning Manager
Dawn Jenkin	- Consultant in Public Health
Naomi Robinson	- Deputy Head of Joint Commissioning, NHS Nottingham and Nottinghamshire Integrated Care Board
Elizabeth Winter	- Public Health & Commissioning Manager

## **1. MINUTES OF THE LAST MEETING**

The minutes of the last meeting held on 7 February 2024, having been circulated to all Members, were, subject to the following amendments, confirmed as a true record.

- The addition of Councillor Susan Crosby to list of attendees.
- Item 6: Integrated Care Strategy for Nottingham and Nottinghamshire 2023 – 2027 - March 2024 Review

“Actions like this build on the Government’s plans to ban the sale of cigarettes to 14-year-olds from the 1 April 2024 and ban the sale of single-use disposable vapes” **to be replaced with** “These actions built on the Government’s plans that would mean that anyone born on or after 1 January 2009 would never be able to legally buy tobacco and ban the sale of single-use disposable vapes”.

## **2. APOLOGIES FOR ABSENCE**

Councillor Tom Smith  
Dave Briggs

Fiona Callaghan  
Colin Pettigrew  
Helen Smith  
Melanie Williams

### **3. DECLARATIONS OF INTERESTS**

There were no declarations of interest.

### **4. CHAIR'S REPORT**

The Chair presented a report on the current local and national health and wellbeing issues and their implications for the Joint Health and Wellbeing Strategy. The Chair highlighted:

- Safer Sleeping for babies and the need to promote safer sleep advice. It was noted how on average six babies died every year in Nottingham and Nottinghamshire where unsafe sleep arrangements are a factor. As such, the promotion of safer sleeping advice was vital to reduce the risk of sudden infant death syndrome and the tragedy that it brought to families.
- 14 March was No Smoking day. The Chair noted how 50% of smokers would die from a health condition related to the effects of smoking. The Chair emphasised that activity to encourage people to successfully stop smoking had the potential to significantly improve the health outcomes of the population.

The Chair also noted with concern the rising number of cases of measles in the UK that had been created by a decline in measles vaccination rates. The Chair noted that for widespread community protection, 95% of the population needed to be vaccinated. The Chair also noted that measles was a highly contagious, serious, but preventable disease and as such the promotion of vaccination should be a high priority for the membership of the Board.

Members of the Board expressed their agreement with the Chair that due to the negative outcomes for individuals of smoking that the delivery of activity that helped people to stop, or not take up smoking in the first place should be a priority area of activity across the membership of the Board. Members of the Board also shared information on some of the activities that had been carried out across Nottinghamshire to help residents to stop smoking.

### **RESOLVED (2024/007)**

That the Chair's Report and its implications for the Joint Health and Wellbeing Strategy 2022 – 2026, be noted.

- 5. THE BUILDING BLOCKS OF HEALTH – AN UPDATE ON AMBITION TWO: HEALTHY AND SUSTAINABLE PLACES**
- 6. APPROVAL OF JOINT STRATEGIC NEEDS ASSESSMENT (JSNA) PROFILE PACK: FOOD INSECURITY**
- 7. APPROVAL OF JOINT STRATEGIC NEEDS ASSESSMENT (JSNA) PROFILE PACK: FUEL POVERTY**

Agenda items five, six and seven were considered by the Board together.

Vivienne Robbins – Interim Director of Public Health, Carol Ford - Senior Public Health and Commissioning Manager and Dawn Jenkin – Consultant in Public Health attended the meeting to present the reports.

Dawn Jenkin – Consultant in Public Health presented the report on the Building Blocks of Health - an update on Ambition Two: Healthy and Sustainable Places.

It was noted how the Joint Health and Wellbeing Strategy (JHWS) set out the priorities for the Nottinghamshire Health and Wellbeing Board and how it planned to improve the health and wellbeing of residents and reduce health inequalities amongst communities. The creation of healthy and sustainable places, where everyone could grow, live, work and age in places that promoted good health, tackled the causes of health inequalities, and addressed the climate crisis, was one of the four key ambitions of the JHWS. Dawn Jenkin noted how a person's health was impacted by almost every aspect of their life, including housing, employment, connections with friends and family and access to good food and transport. These factors were the "Building Blocks of Health". Improved health outcomes and reduced inequalities could be achieved by taking action to improve these building blocks of health (surroundings; housing; family, friends, and communities; transport; work; food; education and skills and money and resources), together with an effective health and social care system.

The "Building Blocks of Health" evidenced based approach to framing these wider elements of health also had the potential for wide application across the Council and system partners, which in turn would support greater understanding and drive the action that would address health inequalities.

A summary of some of the achievements of the activity carried out during 2023 in delivering on Ambition Two: Creating Healthy and Sustainable Places, was attached as an appendix to the officers' report along with the draft of actions for the Healthy and Sustainable Places Framework to be carried out in 2024.

Carol Ford presented the reports that sought approval for the draft Joint Strategic Needs Assessment (JSNA) Profile Packs on Food Insecurity and Fuel Poverty. The draft Profile Packs were attached as appendices to the reports of the Interim Director of Public Health.

In the discussion that followed, members raised the following points and questions:

- Members were in agreement that the number of people across Nottinghamshire who were facing food insecurity, as well the number of people who were regularly missing meals was very concerning.
- That whilst the objectives detailed in the Profile Packs on Food Insecurity and Fuel Poverty were welcome the achievement of some of some of the detailed objectives would be very difficult to measure.
- How could the uptake of the Healthy Start scheme be increased in the more disadvantaged areas of Nottinghamshire so as to improve health outcomes?
- That going forwards it was essential that the evidence based approach of the “Building Blocks of Health” was communicated across all partners in order to enable everyone to work effectively together and to put the actions in place that would strengthen the building blocks.
- Members sought further information on how the JSNAs would be kept up to date and how they would be integrated into the plans of all delivery partners. Members agreed that for the objectives of the JSNA's to be realised that it was essential that activities to coordinate and join up the work of partners was carried out.
- That it was important that all members of the Board worked together to drive forward the actions that would support the delivery of the objectives of the JSNAs.
- Members agreed that the workshops held after the meetings of the Board were useful, but that they should be long enough to ensure that they were being as productive and impactful as possible.
- Members noted that whilst on many measures that health across Nottinghamshire looked in line with health outcomes elsewhere, there were large differences in health outcomes across the county and as such it was important that the JSNAs focussed attention on the delivery of activity that would address these differences.

In response to the points raised, the Chair, Vivienne Robbins, Dawn Jenkin, and Carol Ford provided the following responses:

- The delivery of activities that would strengthen the building blocks of health was very complex. As such it was challenging to set out exactly what success in their delivery in the long term would look like. Members were assured however that the accompanying action plan did contain measurable actions and outcomes that would strengthen the building blocks.
- That the creation of the Nottingham and Nottinghamshire ICS was already showing how the bringing together of health services would support the delivery of activities that would improve the health of residents.

- There was always more that could be done to increase the uptake of the Healthy Start scheme. Learning would be taken from where uptake was high in order to inform how uptake could be improved in other areas.
- It was important that work was carried out that removed barriers to people accessing healthy eating support schemes and that also removed any perceived stigma felt by people that prevented them taking up offers of support.
- The Chair noted that regular communication with residents to show how the activities being carried out by the Board were having a positive impact on the health and wellbeing of residents would be carried out.
- The Chair noted how the workshop sessions that were carried out after the conclusion of each Health and Wellbeing Board meeting provided the opportunity for members to work together to identify the actions that would drive forward the actions that would support the delivery of the objectives of the JSNA.
- The Chair agreed that the disparities in health outcomes across Nottinghamshire was of concern, but that the delivery of actions as detailed in the JSNAs was focussed on addressing these issues.

Members of the Board shared some of their experiences of how food insecurity and fuel poverty were impacting on residents in their areas and on the activities that was being taken locally to address these needs.

#### **RESOLVED (2024/008)**

- 1) That the draft Healthy and Sustainable Places Framework for Action be approved.
- 2) That the Healthy and Sustainable Places Framework for Action be further developed with partners during 2024.

#### **RESOLVED (2024/009)**

- 1) That the Joint Strategic Needs Assessment profile pack on food insecurity, be approved.

#### **RESOLVED (2024/010)**

- 1) That the Joint Strategic Needs Assessment profile pack on fuel poverty, be approved.

## **8. THE BETTER CARE FUND (BCF) QUARTER THREE NATIONAL RETURN**

Katy Ball - Service Director, Strategic Commissioning and Integration and Naomi Robinson - Joint Commissioning Manager at Nottingham and Nottinghamshire ICB attended the meeting to present a report that sought the Board's ratification of the Nottinghamshire Better Care Fund (BCF) quarterly reporting template for October – December 2023 (Quarter Three), which had been submitted to NHS England (NHSE) on 9 February 2024.

### **RESOLVED (2024/11)**

That the Nottinghamshire Better Care Fund Quarter Three reporting template, as submitted to NHS England on 9 February 2024, be ratified.

## **9. WORK PROGRAMME**

The Chair presented and the Work Programme.

### **RESOLVED (2024/012)**

- 1) That the Nottinghamshire Health and Wellbeing Board Work Programme be noted.
- 2) That Board members make any further suggestions for items for inclusion on the work programme for consideration by the Chair and Vice-Chair, in consultation with the relevant officers and partners.

There being no further business, the Chair closed the meeting at 3:47pm.

**CHAIR:**

## **REPORT OF THE CHAIR OF THE HEALTH AND WELLBEING BOARD**

### **CHAIR'S REPORT**

#### **Purpose of the Report**

1. The report provides an update by the Chair on local and national issues for consideration by Health and Wellbeing Board members to determine implications for the Joint Health and Wellbeing Strategy for 2022 – 2026.

#### **Information**

##### **LOCAL**

#### **Access Right Support to Improve Health**

##### Measles

2. Measles is a viral infection that affects the respiratory system, spreads very easily and usually starts with cold-like symptoms followed by a rash. It can cause serious and potentially life-threatening complications. Anyone at any age can be infected by the measles virus if they have not been vaccinated or had measles before. Rates of measles infections have been increasing in the Midlands.
3. The key to preventing measles is to have the measles, mumps and rubella (MMR) vaccine which is given as two doses at age one and at three years and four months – but you can be vaccinated at any age if you missed it. The MMR vaccine is safe, effective and can give lifelong protection, but vaccination rates have decreased nationally in recent years. A porcine-free version of the vaccine is also available if required.
4. Parents/carers are encouraged to check the MMR status of their child by checking their red book or contacting their GP surgery, where one or both MMR doses can be given if not fully vaccinated. Board members are asked to promote messages about MMR to staff, residents and across networks.

##### Encouraging Weight Loss – Adult Weight Management

5. Working in collaboration with Your Health Notts to offer adults with a BMI of 30-49.9 and living in socioeconomic decile one, a project in Mid Nottinghamshire aims to give patients who meet the criteria a referral to a free weekly exercise class. There is also an offer from the provider to fund gym membership for patients who are engaging with the class and want to continue exercising.

6. Between January and December 2023, 1,822 patients were referred into Adult Weight Management and 28% of those started a class. For further information please contact Victoria Pickering, PCN Development Manager, Mid Nottinghamshire Locality Team, NHS Nottingham and Nottinghamshire ICB at [victoria.pickering8@nhs.net](mailto:victoria.pickering8@nhs.net) or Mark Yates, PCN Development Manager, Mid Nottinghamshire Locality Team, NHS Nottingham and Nottinghamshire ICB at [myates@nhs.net](mailto:myates@nhs.net)

### Safe Hearts in Sport

7. Rushcliffe Borough Council have secured funding to improve access to defibrillators at sports venues, making users more equipped with tools and resources if faced with cardiac arrest situation. The project supports venues to have accessible defibrillators and staff and sports clubs coaches and volunteers trained to use equipment and build confidence. The funding primarily is to buy defibrillators for venues who do not currently have access and encourage those who already have to make them accessible to the public 24/7. So far, training has been delivered to 45 staff members and volunteers from different sports clubs.

### Hypertension Case Finding

8. A hypertension case finding project in Mid Nottinghamshire is aiming to identify patients who:
- Have a blood pressure reading 160/100 (clinic) or 155/95 (home) without a diagnosis of hypertension, and
  - Patients with a last BP reading of 140/90 (clinic) or 135/85 (home) who are living in the 20% most deprived areas.
9. Patients will be contacted by the Primary Integrated Community Services (PICS) Hypertension Team and offered home blood pressure monitoring. Once readings have been reviewed by the team, these will be recorded and acted upon accordingly depending on the result. If hypertension isn't treated, it can cause other health conditions like kidney disease, heart disease and stroke.
10. For further information please contact Victoria Pickering, PCN Development Manager, Mid Nottinghamshire Locality Team, NHS Nottingham and Nottinghamshire ICB at: [victoria.pickering8@nhs.net](mailto:victoria.pickering8@nhs.net) or Mark Yates, PCN Development Manager, Mid Nottinghamshire Locality Team, NHS Nottingham and Nottinghamshire ICB at: [myates@nhs.net](mailto:myates@nhs.net)

### Creating a smokefree generation in Nottinghamshire

11. In October 2023, the Government announced its plans to achieve a smokefree generation. As part of this announcement, the government confirmed an additional £70 million investment in England for local authority-led stop smoking services and support. For Nottinghamshire, the additional resources have been identified as £1,039,463 in 2024/25.
12. This additional investment will be used to:
- invest in enhancing local authority commissioned stop smoking services and support,
  - building capacity to deliver expanded local stop smoking services and support,

- building demand for local stop smoking services and support and
- deliver increases in the number of people setting a quit date and an increase in the number of people who successfully quit smoking (measured as 4 week quits).

### Smoking and vaping behavioural insights

13. In 2023, Nottingham and Nottinghamshire Smoking and Tobacco Control Alliance commissioned Bluegrass Research Ltd to undertake a programme of research on behavioural insights around smoking and vaping as part of the Nottingham and Nottinghamshire's Smoking and Tobacco Alliance delivery plan.
14. The work included carrying out quantitative and qualitative research with local communities to understand about smoking and vaping behaviour and perceptions, as well as engaging with communities regarding the social impacts of smoking within the community and smokefree spaces. A total of 1034 residents (417 Nottingham City and 617 Nottinghamshire County) took part in the research. Some key findings across the system were:
- Amongst smokers, there are certain demographics who are more likely to smoke. These include men, under 45's, those living in social housing and those with an existing health condition (physical and/or mental).
  - 44% of the respondents who currently smoke, want to quit.
  - 80% of those who use a nicotine vape say they did so to try and quit/cut down; almost half have remained smoke free.
  - Most residents support smoke free spaces.
15. Work is now being undertaken to help the Alliance and its partners to further explore some of the detail behind why people smoke and vape and to understand the local culture. The findings will be fed into the Alliance and ongoing delivery plans to support work towards creating a smokefree generation for Nottinghamshire.

### Inspiring event in Broxtowe on the health and wellbeing of people with a learning disability

16. Nearly 50 people attended a sharing event in Broxtowe focused on the health and wellbeing of people with a learning disability, which was described as 'inspiring', 'positive' and 'informative'. The aim of the event was to share the learning from a year of prolonged listening at a series of health and wellbeing roadshows, to share actions already taken based on what has been heard and to agree on ways to build on this work collectively.
17. The roadshows were funded by a grant of £2,000 from Health Innovation East Midlands to Nottingham West PCN to engage with people living locally who have learning disabilities – to see how local services could better support them to live more healthily.
18. General feedback from the roadshows was that people with learning disabilities want to be known, they want to be spoken to directly and involved in decision making that directly affects them, and that language is important – for example, one attendee said that people were 'talking upside down language' – where a negative result in health isn't usually a bad thing but a positive result may be.

19. The attendees did some group work on the topics of health, education and training and physical activity, discussing the issues, barriers, solutions and who was best placed to lead on implementing specific changes.

## **Create Healthy and Sustainable Places**

### [Carlton awarded up to £20 million from Long-Term Plan for Towns fund](#)

20. Gedling Borough Council has been awarded funding for Carlton following an announcement by the government in the spring budget. The Department for Levelling Up & Communities has written to the council to inform them that they are one of 55 towns to receive funding as part of the Long-Term Plan for Towns announced in yesterday's spring budget. The council could get up to £20 million over a 10-year period to use on community projects to regenerate the area and reduce anti-social behaviour.
21. The council will receive 'endowment-style' funding to give them the certainty to deliver projects over the 10-year lifespan of the programme and flexibility to invest in interventions based on local needs and priorities. In order to receive the funding, a Town Board needs to be created and long-term plan produced. The board needs to be made up of members of the community, local businesses, councillors and the local Member of Parliament. A key element of the programme is engagement with the community to ensure their voices are heard when it comes to where the funding will be invested.

### [£9.2million secured for Hucknall Town centre Regeneration](#)

22. Ashfield District Council has secured £9.2million for Hucknall Town Centre regeneration through round two of the Levelling Up Fund. The council has an ambitious plan to drive economic regeneration in Hucknall with a focus on three main themes - skills and economic regeneration, cultural and heritage gateway, and access to Hucknall town centre.

### [New Social Housing in Ashfield](#)

23. Ashfield District Council has worked with The Lindum Group Ltd to deliver 34 new affordable family homes, to help ease the social housing demand in the area. In total 18 two-bedroom and 16 three-bedroom family homes have been built. The homes will be let to applicants on the Council's housing register, and have been designed to reduce carbon output, running costs, and will reach EPC A rating. Two of the three-bedroom houses have a ground floor bedroom, making them suitable for a family with accessibility challenges.

