

Report to Pension Fund Committee

10 March 2022

Agenda Item: 8

REPORT OF THE SERVICE DIRECTOR FOR FINANCE, INFRASTRUCTURE & IMPROVEMENT

FUND VALUATION AND PERFORMANCE – QUARTER 3

Purpose of the Report

1. To report on the total value and performance of the Pension Fund to 31 December 2021.

Information and Advice

- 2. This report is to inform the Nottinghamshire Pension Fund Committee of the value of the Pension Fund at the end of the latest quarter and give information on the performance of the Fund. Some information relating to this report is not for publication by virtue of paragraph 3 of Schedule 12A of the Local Government Act 1972. Having regard to the circumstances, on balance the public interest in disclosing the information does not outweigh the reason for exemption because divulging the information would significantly damage the Council's commercial position in relation to the Pension Fund. The exempt information is set out in the exempt appendices.
- 3. The table below shows a summary of the total value of the investment assets of the Fund as at 31 December 2021 in comparison with the benchmark, together with the comparative position 3 and 12 months previously. The benchmark is a long-term target which the fund will move towards over the next year.

Sustainable investments and fossil fuels

- 8. The Pension Fund has been asked to publish figures showing the Fund's direct and indirect holdings of fossil fuel companies together with the Fund's investments in Sustainable equities and renewable energy.
- 9. This data is published together with detailed caveats below. It is anticipated that these figures will show a gradual increase in investment in Sustainable equities and renewable energy. It is further anticipated that investments in fossil fuels will decrease as a proportion of the Fund over time. However fossil fuel holdings will vary from quarter to quarter in Schroders (direct) portfolio as investments are made based on Schroders assessments of market opportunities. Valuations will also change from quarter to quarter in both categories due to changes in share prices which are highly correlated to the oil price. Consequently, this trend will be much less smooth.

	Latest Quarter		
	31 December 2021 £m		
Schroders Fossil fuel	85.3	1.29%	
Other Fossil fuel	70.0	1.06%	
Total Fossil fuel	155.4	2.34%

Previous Quarter 30 September 2021							
£m							
85.7	1.32%						
84.2	1.30%						
170.0	2.62%						
291.3	4.49%						

Previous Year					
31 December 2020					
£m	%				
46.8	2.76%				
67.6	1.14%				
114.3	1.94%				
158.7	2.69%				

- 10. In the most recent quarter the value of Fossil Fuel investments fell back slightly due mostly to market movements, and consequently also fractionally as the proportion of the Fund. Schroders returned a small proportion of last quarters gains on their Energy holdings.
- 11. Schroders hold a number of Oil and Gas companies within the Active Equity portfolio. Sustainability forms part of their criteria in assessing companies for investment. For example one of their holdings, Equinor, develops not only oil but gas, wind and solar energy.
- 12. The 'Other Fossil fuel' category is almost entirely the Energy sector in our passive portfolio and will reflect the share of the index relating to Energy. It decreased mainly because the passive holdings have reduced during the quarter as a result of rebalancing. It should be noted that the Energy sector includes any renewable energy companies within the index, and that some oil and gas producers are also involved in the production of biofuels, hydrogen, wind power and solar energy, so have a renewables element. As a result of these two factors the figure for fossil fuels is likely to be overstated, and the figure for renewables understated.
- 13. Equally there will be some companies such as those in the mining sector which do not fall within this category but may produce for example coal which would not be included in these figures.
- 14. For this reason, this indicator does not provide the full picture of our exposure to fossil fuels, but forms only part of our risk monitoring. However as an indicator it should show a reducing trend in exposure over time.
- 15. A more thorough assessment of our equity investments is provided by LGPS Central's carbon risk analysis which assesses the carbon footprint and weight in fossil fuel and coal reserves. The metric for exposure to clean technology is less informative as most of our investment in this area is through infrastructure funds which are not covered by the analysis. This analysis confirmed that our carbon footprint and fossil fuel and coal reserves are lower than the benchmark. The projection is that as we implement our long term investment strategy that these figures will reduce reflecting a reduction of risk.
- 16. The 'sustainable and renewable energy' investment figure contains more estimates. The figure includes five specific investments the Renewables Infrastructure Group, Impax Environmental, and four renewable energy infrastructure investments Capital Dynamics Clean Energy Infrastructure VIII, Green Investment Bank's Offshore Wind Fund, Langar Lane Solar Farm and the LGPS Central Infrastructure fund where the first investment is in a renewable energy infrastructure fund.
- 17. An estimate of the renewable energy investments within the Fund's other infrastructure funds was added to these identified investments. Not all funds identified this as a sector in their reporting so this data is incomplete. Furthermore because of the longer reporting cycle for unlisted investments the estimate was based on both valuations and percentages from earlier in the year, so this figure can only be considered indicative, but is likely to be an underestimate.
- 18. It can be seen that the Fund's investments in Sustainable Equities and Renewable Energy now significantly exceed those in Fossil Fuel investments. A gradual increase in the amount invested in this area has been demonstrated over the last year and this will increase as our Strategic Asset allocation is implemented.
- 19. Because of the way they are calculated, these numbers will only ever be indicative, but are helpful for the pension fund in identifying risk and progress.

