

**1 April 2015****Agenda Item: 10****REPORT OF THE CORPORATE DIRECTOR FOR CHILDREN, FAMILIES AND  
CULTURAL SERVICES****HEALTH AND WELLBEING IMPLEMENTATION GROUP****Purpose of the Report**

1. This report provides a summary of progress made by the Health and Wellbeing Implementation Group. It describes achievements made by a range of integrated commissioning groups and a review of the Joint Strategic Needs Assessment and delivery of the Health and Wellbeing Strategy.

**Information and Advice**

2. The Health and Wellbeing Implementation Group is responsible for managing the work programme on behalf of the Health and Wellbeing Board and assisting the Board to fulfil its statutory duties. It ensures the delivery of the Health and Wellbeing Strategy through monitoring and holding the integrated commissioning groups to account for progress against their delivery plans.
3. Since the last report of the Health and Wellbeing Implementation Group which was presented in July 2014 the group has met twice. The main items considered by the Group were:
  - Review of evidence relating to sexual abuse and domestic violence
  - Approval of the Housing Needs Assessment
  - Agreement of the Health & Wellbeing Strategy Delivery Plan
  - Housing Delivery Plan for the Health and Wellbeing Strategy
  - The role of the Group & support for the Board
  - Health & Wellbeing Board Stakeholder network programme

**Key achievements****Joints Strategic Needs Assessment**

4. The Group has received and approved updated sections of the JSNA covering the following topics:
  - i. [Tobacco](#)
  - ii. [Carers](#)
  - iii. [Hepatitis](#)
  - iv. [Sexual Violence](#)

5. A further programme of activity is planned and is attached as Appendix 1.

### **Delivery of the Health and Wellbeing Strategy**

6. The Group has been overseeing the delivery of the Health and Wellbeing Strategy. A baseline report was presented to the Health and Wellbeing Board in December 2014 which outlined current position and highlighted issues impacting on delivery.
7. This report gives an update on progress since December, which is limited given the short reporting period. There has been significant activity however in refining the delivery plans for each priority area. Integrated commissioning groups have been asked to refine plans to focus on partnership areas, outline key actions and to identify indicators to provide a measure of success. This report will give a brief outline of significant issues and changes since December 2014 based on the ambitions within the Strategy.

### **A Good Start**

8. Within the priority to **work together to keep children and young people safe** the Nottinghamshire Safeguarding Children Board has prioritised the Initial Child Protection Conference (ICPC) repeat audit and the Children Sexual Exploitation audit and will undertake an audit to evidence the effectiveness of information sharing between children & adults services where there are mental health or substance misuse issues in the family. While the audit has been delayed this is still on track to be completed by March 2015.
9. A needs assessment of unplanned admissions and avoidable emergency department attendance by children and young people, to support the priority **to improve health outcomes through the integrated commissioning of children's health services** has been postponed from November 2014. It is now due to be completed by the end of February 2015 and will inform future commissioning linking integrated community children's and young people's healthcare priority on reducing hospital admissions.
10. The priority to **provide children and young people with the early help support that they need** is supported by a key action:
  - to review and refresh our common assessment approach for individual children, young people or families who need integrated early help support by developing a plan to migrate early help assessments onto Framework-i so that there is an integrated approach to case recording by December 2014.
11. There are 4 milestones for this key action, three of which are being progressed successfully including the introduction of the single assessment in Children's Social Care from April 2015, which will be based upon a consistent approach to assessment and planning across the department including early help assessments.
12. The milestone proposes to use the Framework-i system for early help case management at the point that the current version of the software is upgraded (to a version known as Mosaic). This will not take place during 2014/15; the current plan envisages the implementation by summer 2015, though further work is currently being undertaken to validate this. In the meantime, early help assessments will continue to be recording on existing systems.