### [Community Gardens in Newark and Sherwood](#)

24. Community gardens are being created in a number of communities in Newark and Sherwood, supported by cost-of-living funding from Newark and Sherwood District Council. A garden is being created alongside a food club in Bilsthorpe and will be directly linked to the link worker in the area, instigated by the green social prescriber.
25. A Community Interest Company (CIC) has been set up by a local Crop Drop grower 'Grow Incredible' who will help set up a number of these community gardens. A number of these community gardens will be utilising the green space within social housing areas, encouraging tenants to get involved. For further information please contact Helen Ellison, Senior Health

Improvement Officer, Newark and Sherwood District Council at: [Helen.ellison@nsdc.info](mailto:Helen.ellison@nsdc.info)

### £13,000 to support Broxtowe Food Banks

26. Food banks in Broxtowe will be able to provide more support to local people, thanks to a £13,000 donation from Broxtowe Borough Council, part of its UK Shared Prosperity Funding. 11 food banks and two food clubs across the breadth of the borough received £1,000 each. More information regarding cost-of-living support in Broxtowe can be found here: <https://www.broxtowe.gov.uk/costofliving>

### Holiday Activities and Food Fund (HAF)

27. Lex Leisure have successfully applied to the Holiday Activity and Food Fund (HAF) and will receive funding to deliver two programmes in Rushcliffe at Bingham Arena during the Easter and Summer school holidays. The programmes are Girls Powerlifting and Generic Gym, both will include introduction and instructor led sessions during the Easter holidays, followed by 3 months gym membership, with additional instructor led sessions in the summer. Additional funding will be applied for a further 9 months gym membership in the next round of applications over the summer.

### Gedling Welcome and Warm Spaces

28. 35 venues and partners have signed up to the welcome and warm spaces initiative to offer services in various settings across Gedling, including venues such as the Richard Herrod Centre and the Bonington Theatre. Several other community groups have also offered out their spaces such as Men in Sheds in Carlton, Netherfield Forum and the Salvation Army.

29. All of the partners signed up to the initiative have the opportunity to be part of the Community Hubs and Partners Network, where appropriate. The network meets virtually on a quarterly basis and whilst the network isn't specifically about welcome and warm spaces it offers hubs and organisations the chance to share experiences, find out about funding opportunities and to connect with other local organisations.

### Extra Funding for Warm Packs in Bassetlaw

30. Bassetlaw District Council and a number of its partners have donated almost £24,000 of funding to help residents access warm packs over the colder winter months. The Council has provided £20,000 of funding as part of its commitment to support vulnerable residents in the district, in addition to almost £4,000 from contractors and partners who work with the Council's Housing Team. This includes United Living, Savills, Westville, Fortem, and Focus Consultants.

31. The funding has been handed over to Bassetlaw Action Centre, who allocate and distribute the warm packs, which are made up of two oil filled radiators, an electric blanket, a thermos flask, and a thermometer. So far this year, 23 warm packs have been distributed across the district.

## **Give every child the best chance of maximising their potential**

### Learn to Swim Scheme in Gedling

32. Gedling District Council have now reached 57 of 62 learners on their Jigsaw swim scheme. In this scheme £2 swim lessons are offered for any junior aged over 4 years who is living in a Jigsaw home to take them to the completion of 25m which is the minimum standard for school curriculum. This scheme started in 2021 as a result of highlighted short falls in provision of swimming lessons for disadvantaged children.
33. Ability to swim 25 metres is affected by both family affluence and location (looking at school years 1-11) and only 42% of children and young people from lower socio-economic groups can swim 25 metres unaided, compared to 86% of those from higher socio-economic groups. Only 45% of children and young people going to school in the most deprived areas of the country can swim 25 metres, compared to 76% in the least deprived areas.

## **Keep our Communities Safe & Healthy**

### LGBT+ History Month in Bassetlaw

34. Since 2004 LGBT+ History Month has been celebrated every February across the UK. The national month-long campaign focuses on LGBT+ history and heritage, how much progression has been made, and challenges that LGBT+ communities still face today. Every year there is a different theme of LGBT+ history, the theme for LGBT+ 2024 History Month is 'Representation in Medicine' linking well to the importance of good health and wellbeing.
35. To raise awareness of LGBT+ History Month and encourage workforces across health, education, the voluntary community and social enterprise (VCSE) or business sector to support and celebrate this, Bassetlaw partners worked with local LGBT+ communities to co-produce an LGBT+ History Month resource pack to share across the district. This pack included LGBT+ History Month activity resources and displays, online graphics and social media assets and can be accessed here: [Mental Health Bassetlaw/LGBT+-resources](#)

### Gedling Borough Council supports national No More Week to prevent domestic abuse

36. Gedling Borough Council has been actively supporting national No More Week, a campaign aimed at raising awareness of domestic abuse and sexual violence while inspiring individuals, organisations, and communities to instigate change. The council has collaborated closely with partners Nottinghamshire Police as part of its ongoing safeguarding efforts, advocating for programmes designed to assist individuals experiencing domestic violence.
37. As part of a week-long initiative, the council showcased its collaborative efforts through the unveiling of a permanent stand at the council's civic centre. This stand aims to raise awareness of the support available to those in need. The stand will feature information and links to support services provided by Juno Women's Aid, Arnold Jobcentre DWP, ManKind and others.

### Unanimous support for Rushcliffe motion to further reduce violence against women and girls

38. At a Full Council meeting of Rushcliffe Borough Council in March, in line with the re-launch of a programme by the Office of the Police and Crime Commissioner for Nottinghamshire, there

was full support to review where the council could support the Nottinghamshire Violence Against Women and Girls (VAWG) Strategy and Action Plan. The Plan has been developed by a range of partner organisations including all local authorities across the County and includes five pillars (preventing, responding, supporting, including and strengthening), with the aim of reducing cases of violence and providing wider support for victims of abuse.

#### [New Temporary Accommodation Set to Open in March after £4.1m Investment](#)

39. Newark and Sherwood District Council's new temporary accommodation, Alexander Lodge, is set to welcome residents as early as March 2024. The District Council will temporarily house those experiencing homelessness at the new facility.
40. The Council is committed to providing homelessness assistance, and tenancy support services in the district and has invested £4.1 million in constructing Alexander Lodge. Upon arrival, the tenancy support team will welcome residents, help them settle in and support them to access the immediate services and provisions they and their families need.
41. The team will also be working with residents to identify individual support needs, such as education, health, and employment, in anticipation of accessing more permanent accommodation. Additionally, by the autumn, Alexander Lodge will offer a wider support package to meet key skills such as budgeting, health and well-being, home safety, and practical skills in partnership with local colleges.

#### [Newark District Council reaffirms its commitment to supporting homeless people and preventing rough sleeping](#)

42. The district council have introduced a new Homelessness Prevention and Rough Sleeper Strategy, which will see a person-centred approach to creating sustainable solutions based on individuals' needs and aspirations. At the core of the strategy are six priorities which will underpin the district council's approach to the development and delivery of homelessness services in Newark and Sherwood:
- Early intervention through effective partnership working.
  - The provision of an accessible, agile, and responsive homelessness service.
  - Access to affordable and quality accommodation across all sectors.
  - Tackle rough sleeping by developing and improving pathways.
  - Linking homelessness, health, wellbeing, and housing together to improve the life chances and aspirations of those affected.
  - Delivering holistic support solutions to sustain long-term tenancies and prevent homelessness and rough sleeping.
43. To ensure the six priorities are delivered, the district council will develop a delivery plan with key stakeholders, carry out annual reviews, monitor the local, regional, and national context, and ensure robust data analysis frameworks are in place.

### [New funding to enhance safety in Mansfield's night-time economy](#)

44. Improved guardianship will be implemented to keep people even safer on a night out in Mansfield. 'Street guardians' will be given training to spot the signs and prevent violence against women and girls in the town centre thanks to the Safer Streets initiative. The scheme will be delivered in partnership with St John Ambulance to set up a project similar to 'Operation Vigilant', which began in Dorset.
45. The guardians will also have First Aid training, high-visibility uniform, and will hand out water. The scheme would also look to reinvigorate the 'Ask For Angela' campaign with renewed advertising and promotional materials. The scheme allows women who feel unsafe to discretely approach venue staff and 'Ask For Angela' to be given help.
46. The initiative is among several schemes coming to the town as a result of more than £133,000 of investment in the town centre. This has been made possible after the Office of the Police and Crime Commissioner secured £1 million of Home Office funding through the Safer Streets fund, aimed at tackling antisocial behaviour, neighbourhood crime, and violence against women and girls across the county.
47. In total more than £333,000 will be spent across the North Nottinghamshire Community Safety Partnership area, which also includes Sutton-in-Ashfield. Mansfield District Council is due begin delivering the interventions within the next few months.

## **NATIONAL**

### **Good food and nutrition for all**

#### [Calorie reduction programme: industry progress 2017 to 2021](#)

48. This report published by Office for Health Improvement and Disparities, is the first assessment of progress by all sectors of the food industry towards delivering the ambitions and guidelines set for the calorie reduction programme between 2017 and 2021. It assesses progress made by retailers, manufacturers and businesses in the eating out of home sector. The report also provides updated estimates of excess calorie consumption for children and adults.

### **Mental health**

#### [Mental Health 360 | Review Of Mental Health Care | The King's Fund \(kingsfund.org.uk\)](#)

49. The King's Fund have undertaken a '360-review' of mental health care in England. The review focuses on nine core areas, bringing together data available at the time of publication with expert insights to support understanding of what is happening in relation to mental health and the wider context.

#### [£10 million to support suicide prevention](#)

50. People struggling with their mental health will be better supported thanks to a £10 million funding boost for organisations working to prevent suicides. A total of 79 organisations, including a suicide prevention helpline, will receive funding through the government's Suicide Prevention VCSE Grant Fund. This will expand access to support services covering every region in the country, including the areas with the highest rates of suicide.

51. Both national charities and small community-led charities, which provide tailored support for local areas, will receive new funding to support people with their mental health. Many charities will deliver services through partnerships and alliances, to help ensure joined-up support for individuals seeking help.

## **Tobacco**

### [Vaping products duty consultation](#)

52. The government announced at Budget 2024 that it would introduce a new Vaping Products Duty from October 2026. A consultation has been launched, which sets out the proposals for how the duty will be designed and implemented. This duty will be accompanied by a one-off increase in tobacco duties.
53. [In January 2024](#), the Department of Health & Social Care (DHSC) announced a range of restrictions it will introduce on vaping products, including on the supply and sale of disposable vapes. This consultation led by HM Treasury and HM Revenue and Customs builds on these measures, with proposals for how a vaping duty would further tackle the harms of vaping.
54. The duty is intended to discourage young people and non-smokers from vaping, while maintaining the current financial incentive to choose vaping over smoking. The consultation closes on 29 May 2024.

## **Physical activity**

### [Stride and ride: England's path from laggard to leader in walking, wheeling and cycling](#)

55. This report published by the Institute for Public Policy Research (IPPR), makes the case that investing in active travel to increase journeys made by walking, wheeling and cycling has health, climate and wellbeing benefits and also offers a way to create green jobs, boost the economy and create safer streets.

## **Other Options Considered**

59. There was the option to not provide the Chair's Report, however this option was discounted as the Chair's Report provides important updates relating to the delivery of the Joint Health and Wellbeing Strategy for Nottinghamshire.

## **Reason for Recommendations**

60. To identify potential opportunities to improve health and wellbeing in Nottinghamshire.

## **Statutory and Policy Implications**

61. This report has been compiled after consideration of implications in respect of crime and disorder, data protection and information governance, finance, human resources, human rights, the NHS Constitution (public health services), the public-sector equality duty, safeguarding of children and adults at risk, service users, smarter working, sustainability and the environment and where such implications are material they are described below. Appropriate consultation has been undertaken and advice sought on these issues as required.

## **Financial Implications**

62. There are no direct financial implications arising from this report.

## **RECOMMENDATIONS**

The Health and Wellbeing Board is asked:

- 1) To consider the Chair's Report and its implications for the Joint Health and Wellbeing Strategy 2022 – 2026.
- 2) To establish any actions required by the Health and Wellbeing Board in relation to the various issues outlined in the Chair's Report.

**Councillor Dr John Doddy**  
**Chairman of the Health & Wellbeing Board**  
**Nottinghamshire County Council**

**For any enquiries about this report please contact:**

Lizzie Winter  
Public Health & Commissioning Manager

**17 April 2024****Agenda Item: 5**

## **APPROVAL OF REFRESHED JOINT STRATEGIC NEEDS ASSESSMENT (JSNA) CHAPTER: CARERS**

### **Purpose of the Report**

1. To request that the Health and Wellbeing Board approve the refreshed Joint Strategic Needs Assessment (JSNA) chapter on Carers.

### **Information**

2. Health and Wellbeing Boards have a statutory responsibility to produce a Joint Strategic Needs Assessment (JSNA). The JSNA for Nottinghamshire comprises of a range of topic chapters and supporting information. Approval for the Carers JSNA chapter is sought from the Board in line with the [agreed JSNA work programme](#), which is developed through the JSNA prioritisation process.
3. In line with national guidance, to reflect population changes, the impact of COVID-19, current local issues and to inform Adult Social Care (ASC) commissioning activity, the Carers JSNA chapter has been updated and refreshed. The refreshed chapter has been endorsed by the owning group (the Carers Integrated Commissioning Forum).
4. This report provides an executive summary of the refreshed chapter (**Appendix 1**), which provides an overview of national carers research and proven ways of working that have positive impacts for carers and outlines recommendations for action locally.

### **Introduction**

5. A person is a carer if they provide unpaid support to a family member, neighbour or friend. The person could need support because they are ill, frail, disabled, experiencing mental health issues or using drugs or alcohol.
6. The Care Act 2014 defines a carer as “an adult who provides or intends to provide care for another adult” and “a carer is someone who helps another person, usually a relative or friend, in their day-to-day life. This is not the same as someone who provides care professionally, or through a voluntary organisation”.
7. The Children and Families Act 2014 defines a young carer as “a person under 18 who provides or intends to provide care for another person”. It also defines a parent-carer as “a person aged

18 or over who provides or intends to provide care for a disabled child for whom the person has parental responsibility”.

8. As well as supporting the person they care for, carers have their own needs linked to their caring role and their quality of life can be impacted. The JSNA chapter considers the needs of both adult and young carers, including those caring for parents, siblings and children, as well as caring arrangements that may sit outside of the family unit, such as support from friends or neighbours.

## **National context**

9. Nationally the 2021 Census data relating to unpaid carers shows a decrease in the overall total number of unpaid carers, down from 6.3 million to 5 million, a reduction of 1.3 million. This means that around 9% of the population are providing unpaid care.
10. The reduction may be due to many people not recognising themselves as carers, with Carers UK reporting that half of all carers (51%) took a year or more to recognise their caring role and a third taking over three years. Carers UK instead estimate that 10.6 million, or one in five people, are an unpaid carer in the UK.
11. Despite the overall reported fall in the total number of carers, those carers providing 50 hours or more unpaid care has increased by 7%.
12. Nationally 120,000 young carers aged between five and seventeen are reported in the England census data. The number of young adults aged 18 to 24 providing between 20 to 49 hours of unpaid care per week has risen from 43,950 in the 2011 Census, to 71,120 in 2021. Over the period 2010-2020, every year, 4.3 million people became unpaid carers.

## **Local context**

13. The national picture is reflected locally in Nottinghamshire, where 2021 Census data shows that there has been an overall decrease in the number of carers in the previous decade by 8,526 across Nottinghamshire County.
14. This latest Census estimated that 41,649 carers were providing between 1-19 hours of care per week, down by 15,777 since the 2011 Census. However, those carers providing over 50 hours of care per week has increased by 2,819 from 21,680 to 24,499.
15. The 2021 Census data shows that there are 1126 young carers in Nottinghamshire.

## **Unmet needs and knowledge gaps**

16. There are currently a range of services and support options available for carers in Nottinghamshire as detailed in the JSNA chapter. However, feedback received from carers shows that there are additional requirements to support both working carers and parent-carers. Parent-carers in particular report being unsure regarding where their parenting role ends and their caring role begins and therefore find it difficult to access support in their own right.

17. The State of Caring Report (2019) states that “providing support for carers, especially those looking to stay in, or return to, paid work, is essential if women are able to be able to participate fully in the economy and live a life free from poverty in older age”. The report also states that “increasing numbers of employers are recognising the importance of supporting carers in their workforce to continue working, so they can retain talented staff rather than incurring the costs of recruiting and retraining new employees”. It is important therefore that work is undertaken with provider services, including statutory services, to ensure that provision of support is available and accessible to carers who work.
18. Additionally, whilst the data shows that the vast majority of carers in Nottinghamshire are white there is a danger that this may lead to carers from minority ethnic communities not receiving the support they need or being engaged in co-production activities to ensure that services meet their needs.
19. Carers are also facing increasing pressures due to cost of living, including those who are able to continue in their employment. This is exacerbated by increasing care costs for those they are caring for. Available research is limited around the impact of the current cost of living crisis on carers and further support may be required as evidence emerges. Locally information will be gathered via the commissioned services, Carers Space and other co-production routes.
20. Parent-carer needs are also under-represented in the research however this is an emerging need locally and further knowledge is required to ensure that parent-carers are to be supported in the most appropriate way.
21. Research shows a significant impact on the mental health and wellbeing of carers once their caring role has ended and additional information is required to understand how to support people as their caring role changes or ends.
22. Severe multiple disadvantage is a way of describing the lived experience of people whose current circumstances have been strongly shaped by deprivation, trauma, and abuse, often leading to experiences of homelessness, mental ill-health, domestic abuse/sexual violence, harmful use of drugs and alcohol, and perhaps contact with the criminal justice system. The number of carers impacted by severe multiple disadvantage is unknown.

