

Purpose

1. This report provides Members the opportunity to update the programme of work for the Committee and to propose items for inclusion.

Information

2. The programme of work allows Members to map out scrutiny activity over the coming year. It is reviewed at every meeting of the Standing Committee.
3. Members are invited to consider the updated programme of work and to suggest other issues that the committee may wish to consider. In including an item the standing committee should seek to ensure that there will be a meaningful outcome from consideration of an item or a benefit to the people of Nottinghamshire. The standing committee should generally avoid agenda items that are for information or noting or where a previous review has been concluded.
4. The changes to NHS Service at Bassetlaw Hospital are subject to some delay. A verbal update will be provided on the current position with this issue.
5. A briefing on Myalgic Encephalomyelitis (ME) from NHS Nottinghamshire County will take place shortly after the rising of Social Care and Health Standing Committee. This briefing will be received by Members who indicated an interest in the subject at the last meeting. Outcomes from this briefing will be reported back to the September meeting of the Social Care and Health Standing Committee.

Recommendation

6. It is recommended that the Social Care and Health Standing Committee consider any issues raised and agrees the updated programme of work.

Councillor Ged Clarke**Chairman of Social Care and Health**