## Living Well

13. To support the ambition that Nottinghamshire residents live well, the strategy aims to **reduce numbers of people who are overweight or obese** as a priority and aspires that all children, young people and adults in Nottinghamshire are a healthy weight, meet the Chief Medical Officers recommendations for physical activity and adopt and maintain a healthy diet.
14. One action to support this milestone is to complete the procurement of and mobilise an integrated obesity prevention and weight management service by April 2015. This procurement exercise has now been undertaken and a preferred bidder identified. Mobilisation has been initiated and will be undertaken until the contract starts in April 2015.
15. Action has also been undertaken to sign up businesses to a Nottinghamshire healthier fast food takeaway scheme. This has now been completed in Rushcliffe and roll out to other areas was started in January 2015.
16. Participation rates for in the National Childhood Measurement Scheme were published in December 2014 for the financial year 2013/14. While participation for reception aged children has increased from 2012/13 from 91.3% to 92% it remains below the national average of 94% for that age group. Participation for Year 6 has declined over the same period from 91.9% during 2012/13 to 89% during 2013/14. The scheme is important because it increases understanding of weight issues in children, it offers an opportunity to engage with children and families about healthy lifestyles and weight issues and it also helps to plan and improve local services.
17. Following the Boards endorsement of the Nottinghamshire Declaration on **Tobacco Control** all district councils and CCGs are signed up in principle subject to formal agreement through their local governing bodies. As action plans are developed within partner organisations this should support referral into stop smoking services and further reductions in smoking rates.
18. Plans to re-commission Tobacco Control Services are on target to have a new service in place by April 2016.
19. Action has been undertaken to increase uptake of the **NHS Health Check** programme. Locally 8.19% of eligible people aged 40-74 have been offered a Healthcheck. The target is 20%. There is considerable variation between practices which is being addressed directly with low performers.
20. Of those people who were offered a health check, 44.06% have received a Health Check. Again there is considerable variation between practices which is being addressed by sharing national & local marketing insight and targeted social marketing planned in the last quarter of 2014/15.
21. Of those people who have had a NHS Health Check 4.44% are found to be at high risk of cardio vascular disease. The proportion of people expected to be found high risk is 9.5%. This may be low as a result of the success in finding high risk individuals in previous years.

### **Coping well**

22. There has been good progress against the priority **to provide services which work together to support individuals with dementia and their carers** including the launch of a new local information website for carers [Dementiacarers.net](http://Dementiacarers.net)
23. Work to increase awareness of **Dementia** Friends continues across partners, including the County Councils new home care provider.
24. Dementia diagnosis rates are increasing across the county. NHS England is aiming to increase the rate of diagnosis so that two thirds of people with dementia will have a diagnosis and post diagnostic support by 2015. Three CCGs exceed this target (Bassetlaw, Mansfield and Ashfield and Nottingham West), one is almost at target (Rushcliffe) and Nottingham North and East and Newark and Sherwood are working to achieve the target by the end of March.
25. Specialist Compass Workers have been commissioned to support **carers** looking after people with dementia. During November and December 2014 73 carers received support from the newly commissioned Compass Workers in Nottinghamshire.
26. There has been progress to support the priority to **provide coordinated service for people with mental ill health**. A local crisis concordat steering group has been set up to develop a delivery plan to ensure local organisations work together to prevent crises happening where possible through prevention and early intervention.
27. NHS England has also commissioned a new city and countywide Mental Health Police and Custody Diversion and Liaison Service that will identify and treat early offenders with mental health problems. The Service will be delivered by Nottinghamshire Health Care Trust from 1 April 2015.