## Recommendations for consideration

23. The JSNA chapter recommendations identify key changes required to address needs of local Carers. These are set out in the table below:

	Recommendation	Lead(s)
1	Review and streamline the provision of short breaks for carers to ensure a range of options are available for those who require them. Educate staff to enable effective commissioning of available short breaks.	Nottinghamshire County Council Integrated Strategic Commissioning
2	Ensure carers needs and the caring situation is considered throughout all aspects of social care provision through whole family assessments to move away from silo working and ensure that the needs of the	Principal Social Worker

	whole family (including the carer) are met in the most appropriate way. As part of this keeping carers informed about outcomes and next steps through feedback.	
3	Work proactively with the assistive technology work programme to ensure carer needs are encapsulated in equipment specifications (e.g. the need for alternative monitoring for people with dementia to provide a break for the carer or the use of electronic reminder services for medications and appointments to free up carer time/reduce visits).	Nottinghamshire County Council Integrated Strategic Commissioning
4	Develop a single point of access for carers so that they are aware of where to go for information and advice without being overwhelmed with information.	Carers Hub Service
5	Support carers to plan for the future including a change in their needs as well as those for the person they are caring for. This will involve early conversations with carers to plan for future changes and contingency planning for emergency situations.	Carers Hub Service
6	Ensure easily accessible information and advice (including support and finance) is available when it is required including out of standard office hours. This will need to be supported by face-to-face support and connecting to services rather than signposting.	Carers Hub Service through coproduction activity
7	Support young carers as they transition from children to adult services to ensure that they continue to receive support whilst maximising their potential to take up educational, employment and social opportunities.	Carers Hub Service and Young Carers Support Service
8	Develop support for parent-carers specific to their caring role.	Carers Hub Service in coproduction with parent-carers
9	Review the current young carers assessment tool to bring in line with strength-based approaches and ensure that support provided achieves the appropriate outcomes for the young carers.	Integrated Strategic Commissioning, Children and Families Service and operational teams in coproduction with young people and families
10	Ensure carers are identified and offered support at the earliest opportunity including through schools and primary care to prevent a crisis from occurring.	All system partners and commissioned services
11	Ensure that carers needs in relation to Severe Multiple Disadvantage are recognised as part of the assessment and whole family process utilising a multidisciplinary approach to support people within this group and prevent self-neglect. Improve data recording to determine impact of this area on carers and inform future service and support planning.	All partners
12	Ensure that carers have equal access to support in a way that is suitable and appropriate for them and their family needs. This will include carers who may not have English as their first language (including BSL), carers	All system partners and commissioned services

	from ethnic minority backgrounds, support that is appropriate to religious needs or those who find it difficult to access statutory services during office hours due to work commitments.	
--	---	--

## **Other Options Considered**

24. The recommendations are based on a review of the current evidence available and will be used to inform decision making processes.

## **Reasons for Recommendation**

25. Health and Wellbeing Boards have a statutory responsibility to produce a JSNA and approval for the Carers JSNA chapter is sought from the Board in line with the approved JSNA work programme. The chapter has been refreshed to reflect current local issues and to inform future actions for Nottinghamshire County Council and partner organisations.

## **Statutory and Policy Implications**

26. This report has been compiled after consideration of implications in respect of crime and disorder, data protection and information governance, finance, human resources, human rights, the NHS Constitution (public health services), the public sector equality duty, safeguarding of children and adults at risk, service users, smarter working, sustainability and the environment and where such implications are material they are described below. Appropriate consultation has been undertaken and advice sought on these issues as required.

## **Financial implications**

27. There are no direct financial implications arising from this report.

## **Consultation**

28. A working group of carers was formed to provide carer voices for the [Joint Carers Strategy 2023-28](#) and to inform the authors of the needs of carers and their experience of caring and to highlight areas for future development. The feedback from this group, the feedback from the Big Conversation and coproduction activity for the Joint Carers Strategy have all been utilised to develop the priority areas within the JSNA.

## **Public Sector Equality Duty implications**

29. By implementing the recommendations within the JSNA chapter further equal opportunities and access to services should be available to people with autism.

## **Implications for Residents**

30. Implementation of the recommendations within the JSNA chapter will ensure equality of access for all carers to a range of services and support to meet their needs.

## **RECOMMENDATION**

The Health and Wellbeing Board is asked:

- 1) To approve the Joint Strategic Needs Assessment (JSNA) chapter on Carers, provided in **Appendix 1**.

**Melanie Williams**  
**Corporate Director, Adult Social Care & Health**  
**Nottinghamshire County Council**

## Executive summary

### Introduction

A person is a carer if they provide unpaid support to a family member, neighbour or friend. The person could need support because they are ill, frail, disabled, experiencing mental health issues or using drugs or alcohol.

The Care Act 2014 defines a carer as “an adult who provides or intends to provide care for another adult” and “A carer is someone who helps another person, usually a relative or friend, in their day-to-day life. This is not the same as someone who provides care professionally, or through a voluntary organisation”.

The Children and Families Act 2014 defines a young carer as “a person under 18 who provides or intends to provide care for another person”.

The Children’s and Families Act 2014 also defines a parent carer as “a person aged 18 or over who provides or intends to provide care for a disabled child for whom the person has parental responsibility”.

A carer doesn’t necessarily have to live with the person they care for to be a carer - some carers don’t live in the same town or city as the person they care for, but their lives are still affected by their caring role. Anyone can become a carer, and often caring responsibilities for a family member, loved one, friend or neighbour can arise unexpectedly.

Unpaid carers are crucial for providing care and support to those vulnerable and in need in our society. However, their caring role may impact significantly on their psychological and physical wellbeing and these in turn will determine the sustainability of their caring role.

This Chapter provides an insight into the prevalence of carers living in Nottinghamshire. Using a variety of data sources, it explores areas of carer need including physical and psychological health, employment and financial support. This chapter also gives an overview of current service provision and assets.

### Prevalence

Nationally the 2021 Census data relating to unpaid carers shows a decrease in the overall total number of unpaid carers; down from 6.3 million to 5 million, a reduction of 1.3 million. This means that around 9% of the population are providing unpaid care. This may however be due to many people not recognising themselves as carers with Carers UK reporting that half of all carers (51%) took a year or more to recognise their caring role and a third taking over 3 years<sup>1</sup>. Carers UK instead estimate that 10.6 million, or one in five people, are an unpaid carer in the UK. Despite the overall reported fall in the total number of carers, those carers providing 50 hours or more unpaid care has increased by 7%. Nationally 120,000 young carers between five and seventeen are reported in the England census data. The number of young adults aged 18 to 24 providing between 20 to 49 hours of unpaid care per week has risen from 43,950 in the 2011 census, to 71,120 in 2021. Over the period 2010-2020, every year, 4.3 million people became unpaid carers<sup>2</sup>.

<sup>1</sup> Carers UK [State of Caring Report 2022](#)

<sup>2</sup> [Carers UK](#)

Locally, the 2021 Census data regarding carers, despite the impact of COVID-19 and estimates by Carers UK, shows that there has been an overall decrease in the number of carers in the previous decade by 8,526 across Nottinghamshire County. The latest census estimated that 41,649 carers providing between 1-19 hours of care per week – down by 15,777 since the 2011 Census. However, those carers providing over 50 hours of care per week has increased by 2,819 from 21,680 to 24,499.

### **Unmet need and gaps**

From feedback received from carers it is clear that there are additional requirements to support both working carers and parent-carers. Parent-carers in particular report being unsure regarding where their parenting role ends and their caring role begins and therefore find it difficult to access support in their own right. The new Carers Hub service are able to provide support to parent-carers but further work is required to ensure that all areas are aware of this service offer so that carers are able to access the support provided.

The State of Caring Report (2019) states that “providing support for carers, especially those looking to stay in, or return to, paid work is essential if women are to be able to participate fully in the economy and live a life free from poverty in older age”. The report also states that “increasing numbers of employers are recognising the importance of supporting carers in their workforce to continue working, so they can retain talented staff rather than incurring the costs of recruiting and retraining new employees”. It is important therefore that we work with provider services, including statutory services, to ensure that provision of support is available and accessible to carers who work.

Additionally, whilst the data shows that the vast majority of carers in Nottinghamshire are white there is a danger that this may lead to carers from ethnic minority backgrounds not receiving the support they need or being engaged in coproduction activities to ensure that services meet their needs. The new Carers Hub service has been specifically tasked with broadening support to all communities as part of the new contract.

### **Recommendations for consideration**

	Recommendation	Lead(s)
1	Review and streamline the provision of short breaks for carers to ensure a range of options are available for those who require them. Educate staff to enable effective commissioning of available short breaks.	Nottinghamshire County Council Integrated Strategic Commissioning
2	Ensure carers needs and the caring situation is considered throughout all aspects of social care provision through whole family assessments to move away from silo working and ensure that the needs of the whole family (including the carer) are met in the most appropriate way. As part of this keeping carers informed about outcomes and next steps through feedback.	Principal Social Worker

3	Work proactively with the assistive technology work programme to ensure carer needs are encapsulated in equipment specifications (e.g. the need for alternative monitoring for people with dementia to provide a break for the carer or the use of electronic reminder services for medications and appointments to free up carer time/reduce visits)	Nottinghamshire County Council Integrated Strategic Commissioning
4	Develop a single point of access for carers so that they are aware of where to go for information and advice without being overwhelmed with information	Carers Hub Service
5	Support carers to plan for the future including a change in their needs as well as those for the person they are caring for. This will involve early conversations with carers to plan for future changes and contingency planning for emergency situations	Carers Hub Service
6	Ensure easily accessible information and advice (including support and finance) is available when it is required including out of standard office hours. This will need to be supported by face-to-face support and connecting to services rather than signposting.	Carers Hub Service through coproduction activity
7	Support young carers as they transition from children to adult services to ensure that they continue to receive support whilst maximising their potential to take up educational, employment and social opportunities.	Carers Hub Service and Young Carers Support Service
8	Develop support for parent-carers specific to their caring role.	Carers Hub Service in coproduction with parent-carers

--	--	--

## Full JSNA report

### Notable changes from previous JSNA

---

Since the previous JSNA a new census has been carried out providing updated information regarding carers, their demographics and who they are caring for. This intelligence provides up-to-date information regarding carers and their needs to support them in their caring role.

The Covid-19 pandemic has also significantly impacted on carers and learning from this will be used to support carers in the future.

### What do we know?

#### 1. Who is at risk and why?

---

A person is a carer if they provide unpaid support to a family member, neighbour or friend. The person could need support because they are ill, frail, disabled, experiencing mental health issues or using drugs or alcohol.

The support provided could be:

- washing and dressing
- shopping and food preparation
- helping with laundry or housework
- keeping someone company
- helping someone take medication
- emotional support or help managing difficult behaviour
- keeping an 'eye' on someone to make sure they are safe.

People are still carers if they:

- don't live with the person they care for
- are not the only person providing care to someone
- are caring for more than one person
- are not related to the person they care for.

A carer may be a spouse, a friend or neighbour. Carers may often have multiple caring roles as well as additional responsibilities. For example a person may be caring for a spouse, providing childcare for grandchildren, helping a neighbour with their shopping as well as maintaining paid employment.

The Care Act 2014 defines a carer as “an adult who provides or intends to provide care for another adult” and “A carer is someone who helps another person, usually a relative or friend, in their day-to-day life. This is not the same as someone who provides care professionally, or through a voluntary organisation”.

The Children and Families Act 2014 defines a young carer as “a person under 18 who provides or intends to provide care for another person”.

The Children’s and Families Act 2014 also defines a parent carer as “a person aged 18 or over who provides or intends to provide care for a disabled child for whom the person has parental responsibility”.

A carer doesn’t necessarily have to live with the person they care for to be a carer - some carers don’t live in the same town or city as the person they care for, but their lives are still affected by their caring role. Anyone can become a carer, and often caring responsibilities for a family member, loved one, friend or neighbour can arise unexpectedly.

Unpaid carers are crucial for providing care and support to those vulnerable and in need in our society. However their caring role may impact significantly on their psychological and physical wellbeing and these in turn will determine the sustainability of their caring role.

Covid-19 led to an increase in carers who provided support for the first time with “almost [one third \(32%\)](#) [of carers] mentioned giving help to someone who they did not help previously”<sup>3</sup>. These people may not identify themselves as carers and indeed many other carers can often fail to recognise their caring role. It is important that the needs of all caring groups are captured and their needs assessed to ensure they are supported to maintain their caring role alongside their own health and wellbeing.

### 1.1. National picture

Nationally the 2021 Census data relating to unpaid carers shows a decrease in the overall total number of unpaid carers; down from 6.3 million to 5 million, a reduction of 1.3 million. This means that around 9% of the population are providing unpaid care. This may however be due to many people not recognising themselves as carers with Carers UK reporting that half of all carers (51%) took a year or more to recognise their caring role and a third taking over 3 years<sup>4</sup>. Carers UK instead estimate that 10.6 million, or one in five people, are an unpaid carer in the UK. Despite the overall reported fall in the total number of carers, those carers providing 50 hours or more unpaid care has increased by 7%. Nationally 120,000 young carers between five and seventeen are reported in the England census data. The number of young adults aged 18 to 24 providing between 20 to 49 hours of unpaid care per week has risen from 43,950 in the 2011 census, to 71,120 in 2021. Over the period 2010-2020, every year, 4.3 million people became unpaid carers<sup>5</sup>.

Unpaid carers are crucial for providing care and support to those vulnerable and in need in our society. However their caring role may impact significantly on their own psychological and physical wellbeing and these in turn will determine the sustainability of their caring role.

Census 2021 data shows that nationally there is a 152,000 increase in the number of carers providing 50 or more hours care/week over last decade. This also indicates that the ‘health gap’ between carers who are providing over 50 hours or more per week of unpaid care compared to non-carers is equivalent to losing 18 days of full health each year. The data

---

<sup>3</sup> [Office for National Statistics](#)

<sup>4</sup> Carers UK [State of Caring Report 2022](#)

<sup>5</sup> [Carers UK](#)

suggests that many carers are doing more, but at the detriment to their own health and wellbeing. The data also shows that the highest percentage of people providing unpaid care are in the most deprived areas in England, compared with the least deprived areas.

The 2021 Census reported 120,000 young carers (aged five to 17) in England however Carers Trust and others think there is significant under-reporting with some studies suggesting the figure is as high as 700,000 UK-wide. On average, young carers are caring for three years before being identified and have poorer physical and mental health compared to their peers.

The Carers Trust Survey<sup>6</sup> found that more than half of young carers and young adult carers (51%) reported that they care for 20-49 hours each week. 56% of young carers and young adult carers said the time they spend caring has increased in the last years, and 47% now care for more people than they used to. 44% 'always' or 'usually' feel stressed because of being a young carers or young adult carer, and 27% either 'never' or 'not often' feel they get enough sleep. One in three young carers and young adult carers (37%) said the NHS did not understand their needs as an unpaid carer either 'very well' or 'at all'. Support for their mental health was one of the top priorities identified by young carers and young adult carers.

Nationally, women make up 59% of carers and more women are providing high intensity care when they would otherwise expect to be in paid work. 41% of people who became new carers between 2010 and 2020 were people aged 46-65<sup>7</sup>. The State of Caring report (2022) shows that many carers feel forced to give up work to carry out their caring role and many can find it difficult to return to the workforce after having a substantial break to support the person they are caring for. The State of Caring report 2022 shows that 75% of carers worry about managing to juggle work and care going forward<sup>8</sup>.

Carers UK estimate that the value of unpaid care provided in £193 billion a year, exceeding the budget of the NHS<sup>9</sup>. Surrey County Council carried out some modelling of what it would mean if they failed to support their carers effectively. They found that if just 10% of the 13,000 carers they supported each year required alternative support for the people they care for it would cost them an additional £14.7 million each year<sup>10</sup>.

"The impact of caring is not just dictated by the number of hours of care provided. If a carer is working full-time, combining caring with looking after young children, or having to travel long distances to provide care, then even having to provide a few hours of care a week can have a serious impact on their life"<sup>11</sup>. Carers UK Carers Survey 2022 found that 74% of carers care for one person, 19% care for 2 people, 4% care for 3 people and 2% care for 4 people or more<sup>12</sup>.

According to 2021 census data around 2.5 million people are carrying out their caring role alongside paid employment however many of these (around 600 people every day) will give up work as caring demands and pressures mean that maintaining employment is unfeasible. Carers Allowance will then become their main source of income and is currently set at

<sup>12</sup> Carers UK [State of Caring Report 2022](#)

£81.90 per week (for those providing a minimum of 35 hours of care per week). This reduction in income can have a significant impact on the health and wellbeing of individuals as discussed at 1.11.

Many carers may also have caring responsibilities for more than one individual compounding some of the pressures they feel. Further the Carers Survey 2022 reports that 31% of carers have been caring for 15 years or more, 14% for 10-14 years and 23% for 5-9 years<sup>13</sup>.