Core Index Portfolio

20. Below are detailed reports showing the valuation of the Core Index portfolio at the quarter end and the transactions during the quarter. The table below summarises the valuation and compares it to the portfolio benchmark (and a comparison with the previous quarter). The benchmark changed at the Pension Fund Committee in the summer to reduce UK equities to 35% of the fund which will be reflected in the Core Index portfolio. This will be a gradual change over the rest of the year.

29. There were new investments in listed Property, and listed Infrastructure. Additionally, two investments were recategorised which is reflected in the valuation table in paragraph 27. These were Cheyne Real Estate Credit fund £19m now categorised as Property instead of Credit and a listed Social Housing company £22m now categorised as Property rather than Infrastructure.

Responsible Investment Activity

- 30. The Pension Fund believes that Responsible Investment is supportive of risk-adjusted returns over the long term. As a long-term investor, the Fund seeks to invest in assets with sustainable business models across all asset classes.
- 31. During the quarter the Fund's investment managers have continued with their usual stewardship activities through considered voting of shares and engaging with investee company management as part of the investment process. Quarterly reports on Responsible Investment issues have been received from Legal and General and. Full reports and other responsible investment information can be found on the Pension Fund website here https://www.nottspf.org.uk/about-the-fund/responsible-investment.
- 32. Hermes EOS has exercised the Fund's voting responsibilities as our Proxy voting service. A quarterly report on voting activity can be found on our website here https://www.nottspf.org.uk/about-the-fund/investments.
- 33. LAPFF (Local Authority Pension Fund Forum) have engaged with a number of companies during the quarter (principally Rio Tinto, BHP, National Grid, Roche and Anglo American). More information can be found in their quarterly engagement report which can be accessed

on the Fund's (or on LAPFF's) website. An officer attended the LAPFF business meeting on 6th October 2021. This was reported to committee in the November 2021 meeting.

- 34. Responsible investment considerations run through everything done by the Fund and there have been many specific actions taken during the quarter. In October Members and officers attended a full day Responsible Investment event organised by LGPS Central. The event considered such issues as 'Does Engagement Make a Difference' and 'Net Zero' and 'Carbon Emissions Reporting'. In November there was a training for Members on the Climate Risk Report and TCFD report which were presented to the November committee meeting. A Property training was held for Members and included a session on Abrdn's commitment to net zero and some examples of how ESG risks were identified and dealt with in our property portfolio.
- 35. A number of officer meetings have been held to discuss the LGPS Central Global Sustainable Equity Fund including a session to 'meet' the managers of each sleeve. In December there was a briefing for Members on the fund by LGPS Central. Regular investment monitoring meetings included a review of responsible investment by the funds being scrutinised. The Climate Risk Report and TCFD report was approved by Committee in November and the Climate Action Plan was reviewed at the same meeting.

Statutory and Policy Implications

36. This report has been compiled after consideration of implications in respect of finance, the public sector equality duty, human resources, crime and disorder, human rights, the safeguarding of children, sustainability and the environment and those using the service and where such implications are material they are described below. Appropriate consultation has been undertaken and advice sought on these issues as required.

RECOMMENDATION

1) It is recommended that Members consider whether there are any actions they require in relation to the issues contained within the report.