### **Working together**

28. There has been significant progress to deliver the **housing** priority within the Strategy. A joint assessment of the [Impact of Housing on Health and Wellbeing in Nottinghamshire](#) has been produced jointly by the seven districts and will be summarised for inclusion in the JSNA. This was presented to the Health and Wellbeing Implementation Group in January 2015 along with a Delivery Plan for the priority within the Health and Wellbeing Strategy to **ensure that we have sufficient and suitable housing, including housing related support, particularly for vulnerable people**. The Housing Delivery Plan is attached as Appendix 2.
29. A Nottinghamshire Health & Wellbeing - Housing Commissioning Group, to be chaired by the Chief Executive of Mansfield District Council has also been established and met for the first time in February 2015. This group will have lead responsibility for delivery of the housing element of the Health and Wellbeing Strategy.
30. There has been some progress against the Housing Delivery Plan. However the milestone around delivering a Winter Warmth campaign has been delayed. The districts have met with colleagues from the Better Care Fund and public health during January 2015 for initial discussions around the potential for joint working on affordable warmth and fuel poverty. Provisional ideas for a longer term integrated affordable warmth model have been proposed and all partners are due to meet in March 2015 to take suggestions forward for a County

wide affordable warmth pilot project for 15/16 involving Local Authority Energy Partnership (LAEP), CCG's and districts.

## **Pharmaceutical Needs Assessment and Pharmacy Applications**

31. The development and publication of a Pharmaceutical Needs Assessment (PNA) is one of the statutory responsibilities of the Health & Wellbeing Board. The Health and Wellbeing Implementation Group has maintained oversight of the Pharmaceutical Needs Assessment which is being presented to the Health and Wellbeing Board for approval in March 2015.
32. The commissioning of Pharmaceutical services is the responsibility of NHS England but local Health and Wellbeing Boards are consulted in order to gain views on local need. The Nottinghamshire Health and Wellbeing Board has delegated this function to the Health and Wellbeing Implementation Group.
33. During the period April to October 2014 NHS England consulted on ten applications:
  - Four distance selling pharmacy applications (no local comments submitted as no impact on local services)
  - Three community pharmacies, unforeseen benefits (Two were not supported locally & applications closed with NHS England or rejected. The decision on the third application is awaited from NHS England)
  - A community pharmacy, change of ownership (no objections made locally. A decision from NHS England awaited)
  - A community pharmacy, no significant change relocation (no objections made. A decision from NHS England is awaited)
  - A dispensing appliance contractor, change of ownership & no significant relocation (No response submitted locally as it would not impact on local people. A decision is awaited from NHS England).
34. Responses were submitted for applications where there was a potential significant change to local provision (particularly unforeseen benefits applications) and signed by the Chair of the Board. NHS England subsequently made the final decision through their Pharmaceutical Services Regulations Committee. Decisions have been notified to the Chair of the Board. None of the decisions have resulted in any significant change to local Pharmaceutical need.

## **Next steps**

35. The Health and Wellbeing Implementation Group work programme is due for review and development.
36. The Local Government Association (LGA) Peer Challenge took place in February and the initial feedback made recommendations to review the number of priorities within the Health and Wellbeing Strategy and also to reconsider the governance and supporting structures of the Health and Wellbeing Board. A full report from the Panel is due during March 2015. A review of progress by the LGA will be undertaken within 6 months of the Peer Challenge.
37. Given the nature of the feedback from the Peer Challenge it would be timely to review the Strategy and the supporting structures of the Board, including the Health and Wellbeing Implementation Group prior to any further work being undertaken.

## **Statutory and Policy Implications**

This report has been compiled after consideration of implications in respect of crime and disorder, finance, human resources, human rights, the NHS Constitution (Public Health only), the public sector equality duty, safeguarding of children and vulnerable adults, service users, sustainability and the environment and ways of working and where such implications are material they are described below. Appropriate consultation has been undertaken and advice sought on these issues as required.

## **RECOMMENDATIONS**

1. That the progress made in delivering the Health and Wellbeing Strategy be noted.
2. That the remit, membership and work programme for the Health and Wellbeing Implementation Group should be reviewed in light of the recommendations made by the LGA Peer Challenge.
3. That the Board considers re-prioritising the delivery of the Health & Wellbeing Strategy in line with recommendations made by the LGA Peer Challenge Panel.

**Anthony May**