One of the key things that carers say will assist them to maintain their caring role is the availability of a break. The Carers at Breaking Point report (2019) found that “69% of carers said that a carers break had had a positive impact with their health and wellbeing improving as a result”<sup>14</sup>. The State of Caring report shows that just over 40% of carers said that they had not taken a break from their caring role in the last year<sup>15</sup>. When asked what they would like to do with their break carers said:

- Taking part in hobbies and leisure (63%)
- Spending time with other family and friends (52%)
- Catching up on sleep (50%)
- Pampering themselves (38%)
- Completing practical tasks (37%)
- Attending their own medical appointments (33%)
- Studying or attending training (22%)<sup>16</sup>

Many carers report facing difficulties in getting NHS treatment with 34% of respondents to the State of Caring report waiting for specialist treatment of assessment for over a year. 67% of those waiting for treatment said that this was having a negative impact on their physical or mental health.

In the State of Caring report the highest level of carers’ needs were reported among carers with mental health needs of their own, among carers from Asian/British Asian Communities, carers under the age of 64 and among those caring for 15-20 years. The vast majority of carers in the country are not in touch with social services.

## 1.2 Who are carers supporting?

The Office of National Statistics article [Living longer: caring in later working life](#) suggests that “the type of person being cared for largely determines both the level of caring intensity, and whether they live with the caregiver”<sup>17</sup>. Caring for parents and caring for grandchildren are both likely to involve few hours of caring and carers are less likely to live with the person they are caring for. However “a child requiring care from parents” who are aged 50+ “is likely to be an adult child with a disability, which both prevents them from living independently (73% of children receiving informal care live with their caregiver) and requires intensive levels of care (63% care for 35 or more hours per week)”<sup>18</sup>. For those caring for a spouse “the intensity of care associated with [this] is more evenly distributed than for other types of care”<sup>19</sup>.

<sup>13</sup> Carers UK [State of Caring Report 2022](#)

<sup>14</sup> Carers UK (2019) [Carers at Breaking Point](#), page 6

<sup>15</sup> Carers UK [State of Caring Report 2022](#)

<sup>17</sup> Office of National Statistics (2019) [Living longer: caring in later working life](#), page 8

<sup>18</sup> Office of National Statistics (2019) [Living longer: caring in later working life](#), page 9

<sup>19</sup> Office of National Statistics (2019) [Living longer: caring in later working life](#), page 9

There is still a stigmatisation of drug and alcohol use and mental illness that may mean that carers are not coming forward to access support<sup>20</sup>.

People caring for those with dementia can often experience their own set of challenges. “As the illness progresses the caregiving burden grows, and the relationship with the care recipient becomes increasingly strained, often resulting in communication problems and conflicts. Social isolation follows. Eventually, many dementia carers need professional help from care services and rely on them to an increasing extent”<sup>21</sup>.

### 1.3 Carers and gender

As mentioned above 59% of carers are female and 41% are male. “The percentage of carers who are female rises to 60% for those who are caring for 50 hours or more a week”<sup>22</sup>. Caring responsibilities tend to affect men and women at different times with women being more likely to care in middle age and therefore having to balance work with caring responsibilities – almost one in four of female workers and one in six of male workers<sup>23</sup>.

Research by the office of national statistics suggests that when a care need arises it is typically the wife (rather than the husband) who will provide it however when it is the wife who requires care there is often nobody other than the husband who can do this. Male carers are therefore more likely than women to care for a spouse<sup>24</sup>. According to Care UK “women have a 50:50 chance of providing care by the time they are 59 compared with men who have the same chance by the time they are 75 years old”<sup>25</sup>. Women are also more likely to juggle multiple caring roles. Almost one third (29%) of female carers provide care for multiple types of people<sup>26</sup> and women are much more likely to be sandwich carers (those who care for both sick, disabled or older relatives and dependent children). As a result women are much more likely to give up work in order to care<sup>27</sup>.

Male carers often seek help differently to female carers tending to focus on “functional tasks and refraining from showing emotions, this despite reporting similar carer burden”<sup>28</sup>. Study findings also suggest that “opportunities for social interactions gradually ‘dwindled’ due to a reluctance by older male care-givers to leave their spouse/partner at home alone, to accept offer of help or respite, or to attend social events without their spouse/partner”<sup>29</sup>.

### 1.4 Carers and age

<sup>20</sup> " Chan, C.K., A. Barnard, and Y.N. Ng, *Who Are Our Support Networks?*" *A Qualitative Study of Informal Support for Carers*, Journal of Social Service Research, 2021. **47**(2): p. 265-275.

**Chart 1: Provision of unpaid care by age group, UK**

**Source: The Health Foundation 2023**

The number of carers aged over 65 is increasing more rapidly than the general carers population which is inline with overall population changes and this happens there will be an increased need for informal care and also an increased need for older people to stay in work longer<sup>30</sup>. The increasing state retirement age is also leading to more people needed to juggle work.

As the UK population gets older, an increasing number of workers are providing care towards the end of their working life for family members. One in four older female workers, and one in eight older male workers, have caring responsibilities<sup>31</sup>. As people are living longer they are increasingly likely to have a living parent and/or a grandchild and provide informal care for both. Nearly three in five carers in England and Wales are aged 50 year and over and one in five people aged 50 to 69 years are informal carers. There is an increasing prevalence of 'sandwich carers' (2.4 million in the UK) – those looking after young children at the same time as caring for older parents. It can also be used much more broadly to describe a variety of multiple caring responsibilities for people in different generations.

Overall, parents are the most common recipient of care by those of older working ages. People caring for parents are more likely to be in work than people caring for any other type of person<sup>32</sup>.

### 1.4.1 Young carers

The 2021 Census reported 120,000 young carers (aged five to 17) in England however Carers Trust and others think there is significant under-reporting with some [studies](#) suggesting the figure is as high as 700,000 UK-wide. On average, young carers are caring for three years before being identified. [Multiple research studies](#) have found that young carers have poorer physical mental health, compared to their peers- but more research is needed. [The COVID Social Mobility and Opportunities Study](#) found young carers are more likely to report psychological distress, self-harm and make attempts on their life and the [According to the Me-We Young Carers project](#) found that about three in ten adolescent young carers in the UK think about self-harming, and more than ten per cent contemplate harming others.

The Children's Society report that as many as 800,000 young carers, aged 5-17, care for an adult in England. However some studies suggest that this number could be closer to 3 million children who "live in households with a disabled family member but not all of these will have caring responsibilities"<sup>33</sup>. According to Carers UK "the vast majority are providing under 20 hours of care a week, however thousands provide even higher levels"<sup>34</sup>. This difference means that there is variance in how caring responsibilities impact upon the young person. "There is a big difference between a child helping parents to bathe a disabled brother or sister and being the sole support for a lone parent with a severe mental health condition"<sup>35</sup>.

### 1.5 Carers and ethnicity

The Carers Trust report showed that only 19% of unpaid carers from Black, Asian and minority ethnic communities said they felt listed to by the UK government compared to 39% of white unpaid carers<sup>36</sup>. The report also shows that people from ethnic minority backgrounds received less support having had to find information for themselves and being unaware of any support they were able to receive. A lower percentage of ethnic minority carers said they received any statutory services than white carers<sup>37</sup>.

### 1.6 Carers and health

According to the Care UK report those providing high levels of care are twice as likely to be permanently sick or disabled with carers reporting that caring results in a "negative and often long-lasting impact on their physical and mental health"<sup>38</sup>. In 2019 the GP Patient Survey found that carers are more likely to report having a long-term condition or disability themselves compared to the general population (63% vs 51%)<sup>39</sup> and the NHS Information Centre Survey of Carers in Households reported that 27% of carers were in receipt of benefits due to their own health<sup>40</sup>. Carer ill health is also a factor in whether or not carers

<sup>33</sup> Becker, Dearden and Aldridge (2001) 'Children's labour of love? Young carers and care work' in 'Hidden Hands: International perspectives on children's work and labour' cited in Carers UK [Policy briefing August 2019](#)

<sup>37</sup> Carers Trust, September 2023 [Adult Carer Survey Report 2023: "Unpaid carers are not unsung heroes. We are forgotten, neglected and burnt out"](#)

<sup>38</sup> Carers UK [Policy briefing August 2019](#), page 6

<sup>39</sup> NHS England (2019) [GP Patient Survey 2019](#)

<sup>40</sup> NHS Information Centre for Health and Social Care (2010) [Survey of Carers in Households 2009-2010](#)

are likely to be in paid employment (18% of disabled carers compared to 33% of non-disabled carers) or whether the carer was likely to give up work (61% of disabled carers compared to 52%). Further carers who themselves have long-term conditions are more likely to be in debt and report their financial situation as affecting their health<sup>41</sup>.

Although the causes of long-term conditions in carers are varied Carers UK report that:

- 72% of carers responding to the survey said they had suffered mental ill health as a result of caring.
- 61% said they had suffered physical ill health as a result of caring
- 8 in 10 people caring for a loved one said they have felt lonely or socially isolated.<sup>42</sup>

Increasing hours of care often results in the general health of carers deteriorating incrementally. Unpaid carers who provide high levels of care for sick, or disabled relatives and friends, are more than twice as likely to suffer from poor health compared to people without caring responsibilities, with nearly 21 percent of carers providing over 50 hours of care, in poor health compared to nearly 11 percent of the non-carer population<sup>43</sup>.

Caring responsibilities can have an adverse impact on the physical and mental health, education and employment potential of those who care, which can result in significantly poorer health and quality of life outcomes. These in turn can affect a carer's effectiveness and lead to the admission of the cared for person to hospital or residential care<sup>44</sup>. The State of Caring Report (2019) states that "when asked how they expect their quality of life to change over the next year, 11% of carers said they expected it to get better, 45% expected it to get worse and 44% expected it to stay the same"<sup>45</sup>.

Carers attribute their health risk to a lack of support, with 64 percent citing a lack of practical support<sup>46</sup>.

The Carers Survey 2018-2019 reported that "60.6% of carers reported that caring had caused them feelings of stress, compared with 58.7% in 2016-17. This was a significant increase"<sup>47</sup>. The percentage of carers who reported feeling depressed increased from 43.4% to 45.1% and those reporting feeling tired rose from 77.6% from 76%. 66% said they experienced disturbed sleep, an increase from 64%.

Oxford Brookes University report that "as the intensity of a caring role increases, so the mental and physical health of the person doing that caring often decreases"<sup>48</sup>. They state that "informal carers are 2.5 times more likely to experience psychological distress than non-carers; working carers are two to three times more likely to suffer poor health than those without caregiving responsibilities"<sup>49</sup>. 24.5% of carers compared to 19.6% of non-carers report a score of 4 or above on the General Health Questionnaire which looks at screen

<sup>49</sup> Oxford Brookes University (2019) [Nottinghamshire County Council: Reducing Older People's Need for Care – Exploring risk factors for loss of independence](#), page 17

individuals for minor psychiatric disorders in the general population. This score indicates that carers are more likely to experience mild or moderate anxiety or depression than those who are not carrying out a caring role<sup>50</sup>. Interestingly, the scores do not directly correlate to the amount of caring hours provided:

Hours spent caring	GHQ Score <sup>1</sup>	
	0 to 3	4 to 12
0 to 4	82.5%	17.6%
5 to 9	77.6%	22.4%
10 to 19	77.8%	22.2%
20 to 34	67.2%	32.8%
35 to 49	68.7%	31.3%
50 to 99	70.2%	29.9%
100+	66.8%	33.2%
<b>Average</b>	<b>77%</b>	<b>23%</b>

**Table 3: General Health Questionnaire scores by hours of care provided**

**Source: Office of National Statistics (2020) [Characteristics of unpaid carers](#)**

Carers also report that the impact on their health continues after their caring role has ended with a third (35%) of former carers stating that their mental health had got worse since their caring role ended, 20% said they were struggling to make ends meet and 35% saying that their financial situation had got worse since caring ended. Former carers also said that more support would have been beneficial when their caring role ended, including support with bereavement and support with resuming paid employment<sup>51</sup>.

## 1.7 Access to healthcare

According to the Carers UK policy briefing (2019) the impact of caring on health is “often exacerbated by carers being unable to find time for medical check-ups or treatment, with two in five carers saying that they were forced to put off treatment because of their caring responsibilities”<sup>52</sup>.

Macmillan report that 70 percent of carers come into contact with health professionals, yet health professionals only identify one in ten carers with GPs, more specifically, only identifying 7 percent<sup>53</sup>. Further 66 percent of carers feel that healthcare staff don’t help to signpost them to relevant information or support, and when information is given, it comes from charities and support groups.<sup>54</sup>

Carers Trust report that 36% of people disagreed or strongly disagreed that the NHS understands their caring responsibilities<sup>55</sup>.

<sup>50</sup> Office of National Statistics (2020) [Characteristics of unpaid carers](#)

<sup>55</sup> Carers Trust, September 2023 [Adult Carer Survey Report 2023: “Unpaid carers are not unsung heroes. We are forgotten, neglected and burnt out”](#)

## 1.8 Utilisation of technology and adaptations to support the caring role

The State of Caring Report (2019) found that:

- 19% of carers who said that they used technology used remote monitoring and alerts such as motion sensors, falls detectors, personal alarms or GPS trackers
- 12% use medication management tools
- 8% use environmental monitoring such as heating and lighting, door video systems or smart appliances
- 13% use monitoring for blood pressure, blood glucose and heart rate monitors
- 4% of carers use apps for things such as pain management, mood management and care coordination.

Research has found that “carers can ... benefit significantly from the provision of home adaptations – reducing their care giving hours by up to 60%”<sup>56</sup>.

The 2019 State of Caring Report asked carers about the use of technology to support their caring role. 79% of respondents said they used some form of technology with 88% using it as a source of information and 44% using it as some form of communication or online support.

Research shows that “many carers are realising the benefits of everyday technology to help deliver care”<sup>57</sup>. However, “many barriers to digital technology use remain, including a lack of ongoing technology support”<sup>58</sup>.

## 1.9 Social isolation

One of the key concerns for many carers is the impact their caring role has on their relationships with friends and family and the feelings of social isolation this can lead to. Such feelings can have a significant impact on the mental wellbeing of carers.

The article [Living longer: caring in later working life](#) from the Office of National Statistics reports that “for men, loneliness is far lower for workers than non-workers, regardless of whether they provide care”<sup>59</sup>. Men who give up work to fulfil their caring role are therefore more likely to report feelings of loneliness and social isolation than their female counterparts. It is thought that this may be because men generally work full-time throughout their careers whereas women are more likely to work part-time, have wider social networks and may have had a break when raising families.

## 1.10 Physical activity

---

<sup>56</sup> Oxford Brookes University (2019) [Nottinghamshire County Council: Reducing Older People’s Need for Care – Exploring risk factors for loss of independence](#), page 69

<sup>58</sup> Egan, Kieren J et al. *Understanding Current Needs and Future Expectations of Informal Caregivers for Technology to Support Health and Well-being: National Survey Study*. JMIR Aging. 2022, . 5(1): e15413.

<sup>59</sup> Office of National Statistics (2019) [Living longer: caring in later working life](#), page 10

Whilst research shows that exercise can be an effective health-promotion strategy to improve the physical and mental health of informal care givers<sup>60</sup> many carers (81%) report that “they are not able to do as much physical exercise as they’d like to do”<sup>62</sup>. Physical activity can have a huge impact on mental as well as physical health. Taking part in physical activities can also help to reduce loneliness and social isolation.

### 1.11 Key inequalities

Carers experience a range of difficulties as a result of their caring role including mental and physical health concerns, social isolation and lowered social functioning, and increased mortality as a result of mental or emotional distress, especially in more elderly carers. The Government White Paper ‘Healthy lives, healthy people’ highlights carers as a group who experience health inequalities.

Carers can also end up as patients or requiring care and support, therefore it is important to provide adequate support to enable carers to maintain their own health whilst providing care. However the State of Caring Report 2019 found that only 21% of carers either buy or receive support. The type of support carers say they have purchased are:

- Equipment 48%
- Help from friends or family 31%
- Technology (e.g. alarms, sensors or remote monitoring to help with caring) 26%
- Practical support from care workers 26%
- Motability vehicle 21%
- Carers break 15%
- Day centre 11%
- Help with household chores 11%
- Help managing or coordinating care 4%<sup>63</sup>

68% of carers report using their own money to purchase this support, 6% reduced the amount of care because of increased costs and 5% reduced the amount of care as the personal budget for the person no longer covered it.

82% of carers said the impact of caring on their physical and mental health would be a challenge over the coming year, an increase from 77% last year and 54% of carers said their physical health had suffered, and 22% said that caring had caused them injuries<sup>64</sup>.

