

Admissions Report for 2007/8

Tables 1 – 3 show by area the number and percentage of on-time applications agreed for the last 3 years.

First time admissions show a continuing increase in the number of on-time applications and a continuing increase in the number of unsuccessful applications. There is an overall increase in successful secondary applications since 2005/6 but a small reduction since 2006/7 which may be associated with the increase in the number of on-time applications. Infant to junior transfer requests continue to achieve very high success rates.

Table 4 shows that the number of oversubscribed secondary schools has reduced from 19 to 13 over the last three years.

Table 5 shows a significant increase in the number of oversubscribed primary schools over the same period.

Table 6 shows a significant increase in the number of on-line applications which is now in line with the national average for local authorities.