One of the key inequalities faced by carers is financial. Families often fund care costs, equipment, higher energy and laundry bills etc. all at a time when the carer may have given up paid employment to carry out their caring role. Carers UK (2019) report that 22% of carers live in poverty compared to a national figure of 16%<sup>65</sup> and that these poverty levels

<sup>60</sup> Prieto-Prieto, J., et al., *Effects of a Home-Based Exercise Program on Health-Related Quality of Life and Physical Fitness in Dementia Caregivers: A Randomized Controlled Trial*, International journal of environmental research and public health, 2022, 19(15)

<sup>61</sup> Madruga, M., et al., *Effects of a home-based exercise program on mental health for caregivers of relatives with dementia: a randomized controlled trial*, International psychogeriatrics, 2021. **33**(4): p. 359-372

<sup>62</sup> Carers UK (2019) [State of Caring Report](#), page 22

<sup>63</sup> Carers UK (2019) [State of Caring Report](#), page 8

<sup>64</sup> Carers UK (2023) [State of Caring Report](#), page 8

<sup>65</sup> Carers UK [Policy briefing August 2019](#), page 9

are higher in the working age population. Further 39% of carers say that “they are struggling to make ends meet, and over two thirds report that they regularly use their own income or savings to pay for care or support services, equipment or products for the person they care for”<sup>66</sup>. Carers UK report that “caring can come as a shock and families, unprepared for the impact on their work and household bills”<sup>67</sup>, something which is likely to be increasingly the case during current COVID-19 measures. These financial difficulties can often worse as the person being cared for lives in the same household and has also had to give up work due to their ill health. The State of Caring Report (2019) found that of those struggling financially:

- 44% are relying on their savings
- 36% are using credit cards
- 33% are using their bank account overdraft
- 15% are in arrears with their utility bills
- 9% are in arrears with their mortgage or rent

Additionally

- 81% of carers report cutting back on luxuries
- 47% have had to cut back on essentials like food and heating
- 77% have cut back on hobbies
- 64% have cut back on seeing friends and family
- 14% have cut back on support services to help with caring
- 6% of those struggling have used foodbanks
- 3% have used payday loans

In addition to the financial difficulties already faced by carers the cost of living crisis has led to “exacerbated inequalities” for caring and in accessing support services<sup>68</sup>.

The Public Health England 2021 *Caring as a social determinant of health* shows that the majority of care recipients of unpaid care are older parents and partners and that changes in the make up of the population estimate that the number of dependent older people in the UK will increase by 113% by 2051. The report states that the “support provided by carers is often physically and emotionally demanding, with consequences for the carers own health and wellbeing”<sup>69</sup>. The main findings of the study were that:

- There is mounting evidence that unpaid caring should be considered a social determinant of health.
- carers experience poor physical and mental health but also have unmet care needs themselves.
- different groups of carers may have different support needs.
- a lack of clear and robust evidence about how best to support people caring for older populations, and gaps in evidence on key outcomes<sup>70</sup>.

<sup>70</sup> Public Health England, 19 March 2021 [Caring as a social determinant of health: review of evidence](#)

## 1.12 Employment

Around 5 million people are carrying out their caring role alongside paid employment (approximately 1 in 7 of the UK workforce) however many of these (around 600 people every day) will give up work as caring demands and pressures mean that maintaining employment is unfeasible. Additionally, 2 million report having reduced their working hours due to caring responsibilities. According to the Carers UK Policy Briefing (August 2019) “carers managing to juggle work and care describe having to forgo promotion or miss job opportunities because they cannot increase working hours or move to take up a new position”<sup>71</sup>. Figures obtained by the Office of National Statistics show that 52% of carers are in employment and that the number of people in paid employment decreases in relation to the amount of time spent in the caring role:

Hours spent caring	Economic Activity			
	In Employment	Unemployed	Inactive	Total
0 to 4	64.4	2.1	33.4	<b>100.00</b>
5 to 9	63.5	2.8	33.7	<b>100.00</b>
10 to 19	57.5	3.1	39.4	<b>100.00</b>
20 to 34	51.6	3.5	44.9	<b>100.00</b>
35 to 49	33.2	6.5	60.3	<b>100.00</b>
50 to 99	28.6	1.7	69.6	<b>100.00</b>
100+	16.2	2.3	81.5	<b>100.00</b>
<b>Total</b>	<b>51.9</b>	<b>2.8</b>	<b>45.3</b>	<b>100.00</b>

**Table 4: Economic Activity of Carers by Hours of Care Provided**

**Source: Office of National Statistics (2020) [Characteristics of unpaid carers](#)**

This impact on employment also has financial consequences which can lead to poorer health outcomes for both the carer and cared for. 1 in 3 report having seen a drop of £20,000 per year as a result of caring responsibilities<sup>72</sup>. In addition to the financial impact of stopping work is the effect on loneliness and subsequent mental health difficulties. Going to work can often provide a welcome break for carers and help them to retain social connections. The recent move to home working as a result of COVID-19 has also seen similar impacts.

The impact of giving up work to provide care can have long term repercussions. Those who have a break from their careers to undertake their caring role may experience “a loss of skills, knowledge, experience and confidence making returning to work when caring ends extremely challenging”<sup>73</sup>.

People in their 40’s-60s are more likely to caring out caring responsibilities than at any other time thereby coinciding with what is usually the peak of a person’s career. However older workers will increasingly have caring responsibilities both for carers, grandchildren and other family members. Older workers who are women are far more likely than men to work part-time, and women who are carers are much more likely to combine work alongside their

<sup>71</sup> Carers UK (2019) [Policy briefing](#), page 14

<sup>72</sup> Carers UK (2014) [Caring and Family Finances Inquiry UK Report](#)

<sup>73</sup> Carers UK (2019) [Policy briefing](#), page 14

caring role than men who are carers.. Almost two-thirds (62%) of women in employment work part-time compared with less than one-quarter (24%) of men<sup>74</sup>.

Studies have shown that both men and women who have had periods of unemployment and/or worked part-time in the past are more likely to provide care<sup>75</sup>. Research has also shown that those who have caring responsibilities are more likely to be in low-skilled, administrative or service-oriented jobs<sup>76</sup>. This research also showed that whilst in many cases the amount of time a person has available to work is directly affected by their caring role and vice versa there are a significant number of people who are working full time alongside a full caring week. According to the report “21% of people are providing 35 hours of care or more per week were in full-time work over the three years to 2013/2014”<sup>77</sup>. Further “the loss of earnings, savings and pension contributions can mean carers face long-term financial hardship into retirement”<sup>78</sup>.

Almost two-thirds (64%) of people caring for parents are in work<sup>79</sup>. The need for care for parents is likely to increase as the age of the population increases. As such people in their 50’s and 60’s will increasingly likely to have living parents who may develop care needs<sup>80</sup>. High levels of employment for people who care for parents may be possible due to the relatively low number of hours people spend caring for a parent<sup>81</sup> however when those who gave up employment or reduced their working hours were asked about the reason most stated that it was due to “problems accessing suitable care services”<sup>82</sup>. Many of the issues relate to the inflexibility of the services to fit with working hours, the unsuitability of support to meet the needs of the person they are caring for, the unreliability of support which can lead to difficulties with employment or that the cost of care is too expensive<sup>83</sup>. There are however additional barriers with 40% of carers saying that “the person they care for is unwilling to accept replacement care”<sup>84</sup>.

There are particular difficulties faced by working carers which include “lack of time, restricted opening hours, excessive stress and resulting health problems, family conflicts, work-related conflicts and financial pressures”<sup>85</sup>.

### 1.13 Carer assessments

The Carers Trust report that under half of unpaid carers (43%) said that in the last year, they had an assessment, review or reassessment of their needs as an unpaid carer<sup>86</sup>.

## 1.14 Carer breaks

Respite day care interventions are effective in reducing caregiver stress and depression in family carers of vulnerable older adults (with dementia, mental health problems, physically frail)<sup>87</sup>. However a 2023 Carers Trust report that only 32% of carers said they could access a break from their caring role whenever they needed<sup>88</sup>.

A meta-analysis of caregiver interventions found respite/day care interventions to be effective in reducing caregiver depression in family carers of vulnerable older adults (with dementia, mental health problems or who were physically frail).<sup>89</sup>

A two year study to investigate value/effectiveness in three models of day care services for physically frail older people drew its findings from a qualitative analysis of the views and experiences of service users and professionals, together with information relating to costs. settings were compared: i) Social Services funded day centre for older people with mixed physical and mental disabilities, with a goal to provide social activity and carer relief; ii) an NHS outreach service for older people with complex rehabilitation needs, and iii) a traditional, purpose-built NHS day hospital. The indicators of 'value' used collectively describe the aspects of the service which were most valued by the main stakeholders i.e. day care attendees, their carers and the service providers. This approach overcame problems of the usual definitions of effectiveness as implied by outcomes measurement questionnaires and problems of inconsistency in goal setting and review. The key features of value were rated on a five point scale ranging from very low to very high. day centre scored as follows:

- Very high:
  - social interaction
  - friendly environment
  - carer relief
  - person centred involvement in decision-making
- High:
  - maintenance of independence
  - positive framing of life
- Median:
  - home focused
- Low:

<sup>87</sup> Age UK (2011) [Effectiveness of day services: Summary of research evidence](#), page 5

<sup>89</sup> Age UK (2011) [Effectiveness of day services: Summary of research evidence](#), page 15

- mobility health-care screening<sup>90</sup>

Carers value breaks for a wide range of reasons – practical, emotional, social and psychological. For some, the break has value beyond the allotted time: ‘to look forward to a break has the same effect as the break itself’. It’s important to think about whole family approaches and breaks as ‘a break from the caring routine’, not just time away from the person. Some carers prefer a break that is about being with the person they care for, or as a whole family, but not having to do all the caring. Breaks can play a vital preventive role, sustaining the caring relationship and preventing carer stress, crisis and breakdown. There are key points where, if practical support and information had been provided, the impact of caring may be reduced. Breaks can reduce loneliness and isolation, enabling the carer (and the person they care for) to stay connected to family, friends and things they enjoy<sup>91</sup>.

When asked what type of breaks they wanted carers said:

“More choice and control for carers over the type of break they take. Everyone’s needs, preferences and situations are different, so carers want a range of breaks available. Flexibility and a mix of settings are important – residential, in the home, out of the home, day services with good activities, for example”<sup>92</sup>.

### 1.15 Impact of Covid-19

Covid-19 and it’s resultant lockdowns had a huge impact on carers, particularly as support services and respite options became unavailable and many more carers took on the caring role for the first time. During the pandemic there is evidence that carers who are “lesbian, gay and bisexual carers were more likely to be struggling financially, more anxious about their current financial situation, more likely to feel lonely, more likely to have poorer mental health and less likely to access certain services”<sup>93</sup>. Additionally during the pandemic “parents with disabled children consistently experienced significantly lower levels of mental wellbeing, and higher levels of social isolation, anxiety and stress, compared with the general population”<sup>94</sup>.

### 1.16 Impact of the caring role

---

<sup>90</sup> Powell, J, Bray, J, Roberts, H , Goddard, A and Smith, E, Goal negotiation with older people in three care settings, Health and Social Care in the Community 8(6), 380-389 60 and Powell, J and Roberts, H, Identifying „value“ in day care provision for older people, The Journal of the Royal Society for the Promotion of Health, Sept 2002, Vol 122, No. 3

<sup>91</sup> [SCIE](#)

<sup>92</sup> [SCIE](#)

<sup>93</sup> Carers UK, September 2022 [The experiences of lesbian, gay and bisexual carers during and beyond the COVID-19 pandemic](#)

<sup>94</sup> Disabled Children’s Partnership, July 2022, [Unseen and Unheard The impact of the Covid-19 pandemic on disabled children and their families from black and Asian ethnic minority backgrounds](#)

The Carers Trust Report 2023 reveals that 45% of carers feel that they don't get enough support, while 41% have seen their caring hours rocket in the past year<sup>95</sup>. The report also highlights how women, those from poorer backgrounds, carers from Black, Asian and minority ethnic communities, LGBT+ carers and older unpaid carers experience additional barriers to support.

## 2. Size of the issue locally

### 2.1. Estimated total population who are carers

The 2021 Census data regarding carers, despite the impact of COVID-19 and estimates by Carers UK, the figures from this census shows that there has been an overall decrease in the number of carers in the previous decade by 8,526 across Nottinghamshire County. The latest census estimated that 41,649 carers providing between 1-19 hours of care per week – down by 15,777 since the 2011 Census. However, those carers providing over 50 hours of care per week has increased by 2,819 from 21,680 to 24,499.

The 2021 Census data highlights two district areas of Nottinghamshire that are ranked second and third highest in England, with the largest proportion of residents aged 5 years and over who provide any amount of unpaid care. These are Ashfield (11.6%) and Mansfield (11.5%).

In addition to the above, the percentage of the population who said they carry out caring tasks in Nottinghamshire (10.0%) is higher than the England average of 8.3%. There are approximately 6,000 carers in contact with Nottinghamshire County Council and 1800 with the Carers Hub (commissioned service). Carers assessments are undertaken for carers aged 6 – 96 years following a three-tiered conversation that aims to meet the carers need in the most timely and appropriate way possible. This may be signposting carers to other sources of support such as a condition specific charitable organisation, referring to services for training, making referrals to the Benefits Team or signposting to a support group. Should these be unsuitable or not meet the presenting need a carers assessment will be offered.

A breakdown of the support provided to carers following contact with the Council between April and December 2023 can be seen in the table below:

Age Band	Direct payment		Information and advice		No direct support		Total carers
	No. of carers	%	No. of carers	%	No. of carers	%	
Under 18	336	61.88%	52	9.58%	155	28.55%	543
18-64	510	47.44%	138	12.84%	427	39.72%	1075
65-84	238	36.17%	101	15.35%	319	48.48%	658

<sup>95</sup> Carers Trust, September 2023 [Adult Carer Survey Report 2023: "Unpaid carers are not unsung heroes. We are forgotten, neglected and burnt out"](#)

85 and over	31	26.05%	20	16.81%	68	57.14%	119
<b>Total</b>	<b>1115</b>	<b>46.56%</b>	<b>311</b>	<b>12.99%</b>	<b>969</b>	<b>40.46%</b>	<b>2395</b>

**Table 1: Breakdown of support provided to carers in Nottinghamshire following contact with Nottinghamshire County Council (April-December 2023)**

## 2.2 Who is being cared for

As at national level the type of care being provided locally is varied depending on the needs of the individual being cared for. The greatest impacts of caring are often due to the amount of time spent in the caring role and the condition of the person being cared for. Table 2 below shows the split of primary support needs for the people carers are supporting who contacted the Carers Hub between October 2022 and September 2023. As can be seen approximately 36% of the caring population provide care to someone with memory or cognition needs.

<b>Cared for primary support need</b>	<b>Percentage of carers</b>
Physical – personal care support	8.24%
Physical – access and mobility	23.23%
Mental health support	9.06%
Social – substance misuse support	0.27%
Social – social isolation/other support	0.14%
Support with memory and cognition	35.69%
Learning disability support	5.38%
Sensory support dual impairment (visual and hearing)	0%
Sensory support for visual impairment	0.27%
Sensory support for hearing impairment	0%
Unknown	17.71%

**Table 2 Percentage primary support needs of people with carers taken from Census 2021 data**

## 2.3 Carers and gender

The Census 2021 data shows that in Nottinghamshire 59% of carers are female and 41% are male. These figures are in line with the national averages.

## 2.4 Age

As can be seen in the table below the highest rate of caring is carried out by those aged 50 to 64. This is likely due to this age bracket providing support to ageing parents with the second highest category being those aged 65 and over. When broken down further the majority of carers in Nottinghamshire are female aged 25-64 (42%) and are still likely to be working (either full or part-time) whilst providing care for both older relatives and children. These multiple roles may lead to physical and mental ill health if support is unavailable and/or women ceasing paid employment to fulfil their caring role.

Age	Number	Percentage
15 years and under	1126	1.37%
16 to 24	3692	4.50%
25 to 34	6868	8.38%
35 to 49	17642	21.52%
50 to 64	32190	39.26%
65 and over	20472	24.97%

**Table 3 Nottinghamshire carers by age taken from Census 2021 data**

**Figure 1 Hours of care provided by older adults in Nottinghamshire**

**Source: POPPI December 2023**

As can be seen from the chart above the majority of people aged 65-69 are providing relatively fewer hours of care per week than adults aged 70+. It is likely that this is due to people beginning to care for elderly parents at this time with fewer hours of care required. However, as people age they are more likely to care for partners or for people with increased care needs thereby increasing the amount of support required. This group of people are also getting older and are therefore likely to be at increased risk themselves from long-term conditions, injuries associated with caring or beginning to require support in their own right.

## 2.5 Ethnicity

Nottinghamshire has a relatively low proportion of carers from minority ethnic communities (4.5% compared to the national average of 15%) and this can be seen reflected in the figures below taken from the 2021 Census.

Ethnicity	Percentage of carers in Nottinghamshire	Percentage of carers nationally
Asian/Asian British	2.07%	7.23%
Black/Black British	0.84%	3.06%

Mixed or multiple ethnic groups	1.11%	1.82%
Other ethnic group	0.47%	1.64%
White	95.50%	86.24%

**Table 4 Ethnicity of carers in Nottinghamshire taken from Census 2021 data**

## 2.6 Health issues

In the 2021 Census carers reported on their own health. Whilst 71% of carers reported their health and being very good or good 29% said that their health was either fair or bad.

Reported health	Percentage of Nottinghamshire carers	Percentage of carers nationally
Very good or good health	70.79%	71.95%
Fair health	21.88%	20.86%
Bad or very bad health	7.33%	7.19%

**Table 5 Nottinghamshire carers self-reported health taken from Census 2021 data**

The Adult Social Care Outcomes Framework (ASCOF) 2021-22 reports that Nottinghamshire carers rated their quality of life in 2021/22 as 7.0 compared to an East Midlands average of 7.1 and a national average of 7.3. Carers also report having less social contact than they would like with a local percentage of 22.7 saying they had as much social contact as they would like versus an East Midlands average of 26.6% and a national average of 28%.

## 2.7 Employment

The 2021 Census revealed that over 50% of the caring population in Nottinghamshire are in employment with a further 2% being in full time education and therefore juggling their caring role alongside other demanding responsibilities.

Employment status	Percentage of Nottinghamshire carers	Percentage of carers nationally
Employed	50.38%	49.76%
Unemployed	46.06%	45.55%
Students	2.19%	3.01%
Does not apply	1.37%	1.68%

**Table 6 Number and percentage of Nottinghamshire carers in employment taken from Census 2021 data**

## 2.8 Risk factors

We know that effective support for carers is a key factor in maximising independence and that that Carer breakdown is a key factor in the use of both short term and long-term care.

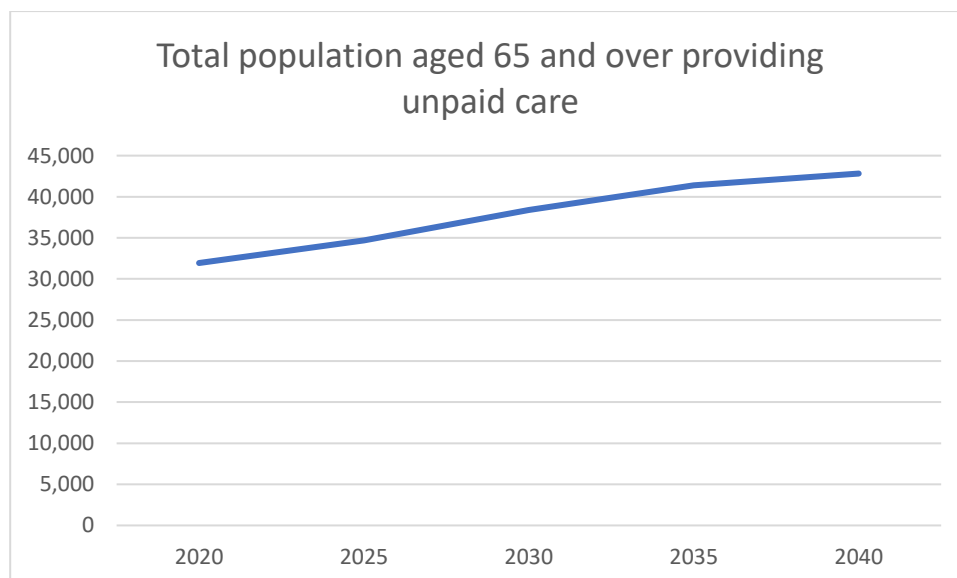

## 2.9 Future projections

In line with national figures projections for Nottingham and Nottinghamshire show an anticipated increase in people aged over 65 carrying out caring roles over the next 15 years. The anticipated increase is approximately 30% (just under the England average expected increase of 34%). As the number of older carers increases it is likely that they will have their own support needs that will need to be considered alongside their willingness and ability to carry out their caring role. Support for them will be of great importance to ensure that carer breakdown does not occur leading to more costly (and sometimes least appropriate) other forms of care.

Numbers of carers are likely to increase due to:

- an ageing population
- an increase in the number of people living with a limiting lifelong illness or disability
- changes in family life
- increased numbers of single-member households
- geographical dispersion within families
- increased awareness of young carers (in 2023 Carers UK estimated there to be 800,000 young carers in the UK)
- more children qualifying as a young carer, following the implementation of the Young Carers (Needs Assessment) Regulations 2015.

**Figure 2: Projected increase in older adults providing care in Nottingham and Nottinghamshire to 2040**

**Source: POPPI February 2023, national prevalence model applied to ONS population predictions**

### 3. Targets and performance

---

In line with Nottinghamshire County Council's conversational approach the target for carers is to resolve needs as quickly as possible (early resolution) so that support can be provided before crisis point and in a timely manner. In most cases this will involve information, advice and connecting to existing sources of support. For those where this is not a suitable solution, or who have greater needs, a carers assessment will be offered. For carers who have a carers assessment there are three outcomes:

1. Not eligible for paid support – carers will be provided with information for alternative sources of support.
2. Require immediate one-off support – this may be the provision of a piece of equipment for example to assist with their caring role
3. Ongoing support required – these carers will require on-going paid for support to help them to maintain their caring role.

Carers who are eligible for support following assessment may also be entitled to short-breaks.

In order to achieve the aims of the early conversation approach the Carers Hub are supporting carers to meet their needs at an early stage through a range of support mechanisms which has led to a reduction in the number of carers going on to require a statutory carers assessment as can be seen in the graph below:

**Figure 3: Number of carers assessments and Carers Hub registrations**

This graph shows that as the number of new registrations with the Carers Hub has increased the number of carers requiring statutory assessments has decreased meaning that carers are supported through early intervention and community support.

The Adult Social Care Outcomes Framework (ASCOF) measures how well care and support services achieve outcomes which matter most to people. Nottinghamshire scores lower than the East Midlands average for the 2021/22 report as can be seen in the table below:

	East Midlands	Nottinghamshire
Proportion of carers who reported that they have as much social contact as they would like	26.6	22.7
Carer reported quality of life score	7.1	7.0

**Table 7 Adult Social Care Outcomes Frameworks scores 2021/22**

From this data it is clear that more support is required to enable carers to participate in social contact.

#### 4. Current activity, service provision and assets

##### 4.1 Adult social care

The primary support route for carers in Nottinghamshire is via the Carers Hub where carers are assessed for their needs and supported at the earliest opportunity to prevent a crisis from occurring. Where carers require additional or ongoing support carers will be referred to Adult Social Care for a statutory carers assessment.

Between April 2023 and November 2023 Adult Social Care have carried out 1560 carers assessments and have supported carers to access a range of services as shown in the table below.

	Adult Carers Direct Payment	Personal Health Budget	Regular Direct Payment	Young Carers Direct Payment
<b>Total Carers</b>	<b>838</b>	<b>238</b>	<b>2</b>	<b>340</b>

**Table 8 Types of support received by Nottinghamshire carers April 2023 to November 2023**

As can be seen the majority have carers have their needs met via a personal budget.

##### 4.2 Commissioned services

Carers services have been recently recommissioned with new services commencing in October 2023. The new service specifications were coproduced with carers to ensure that services were available to meet their needs. Available data is from the previous service offer.

##### 4.2.1 Carers Hub

The Carers Hub service is designed to be the first point of contact for all carers across Nottingham City and Nottinghamshire County. The Hub offers information, advice and connecting to other sources of support as well as running a series of support groups, carrying out an assessment of carer needs, supporting carers to think about the future and contingency plan, supporting mindfulness and wellbeing and working with the Young Carers Service and Adult and Children's social care to support carers as they move from children's to adult's services. The Hub also provides support to GP practices and social care to help with the early identification of carers and distribute a grant to support independent groups and organisations that support carers in their local communities. Additionally, the Carers Hub continues to

support Carers once their caring role has changed or ended to provide ongoing support. Between April 2018 and March 2022, a total of 4,989 carers registered to receive information, advice and support from the Carers Hub service in Nottinghamshire. During this four year period an average 1,247 carers were identified each year. Of these, 86% of carers are from a white British background, with less than only 5% of carers identified being from a Black, Asian and Minority ethnic background. Out of the seven districts and boroughs in the county, most carers registered were from the Ashfield district at 16%, the lowest being the Bassetlaw district at 10.9%. The remaining five districts and boroughs were between 11% and 15%. Carers accessing the service who live outside of the county (but provide care to a carer who lives in the county) is 4.9%. The age group of carers who accessed support the most is the 55-64 age range (late working age), with approximately 70% of those carers being female.

The top three most frequently reported conditions of the cared-for person are support with memory and cognition at 30% followed by physical access and mobility at 27% and personal care support at 16%.

#### **4.2.2 Young Carers Support services**

The Young Carers service supports young carers from 5-18 and works closely with the Carers Hub to support young carers as they transition to adult services. The Young Carers Hub carries out an assessment of carers needs, provides one-to-one support, group based support and activities and support to families. The service also supports carers to contingency plan and supports the work of health and social care to inform best practice. The Young Carers service also works closely with schools to support them to identify young carers and provide training around young carer support needs. From the period April 2018 and March 2022, the Young Carer Support service identified and registered 562 young carers. The service provided access to age-appropriate activities, support groups and one-to-one support to those registered carers. On average, 141 young carers were identified over this period. Most young carers (approximately 24%) were from the Ashfield area. Most young carers were from the age 9-13 age group (53.7%), followed by age 14-17 age group (32.9%). Nearly 61% of young carers in Nottinghamshire identified as female, with the remaining 39% of young carers identifying as male.

#### **4.2.3 Carers Engagement and Promotion**

The Engagement and Promotion Service supports organisations and communities to become carer friendly. They work with a range of employers to ensure carer-friendly workforces and recruitment practices and undertake consultation activities on behalf of the Council. The Engagement and Promotion Service also supports Carers Space which supports coproduction across the County. Since December 2019, the Carers Engagement and promotion service was commissioned to promote the awareness and interests of carers within employers, public facing organisations, GP practices, schools (for young carers) and encourage carer engagement and consultation activities and participation in the county. Contact with 30 employers was made with 5 signed up to a 'Carers Pledge', 61 GP Practices signed a 'Carers Pledge', and 78 GP Carer Awareness training sessions provided. A total of 54 schools engaged with the service, with 42 schools working towards a schools award. The number of carers taking part on consultations was 140.

#### **4.3 Carers support groups**

Around the county are several support groups with various focuses. For example some are generalist carers groups whereas others are condition specific, focus on supporting people from specific ethnic backgrounds, for those of specific ages (or supporting people who are)

or are locality based. Groups may provide a source of companionship assisting to reduce social isolation whereas others may focus on providing more practical support and information and advice to help with the caring role. Some groups are specifically for carers whereas others are for carers and the people they care for. A full list of local support groups can be found on the [NottsHelpYourself](#) website.

#### **4.4 Carer Involvement Groups**

There are a number of carers involvement groups and support groups that operate around Nottinghamshire. Some are run independently and others have support from the local Community and Voluntary Service, Nottinghamshire County Council's Coproduction Team and/or the Carers Engagement and Promotion Service. The groups meet to provide support, information and advice, share good practice and often feed into Council and ICB commissioning activities. Information regarding engagement groups and opportunities can be found on the [Carers Space website](#).

#### **4.5 Carers Breaks**

A carers break (also known as respite) is a break from the normal routine of caring. It is planned in advance and is not the result of an emergency or crisis in the home, or because of illness e.g. hospitalisation of the carer. Usually the carer is having a break from caring, but there may be some circumstances where the person being supported needs a break from the caring situation (even if the carer is not asking for a break). This could also count as a planned short break. The Carers UK State of Caring Report (2019) recommends that Local Authorities and the NHS "provide funding and choice of quality services to enable carers to take the breaks they need" and that "a choice of appropriate and good quality care must be available or carers cannot get the breaks they need for their own health and wellbeing"<sup>96</sup>.

Planned short break services are:

- focused on prevention; they will be designed to help people to stay at home, sustaining caring relationships and preventing crises
- designed to avoid social isolation for carers, so that they are not housebound by their caring role.
- provided as part of a coordinated programme to prepare people for a transition to full time formal care and support, where and when appropriate for each person

People and carers assessed as eligible for planned short break services will be offered a personal budget for provision of planned short breaks. The budget will be determined as part of the support planning. This can be taken as a managed service or direct payment but cannot be spent on any other form of service unless that is to give the carer an agreed additional break (e.g. extra day service).

##### **4.5.1 NHS Short Breaks**

---

<sup>96</sup> Carers UK (2019) [State of Caring Report](#), page 27

Locally, the Nottingham and Nottinghamshire ICB fund planned short breaks for carers. These are available to carers who are registered with a GP in Nottinghamshire and are commissioned in the carers name.

#### **4.5.2 NCC Short breaks for service users**

Nottinghamshire County Council are able to provide additional short breaks for those who are eligible where this is the most appropriate solution to meet the needs of the carer and the person they care for. These short breaks are commissioned in the name of the person accessing support.

#### **4.5.3 Carers respite service**

Short breaks are also available for carers who may not have had their needs assessed or their needs (or those of the person they support) do not meet eligibility criteria. The Carers Respite Service is able to offer 12 hours of replacement care over an 8 week period to support carers when they require a break.

#### **4.5.4 Admiral Nurses**

Along with ICS partners Nottinghamshire County Council are funding three Admiral Nurses to provide support to people with dementia and their carers. The Nurses provide specialist, ongoing support as required.

### **4.6 NottsHelpYourself**

[NottsHelpYourself](#) is a countywide website to provide information, advice and signpost to Nottinghamshire residents. There is an area dedicated to [Carers](#) on the website to provide information regarding available benefits and financial support, support groups and much more.

### **4.7 Other forms of support**

Other forms of support may include:

- Support groups for carers or to support them with the condition of the person they care for
- Access to health and leisure activities, sometimes at a reduced rate
- One to one support and guidance
- Direct payments for the carer to meet their assessed outcomes

We also work with a number of organisations and services to:

- Identify carers at an early stage in GP practices and schools
- Work with GP practices and schools to help them provide appropriate support once carers have been identified
- Engage with carers to improve services and provision of support
- Develop carer friendly communities and services

## **5. Local Views**

---

## 5.1 Strategy Development

Over the past two years Nottinghamshire County Council have been working closely with carers to coproduce the Nottingham and Nottinghamshire [All Age Carers Strategy](#). As part of the development carers were consulted on their views regarding the support they receive and that of the person they care for. A group of carers then went on to form part of the coproduction group that produced the strategy. Several common themes were identified as part of this work including:

- Accessing the right support for the cared for person
- Access to relevant and appropriate information, advice and guidance
- Access to short breaks or replacement care to get a break from caring
- Support for carer health and wellbeing – both mental and physical
- Being listened to and being able to access good communication and information from health and social care providers

Following the broader consultation a group of carers worked with Nottingham and Nottinghamshire Councils and the ICB to produce some 'I' and 'we' statements for what good care should look like. These included carers being identified at the earliest opportunity and information and support being provided when people require it as well as support to understand what a carer is. Carers want the right to an assessment of their needs and to tell their story once and they want to feel valued and listened to.

Carers want their needs and the needs of their families to be considered so that the impact on everyone can be recognised and carers stated that they need access to a range of respite options depending on their needs and circumstances.

Carers want to feel connected to other carers, sharing their experience and they want to be given a voice in making decisions regarding the person they are caring for. Carers want their wellbeing to be prioritised as well as that of the person they are caring for and to be seen as more than a caring, living a balanced life outside of their caring role.

Carers want to be able to take up education, employment and volunteering opportunities without their caring role impacting on these opportunities. Carers also noted the importance of being recognised and supported as a carer even after their caring role has ended or changed and to be supported to plan for these changes.

## 5.2 The Big Conversation

During February and March 2023 Adult Social Care held The [Big Conversation](#) to ask people who use social care and their carers about the vision, the challenges, and what they want in the future. 542 people and carers with lived experience got involved and shared their experiences and ideas. During these events carers shared the challenge of working from home if they were also caring for someone at home or if carers came in to provide support

and many people shared the financial challenges of being a carer and the impact on their home life.

Many people talked about the personal pressures of caring, and the impact on their health and wellbeing. Many people shared the need for a break. Some people talked positively about the support they receive. People talked about 'small things making a big difference', giving examples of individuals with a personal touch who visited and helped, especially over Covid. People shared negative experiences of arranging or having a carer assessment. Many people said they did not get support and others mentioned gaps in support for carers. People said that physical support is offered but not emotional and social support. People also spoke about the importance of peer support.

Some people talked about the lack of consistency of social workers and other advisers, and the real challenges this raised. Whilst some people talked about family and friends and how supportive they are many others said they felt lonely or isolated and that their caring role had impacted on their social and work life and connections. People also talked about the lack of time to meet people and do the things they enjoyed in communities and spaces that were welcoming.

People shared their concern about the future of the person they care for 'when something happens to me' and of their fear of 'doing something wrong'. Carers of people with dementia shared fears for the safety of the person.

Whilst most people felt they had the right information, many people did talk about information being unavailable or hard to find and that they were unable to talk to a person when they needed to. People also mentioned a lack of information about breaks from caring and respite.

People also said they need more help to understand money and benefits including around charging for care.

### **5.3 JSNA focus group**

A group of carers met with commissioners to talk about their experience of being a carer and what could be improved to support them further. Carers talked about how sometimes carers do not see themselves as carers and therefore don't seek support. People also raised concerns about not being seen as a carer if they don't live with the person they are caring for. Concerns were also raised regarding carers not being recognised if they were still working or that caring was their chosen 'job'.

Just as with The Big Conversation carers stated the importance of face-to-face support and that they wanted to feel listened to and valued. Carers often felt that they were being thought of as 'a pain' but that they are just wanting the best for the person they are support. There were also some concerns regarding a lack of follow up from social care which means that people don't always know what has taken place as a result of their assessment

particularly if they are placed on a waiting list for additional support. Carers also raised that the language used by professionals needs to be understandable and explanations provided. Carers also felt that social care staff need to have an understanding of the condition they are supporting and that this is unique to each person.

People told us that they don't know what is available or how to access services or support. Sometimes people can receive too much information which can be overwhelming and that they need the right information for their own needs. It can take a lot of time and energy and work out systems in order to get support which can often be a barrier. Carers also felt that they did not know about services until they reached a point of crisis however knowing about these in advance could have prevented this. Examples of this were financial support and housing.

Carers stated that access to services can often be problematic with services mainly operating 9-5 during the week when many carers also work. Care and support assessments often do not take into account things such as the number of appointments a person might need to attend which has an impact on work for the carer. Carers also felt there was no help with benefits or how to claim the support they were entitled to. Carers said that they needed a single point of contact and a named person to help them navigate services. This didn't necessarily need to be a social worker but could be someone from the Carers Hub or other services. Carers also felt that many people don't know that they have the right to an assessment or where to get one from.

Parent carers in particular report falling through the gap in terms of accessing assessments and support as it is often difficult to tell what is parenting and what is caring. Carers felt that thresholds for mental health services can sometimes be too high when providing support at an earlier stage could be beneficial and prevent an escalation in needs. Again, carers also reported wanting to be included in decisions about the person they care for and to be valued in this, including being given notice of when meetings were happening.

## **6. Evidence of what works**

---

### **6.1 National Strategic Drivers**

#### **6.1.1 [Efficient and Effective Interventions](#)**

These documents provide guidance for professionals working with carers in Local Authorities implementing the Care Act 2014. They bring together a summary of the key sections of the statutory guidance relating to carers with existing good practice and effective operating models from across the country that can help:

- General responsibilities and universal services
- First contact, identifying needs and assessment
- Person-centred care and support planning
- Integration and partnership working

The guidance focuses on promoting wellbeing and independence and suggests that it is “vital that the care and support system intervenes early to support individuals, helps people retain or regain their skills and confidence, and prevents need or delays deterioration wherever possible”<sup>97</sup>. The guidance also lists results from the ADASS Carers Leads Survey and one of the findings from this was that digital is an area of growth.

The guidance outlines effective components of carers assessments and states that it needs to include “the outcomes that the carer wants to achieve in their daily life, their activities beyond their caring responsibilities, and the impact of caring on those activities”<sup>98</sup>. A whole family approach should be taken to assessments and support planning that takes “a holistic view of the person’s needs and to identify how the adult’s needs for care and support impact on family members or others in their support network”<sup>99</sup> as well as taking into account any external sources of support such as community networks. It also talks about the need to look at the impact on any child or young people that may appear to be involved in care and that particular attention should be taken at transition to adult’s services. The guides suggest that using this whole family approach “can be key to maximising the impact of resources and identifying opportunities to support carers”<sup>100</sup>. Assessments should take into account the impact of the caring role not the number of hours or the diagnosis of the person being cared for.

### **6.1.2 Universal Personalised Care: Implementing the Comprehensive Model**

The 2019 NHS England paper Universal Personalised Care: Implementing the Comprehensive Model includes “moves towards joint health and social care assessments and care planning, carers’ personal health budgets, more personalised outcomes from Continuing Health Care and Care Programme Approach Assessments and wider use of social prescribing”<sup>101</sup>. The Continuing Healthcare guidance also places joint responsibility on health and social care to identify carers.

### **6.1.3 Commissioning for Carers Principles**

The Commissioning for Carers Principles focus on key actions that are most likely to achieve the best outcomes. It is designed to help commissioners consider current commissioning practices with regards to carers and how this could be improved. The document provides a simple self-assessment questionnaire as well as supplementary questions to help trigger conversations and stimulate ideas.

The Commissioning for Carers Principles help identify different approaches for adaptation or adoption to fit with local priorities and engage through the whole commissioning cycle. The simple checklist for each principle is an easy way to identify what already exists or to highlight areas that need further support and possible investment. The 10 principles are:

- Principle 1, Think Carer, Think Family; Make Every Contact Count
- Principle 2, Support what works for carers, share and learn from others
- Principle 3, Right care, right time, right place for carers
- Principle 4, Measure what matters to carers
- Principle 5, Support for carers depends on partnership working

<sup>97</sup> Directors of Adult Social Services (ADASS) [General responsibilities and universal services](#), page 4

<sup>98</sup> Directors of Adult Social Services (ADASS) [First contact, identifying needs and assessment](#), page 4

<sup>99</sup> Directors of Adult Social Services (ADASS) [First contact, identifying needs and assessment](#), page 5

<sup>100</sup> Directors of Adult Social Services (ADASS) [First contact, identifying needs and assessment](#), page 7

<sup>101</sup> Carers UK (2019) [The NHS and Carers Rights](#)

- Principle 6, Leadership for carers at all levels
- Principle 7, Train staff to identify and support carers
- Principle 8, Prioritise carers' health and wellbeing
- Principle 9, Invest in carers to sustain and save
- Principle 10, Support carers to access local resources

#### **6.1.4 NICE guidance – Supporting adult carers**

This guideline covers support for adults (aged 18 and over) who provide unpaid care for anyone aged 16 or over with health or social care needs. It aims to improve the lives of carers by helping health and social care practitioners identify people who are caring for someone and give them the right information and support. It covers carers' assessments, practical, emotional and social support and training, and support for carers providing end of life care.

The guideline includes recommendations on:

- information and support for carers
- identifying carers
- carers' assessments
- helping carers stay in, enter or return to work, education and training
- social and community support for carers
- training to provide care and support
- psychological and emotional support for carers
- support during changes to the caring role and during end of life care

#### **6.1.5 NICE guidance - Dementia: assessment, management and support for people living with dementia and their carers**

This guideline covers diagnosing and managing dementia (including Alzheimer's disease). It aims to improve care by making recommendations on training staff and helping carers to support people living with dementia.

This guideline includes recommendations on:

- involving people living with dementia in decisions about their care
- assessment and diagnosis
- interventions to promote cognition, independence and wellbeing
- pharmacological interventions
- managing non-cognitive symptoms
- supporting carers
- staff training and education

#### **6.1.6 The Care Act 2014**

The Care Act 2014 places duties on statutory agencies with relation to carers and the people they care for. Duties include:

- Wellbeing duty
- Prevention duty
- Duty to provide information and advice

- Assessment
- Eligibility
- Duty to meet care and support
- Charging and financial assessment
- Care and support planning
- Continuity of care
- Duty to promote diversity and quality in provision of services
- Paying for care
- Delegating duties
- Transition
- Safeguarding

The Care Act 2014 requires local authorities to “adopt a whole system, whole council, whole-family approach, co-ordinating services and support around the person and their family and considering the impact of the care needs of an adult on their family, including children”<sup>102</sup>.

#### **6.1.7 Children and Families Act**

The Children and Families Act (2014) “extended the right to a needs assessment to all young carers, regardless of who they care for or the type of care provided. This means that when a child is identified as a young carer, the needs of everyone in the family will be considered, triggering both children’s and adult’s support services”<sup>103</sup>. The Act removes the requirement for such carers to be providing “a substantial amount of care on a regular basis” in order to be assessed and requires local authorities to assess on the appearance of need as well as on request. The Act also requires local authorities to consider the wellbeing of the carer in line with the Care Act.

#### **6.1.8 NHS Long-Term Plan**

The NHS Long-Term Plan makes commitments to carers to assist them with their caring role and to ensure that their health and wellbeing needs are met. the plan states “carers should not have to deal with emergencies on their own. We will ensure that more carers understand the out-of-hours options that are available to them and have appropriate back-up support in place for when they need it”<sup>104</sup>. It makes a commitment to supporting 100,000 carers to have contingency planning conversations in case of carer emergency to ensure appropriate alternative arrangements could be put in place. This work has accelerated due to the COVID-19 pandemic with many people having been contacted by the Local Authority to carry out advanced planning should the carer not be able to fulfil their usual role.

The Plan commits to better recognition and support for carers through the introduction of best practice quality marks for primary care. Additionally “the NHS will roll out ‘top tips’ for general practice which have been developed by Young Carers, which include access to preventive health and social prescribing, and timely referral to local support services”<sup>105</sup>. Principal Five also makes a commitment to improving technologies “where patients and carers can better manage their health and condition”<sup>106</sup>.

<sup>104</sup> NHS England (2019) [The NHS Long Term Plan](#), page 42

<sup>105</sup> NHS England (2019) [The NHS Long Term Plan](#), page 43

<sup>106</sup> NHS England (2019) [The NHS Long Term Plan](#), page 9

#### **6.1.9 Carer's Breaks: guidance for commissioners and providers**

The Guidance outlines how “health and social care commissioners and providers can expand and improve regular breaks for family and friends who care for other adults”<sup>107</sup>. There are two guides: one for [adult carers](#) and one for [young carers](#). The guidance for adult carers focuses on best practice for supporting adult carers with breaks and respite. The one for young carers covers guidance about providing breaks and respite for young carers and young adult carers.

#### **6.1.10 Supporting carers in general practice: a framework of quality markers**

Supporting carers in general practice: a framework of quality markers (2019) builds on the provision NHS England work *Commitment to Carers* and outlines practical steps GP practices can take to support carers at a local practice level, clinical commissioning group (CCG) level, as a Primary Care Network (PCN) or as an Integrated Care System (ICS). The quality markers consist of a series of questions that practices can use to assess themselves along with a list of practical suggestions for each. The quality markers ask a general practice to identify six things:

- How the practice identifies and registers carers
- How the practice uses it's carer's register to support holistic carer health and wellbeing needs
- How the practice organises itself to understand and respond to the needs of carers
- How the practice makes it easier for carers to access its services
- How the practice communicates with, involves and informs its carers
- How the practice promotes a carer-friendly culture<sup>108</sup>

#### **6.1.11 A connected society: A strategy for tackling loneliness – laying the foundations for change**

The Strategy looks at what can be done to design in support for social relationships into a changing society and recognising the crucial role of local authorities in this. It looks at changes that can be made in organisations, infrastructure and culture. The aim is for loneliness to be recognised and acted on without stigma and shame.

The strategy has three overarching goals:

1. A commitment to improving the evidence base so that the causes of loneliness are understood along with its impacts and what works to tackle it
2. To embed loneliness as a consideration across government policy, recognising the wide range of factors that exacerbate feelings of loneliness and support people's wellbeing and resilience
3. Build a national conversation on loneliness to raise awareness of its impacts and to help tackle stigma.

In the wake of COVID-19 and the social distancing measures that have been put in place to tackle it, this strategy is increasingly relevant. One of the areas looked at within the strategy is digital solutions to tackle loneliness.

---

<sup>107</sup> Department of Health and Social Care (2019) [Carers Action Plan 1-year Progress Tracker](#), page 11

<sup>108</sup> NHS England (2019) [Supporting carers in general practice: a framework of quality markers](#)

#### **6.1.12 An integrated approach to identifying and assessing carer health and wellbeing**

This paper addresses changes to the way in which Carer health and wellbeing need is identified, assessed, and supported as a result of changes made by the Care Act 2014 and the Children and Families Act 2014. It is, essentially, a resource to help promote working together between Adult Social Care services, NHS commissioners and providers, and third sector organisations that support Carers, of all ages, with a specific focus on developing an integrated approach to the identification, assessment and support of Carers and their families across health and social care.

#### **6.1.13 Employment support for carers**

The Report sets out how to better support carers to stay in or enter employment. Having flexibility over when, where or how a job is done can be a critical factor in carers' ability to juggle care and work. The report suggests that any employee can benefit from flexibility and so too can employers. The right to request flexible working only kicks in after six months of continuous employment. But more carers could be encouraged to enter the workforce if they could request such arrangements from day one. The Report recommends amending the Flexible Working Regulations 2014 to ensure a day one right to request flexible working for all employees. Additionally supporting carers during times of difficulty is beneficial to carers and employers alike. Too many carers are currently forced to use annual leave or sick days to fulfil caring responsibilities.

#### **6.1.14 Build Back Better: Our Plan for Health and Social Care**

Build Back Better: Our Plan for Health and Social Care highlighted the important role carers have in providing support to their loved ones and made a commitment to "ensure that the 5.4 million unpaid carers have the support, advice and respite they need, fulfilling the goals of the Care Act".

#### **6.1.15 People at the Heart of Care: Adult Social Care Reform**

The Government white paper People at the Heart of Care: Adult Social Care Reform sets out a 10-year vision for how people will experience care and support in England. It highlights three key core strands specifically relating to improving support to unpaid carers as part of the new vision in reforming social care. The three core strands are:

- i. working with the sector to kick-start a change in the services provided to support unpaid carers. Supported by £25m over three years to identify and test a range of new and existing interventions that support carers
- ii. identifying, recognising and involving unpaid carers
- iii. supporting the economic and social participation of unpaid carers

### **6.2 Local strategic drivers**

#### **6.2.1 Supporting Adults in Nottinghamshire, Our Adult Health and Social Care**

**Strategy** Nottinghamshire's Adult Social Care Strategy and outlines the guiding principles of Adult Social Care. The focus is on promoting people's independence so that they can live more fulfilled enjoyable lives with strong links to their local

community. It makes a commitment to make it as easy to access as possible to ensure people get the right support, at the right time and in the right place.

**6.2.2** [The Nottinghamshire Plan](#) sets out the Council's plans for the next ten years to make a 'healthy, prosperous and greener future for everyone'. Of particular relevance to carers are the first two commitments:

- Helping our people live healthier and more independent lives
- Supporting communities and families

**6.2.3** The [Integrated Care Strategy 2023-27](#) brings together partner organisations from across health and care with a renewed focus on providing joined up services and improving the lives of all people who live and work in the city and county. The strategy has a focus on carers as well as the people accessing services throughout including "Recognising carers of all ages at the earliest opportunity, and ensuring that appropriate person-centred support is in place following a needs-led, strengths based and personalised conversation" and aims to increase in the proportion of carers who reported that they had as much social contact as they would like and an increase in carer reported quality of life score.

The ICS highlights appropriate support is needed for carers within the following ambition aims:

- Our people are resilient and have good health and wellbeing.
- Our people with care and support needs and their carers have good quality of life.
- Our system has a sustainable infrastructure.

**6.2.4** The [Nottingham and Nottinghamshire Joint Carers Strategy 2023-2028](#) was coproduced with carers and contains the following principles:

- To work in a way that is tailored to each carer to meet their needs and support their health and wellbeing and maintain their independence
- To reduce isolation and health inequalities by improving access to carers who are 'seldom heard' or who are from ethnic minority groups
- To ensure carers have a voice, that they are listened to and are treated with respect as expert partners in carer support
- To improve the lives of all carers by everyone working together
- To identify and support carers as early as possible
- To provide the right support across the health and social care system to meet the needs of all carers and the people they care for by delivery high quality services
- To make the best use of available resources in supporting carers across the health and social care system

As well as the above principles carers developed a number of 'I' statements to highlight the things that were important to them and these must be reflected accordingly by each service:

- I want to be able to access information and support when I need it
- I would like support at first contact to understand my situation

- I would like help to understand what a carer is
- I would like information or training to support me at the time I need it, for it to be easily accessible, meets my needs and accessible whoever I make contact with
- I want the right to a carers assessment
- I would like to tell my story once and then agree when I will have further conversations to explain my situation so my needs can be best met
- I want to feel valued and listened to
- I want my needs and the needs of my family to be considered and appropriate support provided recognising the impact on all of us
- I can access information and support when I need it
- I should be able to access different types of bespoke flexible and timely respite to meet my needs
- I want to be able to share my experiences with other carers in ways that are accessible to me face-to-face, virtual or otherwise
- I want to be involved in decisions affecting my cared for at all stages and by all professionals/services involved
- I want to be able to feel safe and supported in my caring role, as well as knowing the person I'm caring for is also safe and well looked after
- I want to be seen as more than a carer and have opportunities to live a balanced life outside of my caring role
- I want to be able to take up education, employment and volunteering opportunities offered to me, professionally and personally, without my caring role impacting on these opportunities
- I need support to prepare me for a time when my caring role reduces or ceases

## 7. What is on the horizon?

---

The [Carer's Leave Bill](#) received royal assent on 24 May 2023, introducing a statutory entitlement to five days unpaid carers leave per calendar year, for employees that are providing or arranging care.

According to the [Equality Act 2010](#), [discrimination by association](#) would mean that someone was treated less favourably than someone else because they were caring for an elderly or disabled person. Carers UK are working towards having carers included as a [protected characteristic](#).

Carers are facing increasing pressures due to cost of living, even for those carers who are able to continue in their employment. This is exacerbated by increasing care costs for those they are caring for.

### 7.1 Projected service use

The Institute of Public Care publish [POPPI](#), a tool originally developed for the Department of Health to provide population data and future predictions of social care need by local authority.

National data shows that the largest expected increase in carer numbers are in those over 65 in line with general population increases. With the largest increase being in those aged

over 85 (an expected increase of (81%). As more people are living longer they are likely to do so with one or more long-term health conditions and therefore require support from their children who will fall into this age group.

Older adults predicted to be carers	2020	2025	2030	2035
<b>65-69</b>	8655	9395 (9%)	10837 (25%)	10912 (26%)
<b>70-74</b>	7607	7021 (-8%)	7671 (1%)	8860 (16%)
<b>75-79</b>	5122	6325 (23%)	5900 (15%)	6502 (27%)
<b>80-84</b>	3176	3783 (19%)	4732 (49%)	4481 (41%)
<b>85+</b>	1997	2307 (16%)	2824 (41%)	3613 (81%)
<b>Total</b>	<b>26557</b>	<b>28831 (9%)</b>	<b>31964 (20%)</b>	<b>34368 (29%)</b>

**Table 8: Projected increase in older people delivering care to 2035**

**Source: POPPI June 2020, national prevalence model applied to ONS population projections**

POPPI estimates also show that the greatest increase will be in those providing more than 50 hours of care per week (32%).

**Figure 3: Predicted increase in adults who are carers to 2035 by hours of care delivered each week**

**Source: POPPI June 2020, national prevalence model applied to ONS population projections**

Around the County the expected increase varies with Broxtowe predicted to have the lowest growth at 22% to 2035. Ashfield, Mansfield and Newark and Sherwood are expected to have higher increases (35%, 33% and 32% respectively).

**Figure 4: Estimated increase in carers aged 65+ across Nottinghamshire districts to 2035**

**Source: POPPI June 2020, national prevalence model applied to ONS population projections**

## 7.2 Whole family, strengths-based assessments

The Adult Social Care Department of Nottinghamshire County Council is moving towards whole family, strength-based assessments. New carers assessments were launched in 2021 that were strength-based and further work is now being carried out to integrate these with whole family assessments.

## 7.3 Employment

The All-Age Carers Strategy 2023-2028 has access to employment as an area of focus to support carers either back into work or to maintain their current role if they have one. There are many benefits to carers in having paid employment both financial and psychological.

## 7.4 Primary Care Networks

Primary Care Networks are a move to provide more proactive care to patients in line with the NHS Long Term Plan. They aim to enable greater provision of proactive, personalised, coordinated and more integrated health and social care. Practices have begun working together and with community, mental health, social care, pharmacy, hospital and voluntary services in their local areas in primary care networks. One of the key changes brought about by this model is the use of place-based commissioning to support local communities.

### What does this tell us?

## 8. Unmet needs and service gaps

From feedback received from carers it is clear that there are additional requirements to support both working carers and parent-carers. Parent-carers in particular report being unsure regarding where their parenting role ends and their caring role begins and therefore find it difficult to access support in their own right. The new Carers Hub service are able to provide support to parent-carers but further work is required to ensure that all areas are aware of this service offer so that carers are able to access the support provided.

The State of Caring Report (2019) states that “providing support for carers, especially those looking to stay in, or return to, paid work, is essential if women are able to be able to participate fully in the economy and live a life free from poverty in older age”. The report also states that “increasing numbers of employers are recognising the importance of supporting carers in their workforce to continue working, so they can retain talented staff rather than incurring the costs of recruiting and retraining new employees”. It is important therefore that we work with provider services, including statutory services, to ensure that provision of support is available and accessible to carers who work.

Additionally, whilst the data shows that the vast majority of carers in Nottinghamshire are white there is a danger that this may lead to carers from minority ethnic communities not receiving the support they need or being engaged in coproduction activities to ensure that services meet their needs. The new Carers Hub service has been specifically tasked with broadening support to all communities as part of the new contract.

## **9. Knowledge gaps**

---

Available research is limited around the impact of the current cost of living crisis on carers and further support may be required as evidence emerges. Locally information will be gathered via the commissioned services, Carers Space and other coproduction routes.

Parent carer needs are also under-represented in the research however this is an emerging need locally and further knowledge is required to ensure that parent carers are to be supported in the most appropriate way.

Additional information is also required regarding the need of ethnic minority carers around the county to ensure that their needs are met by both commissioned and support services.

Additionally, the research in section 1 of this report shows a significant impact on the mental health and wellbeing of carers once their caring role has ended and additional information is required to understand how to support people as their caring role changes or ends.

Severe multiple disadvantage is a way of describing the lived experience of people whose current circumstances have been strongly shaped by deprivation, trauma, and abuse – often leading to experiences of homelessness, mental ill-health, domestic abuse/sexual violence, harmful use of drugs and alcohol, and perhaps contact with the criminal justice system. These

exposures and experiences often leave people vulnerable to some of the worst health and wellbeing of any group in Nottinghamshire and carers may be at risk of these as well as the person they are caring for.

It is difficult to accurately estimate the numbers of people that experience severe multiple disadvantage for various reasons. Firstly, there is no single universally adopted definition of severe multiple disadvantage, therefore different studies or estimates use different definitions. In many cases, services are difficult to access for those experiencing severe multiple disadvantage, meaning people are not present in service-use data. For this reason the number of carers impacted by severe multiple disadvantage is unknown.

### **What should we do next?**

#### **10. Recommendations for consideration**

---

	Recommendation	Lead(s)
1	Review and streamline the provision of short breaks for carers to ensure a range of options are available for those who require them. Educate staff to enable effective commissioning of available short breaks.	Nottinghamshire County Council Integrated Strategic Commissioning
2	Ensure carers needs and the caring situation is considered throughout all aspects of social care provision through whole family assessments to move away from silo working and ensure that the needs of the whole family (including the carer) are met in the most appropriate way. As part of this keeping carers informed about outcomes and next steps through feedback.	Principal Social Worker
3	Work proactively with the assistive technology work programme to ensure carer needs are encapsulated in equipment specifications (e.g. the need for alternative monitoring for people with dementia to provide a break for the carer or the use of electronic reminder services for medications and appointments to free up carer time/reduce visits)	Nottinghamshire County Council Integrated Strategic Commissioning
4	Develop a single point of access for carers so that they are aware of where to go for information and advice without being overwhelmed with information	Carers Hub Service
5	Support carers to plan for the future including a change in their needs as well as those for the person they are caring for. This will involve early conversations with carers to plan for future changes and contingency planning for emergency situations	Carers Hub Service

6	Ensure easily accessible information and advice (including support and finance) is available when it is required including out of standard office hours. This will need to be supported by face-to-face support and connecting to services rather than signposting.	Carers Hub Service through coproduction activity
7	Support young carers as they transition from children to adult services to ensure that they continue to receive support whilst maximising their potential to take up educational, employment and social opportunities.	Carers Hub Service and Young Carers Support Service
8	Develop support for Parent Carers specific to their caring role.	Carers Hub Service in coproduction with Parent Carers
9	Review the current young carers assessment tool to bring in line with strength-based approaches and ensure that support provided achieves the appropriate outcomes for the young carers	Integrated Strategic Commissioning, Children and Families Service and Operational teams in coproduction with young people and families
10	Ensure carers are identified and offered support at the earliest opportunity including through schools and primary care to prevent a crisis from occurring	All system partners and commissioned services
11	Ensure that carers needs in relation to Severe Multiple Disadvantage are recognised as part of the assessment and whole family process utilising a multidisciplinary approach to support people within this group and prevent self-neglect. Improve data recording to determine impact of this area on carers and inform future service and support planning.	All partners
12	Ensure that carers have equal access to support in a way that is suitable and appropriate for them and their family needs. This will include carers who may not have English as their first language (including BSL), carers from ethnic minority backgrounds, support that is appropriate to religious needs or those who find it difficult to access statutory services during office hours due to work commitments.	All system partners and commissioned services

**17 April 2024****Agenda Item: 6****REPORT OF THE MEDICAL DIRECTOR OF THE INTEGRATED CARE BOARD****NOTTINGHAM AND NOTTINGHAMSHIRE NHS JOINT FORWARD PLAN –  
2024/25 REFRESH****Purpose of the Report**

1. The purpose of this report is to update Nottinghamshire Health and Wellbeing Board members on progress in refreshing the Nottingham and Nottinghamshire NHS Joint Forward Plan and for members to approve the Health and Wellbeing Board's statement of opinion, which will be appended to the plan presented for approval at the ICB Board on 9 May 2024 .

**Information**

2. This report sets out the context of the Nottingham and Nottinghamshire NHS Joint Forward Plan, which has been informed by:
  - a) The system Integrated Care Strategy<sup>1</sup> approved by the Integrated Care Partnership (ICP) in March 2023, which incorporates the Joint Health and Wellbeing Strategy priorities for Nottingham City and Nottinghamshire County. The ICP considered a refresh of the Integrated Care Strategy at their meeting on the 22 March 2024.
  - b) Legislative requirements.
  - c) Statutory guidance and policy.
  - d) Discussions with system partners; and
  - e) Engagement with citizens and wider partners.
3. Before the start of each financial year, each Integrated Care Board (ICB), together with partner NHS Trusts and NHS Foundation Trusts must prepare a plan detailing how they propose to exercise their functions in the next five years. There is an expectation that this plan will be refreshed annually, in line with emerging national guidance. As well as delivering the NHS Mandate, the production of the Nottingham and Nottinghamshire NHS Joint Forward Plan is strongly influenced by the Integrated Care Strategy.

---

<sup>1</sup> [Integrated Care Strategy 2023 27 \(healthandcarenotts.co.uk\)](https://www.healthandcarenotts.co.uk)

4. As outlined in the paper considered by Nottinghamshire Health and Wellbeing Board in [February 2024](#), NHS England published planning guidance on the NHS Joint Forward Plan on 22 December 2023<sup>2</sup>. Key points of note from the guidance are:
- a) The three principles for the development of Joint Forward Plans remain:
    - i. **Principle 1:** Fully aligned with the wider system partnership's ambitions.
    - ii. **Principle 2:** Supporting subsidiarity by building on existing local strategies and plans as well as reflecting the universal NHS commitments.
    - iii. **Principle 3:** Delivery focused, including specific objectives, trajectories and milestones as appropriate.
  - b) Systems continue to have flexibility to determine the scope and structure of the Joint Forward Plan. It is anticipated that plans continue to reflect the priorities set out in 2023/24.
  - c) Health and Wellbeing Boards must be involved in revising the Joint Forward Plan and confirm that it continues to take proper account of Joint Health and Wellbeing Strategies (JHWBS).
  - d) The guidance again reiterates that the ICB and partner trusts are responsible for the development of the Joint Forward Plan. Systems are encouraged to use it as a shared delivery plan for the Integrated Care Strategy and JHWBS.
  - e) Should there be any significant revisions to the Joint Forward Plan, there is a statutory duty for the ICB and partner trusts to consult with partners, including the Integrated Care Partnership and NHS England.
  - f) Previous local patient and public engagement exercises and subsequent action should inform the Joint Forward Plan. ICBs and their partner trusts must include a summary of the views expressed by anyone they have a duty to consult and explain how they have taken them into account.

## Refresh of the Joint Forward Plan

5. The Nottingham and Nottinghamshire Joint Forward Plan has been reviewed and refreshed throughout February and March 2024 as part of an integrated approach to planning, incorporating the five-year Joint Forward Plan, three-year financial opportunities and 2024/25 operational planning.
6. At its January meeting, the ICB Board endorsed that the refresh of the plan should continue to prioritise the four aims and three principles of the Integrated Care Strategy; as well as the four clinical priorities identified in the plan:
- a) Prevention.
  - b) Proactive management of long-term conditions and frailty.
  - c) Improving navigation and flow to reduce emergency pressures.
  - d) Ensuring timely access and early diagnosis for cancer and planned care.

---

<sup>2</sup> <https://www.england.nhs.uk/long-read/guidance-on-updating-the-joint-forward-plan-for-2024-25/>.

7. In addition to the proactive management of frailty, it was also supported that there will be a focus on the care model for frailty / older people as part of the refresh. The refresh is being informed by the service user and citizens insights report received by the Integrated Care Partnership at their 6 October 2023 meeting.
8. At its meeting on 07 February 2024, Health and Wellbeing Board members agreed to delegate ongoing input from the Health and Wellbeing Board regarding the refresh of the NHS Joint Forward Plan to the Chair of the Board and Director of Public Health and to schedule an item at the April 2024 Health and Wellbeing Board to formally approve a statement of opinion for the revised Joint Forward Plan.
9. In addition, the Board agreed to consider draft revisions to the NHS Joint Forward Plan at a workshop discussion on 13 March 2024. This ensured the Board had the opportunity to input into the plan refresh directly. The draft plan and an indicative statement of opinion were discussed and comments from Board members have been taken in to account within the refresh.
10. The plan and its supporting documents have been developed with system partners and citizens to ensure there is system support for the Joint Forward Plan as the collective plan for the next 5 years.
11. On 20 March 2024, NHS England issued updated guidance to advise that the timescales for publishing the Joint Forward Plan have been moved to end of June 2024. The final version will therefore be agreed at the ICB Board meeting on 9 May 2024 and published shortly thereafter to meet national expectations. The final version of the plan will be circulated to members of the Health and Wellbeing Board at this stage for information.
12. In consultation with the Chair of the Health and Wellbeing Board and Interim Director of Public Health, and subject to the comment and approval of members of the Health and Wellbeing Board on 17 April 2024, the Board's draft statement of opinion on the Nottingham and Nottinghamshire Joint Forward Plan is as follows:

*The Nottinghamshire Health and Wellbeing Board is satisfied that the NHS Joint Forward Plan for Nottingham and Nottinghamshire has taken account of its feedback, and the plan clearly articulates the ICBs commitment and contribution to the delivery of the Nottinghamshire Joint Health and Wellbeing Strategy.*

### **Other Options Considered**

13. There is an option to not consult the Health and Wellbeing Board on the refresh of the NHS Joint Forward Plan. However, this option was discounted because guidance requires the Health and Wellbeing Board to be involved in revising the NHS Joint Forward Plan and to confirm that it continues to take proper account of the Nottinghamshire Joint Health and Wellbeing Strategy.

### **Reason for Recommendations**

14. To ensure the Nottinghamshire Health and Wellbeing Board has the opportunity to provide its statement of opinion as required by national guidance.

## **Statutory and Policy Implications**

15. This report has been compiled after consideration of implications in respect of crime and disorder, data protection and information governance, finance, human resources, human rights, the NHS Constitution (public health services), the public sector equality duty, safeguarding of children and adults at risk, service users, smarter working, sustainability and the environment and where such implications are material they are described below. Appropriate consultation has been undertaken and advice sought on these issues as required.

## **Financial Implications**

16. There are no direct financial implications arising from this report.

## **Consultation**

17. The Nottingham and Nottinghamshire Joint Forward Plan acts as the NHS delivery commitment for all NHS organisations within the Nottingham and Nottinghamshire ICS. In developing the plan, engagement took place with public, patients and stakeholders. The engagement programme built on engagement for the Integrated Care Strategy and included stakeholder meetings, presentations at existing forums, public events and a survey. In total, just under 800 individuals were involved in a range of activities, between May and June 2023. An [engagement report](#) has been produced.

## **Implications in relation to the NHS Constitution**

18. The Joint Forward Plan has been developed in line with the NHS Constitution.

## **Implications for Residents**

19. The vision of the Integrated Care Strategy is that 'every person will enjoy their best possible health and wellbeing.' This is delivered through the four aims of the strategy (improved outcomes in population health and healthcare, tackle inequalities in outcomes, experience and access, enhance productivity and value for money and support the broader social and economic development). The strategy aims to improve the overall health and wellbeing of our local communities, reduce health inequalities, deliver a more preventative approach to health and care and deliver more integrated effective and efficient services.

20. The Joint Forward Plan acts as the NHS delivery commitment for all NHS organisations within the Nottingham and Nottinghamshire ICS.

## **Implications for Sustainability and the Environment**

21. One of the aims of the Integrated Care Strategy is to support broader social and economic development. This includes developing the role of major anchor institutions across the ICS which will have a strong role in supporting local sustainability and the environment through their Green Plans. The Nottingham and Nottinghamshire Joint Forward Plan includes a section on how sustainability will be delivered within the NHS.

## RECOMMENDATIONS

The Nottinghamshire Health and Wellbeing Board is asked to:

- 1) Note the progress in refreshing the Nottingham and Nottinghamshire NHS Joint Forward Plan.
- 2) Approve the Board's statement of opinion for the Nottingham and Nottinghamshire NHS Joint Forward Plan (included in paragraph 12), which will be appended to the plan presented for approval at the ICB Board on 9 May 2024.

**17 April 2024****Agenda Item: 7****REPORT OF THE SERVICE DIRECTOR FOR CUSTOMERS, GOVERNANCE  
AND EMPLOYEES****WORK PROGRAMME****Purpose of the Report**

1. To consider the Nottinghamshire Health and Wellbeing Board's current work programme.

**Information**

2. The work programme (attached as **Appendix 1** to the report) assists in the management of the Board's agenda, the scheduling of its business and its forward planning. It includes business items that can be anticipated at the present time, while arising issues are added as they are identified. The work programme is reviewed and updated regularly with the Chair and Vice Chair, and at each Board meeting, where any Board member is able to suggest items for inclusion.

**Other Options Considered**

3. To not produce a work programme: this option is discounted as a clear work programme is required for the effective management of the Board's agenda, the scheduling of its business and its forward planning.

**Reason for Recommendations**

4. To assist the Board in managing its business effectively.

**Statutory and Policy Implications**

5. This report has been compiled after consideration of the implications in respect of crime and disorder, data protection and information governance, finance, human resources, human rights, the NHS Constitution (public health services), the public sector equality duty, safeguarding of children and adults at risk, service users, smarter working, sustainability and the environment and, where such implications are material, they are described below. Appropriate consultation has been undertaken and advice sought on these issues as required.

## **Financial Implications**

6. There are no direct financial implications arising from this report.

## **RECOMMENDATIONS**

- 1) That the Nottinghamshire Health and Wellbeing Board's work programme be noted.
- 2) That Board members make any further suggestions for items for inclusion on the work programme for consideration by the Chair and Vice-Chair, in consultation with the relevant officers and partners.
