#### Data Definition:

These indicators show the percentage of all GCSE-eligible pupils in mainstream maintained secondary schools who attained at least five grades of C or above. A GCSE-eligible pupil is defined as a pupil who is aged 15 at the beginning of the school year. The new 5+ A\*-C GCSEs (and equivalent) including English and Maths GCSEs, was announced in the 14-19 Education and Skills White Paper and subsequently confirmed in the *Driving Forward 14-19 Reform: Implementation Plan* published in December 2005. Pupils counted must have achieved at least a grade C English GCSE, and at least a grade C Maths GCSE, and at least the equivalent of another three C+ GCSEs.

[Source: DCSF Achievement + Attainment Tables]

**Health warning:** These figures include mainstream schools only (i.e. no special schools or independent schools are included). Therefore figures may be different from DCSF published figures.

**Discontinuous Yearly Data.** From 2004, the figures are calculated from a wider range of GCSE-equivalent pre-16 qualifications as well as GCSEs. Therefore, extra care should be taken when comparing post 2004 performance with previous years that do not include the wider range of qualifications. For 5 A\*-C including English and Maths, 2005 figures may include Statistics counted as Maths. 2006 figures count only English and Maths GCSE or equivalent.

U = Unvalidated data

Area □ SN ◇ NAT △

**Data Definition:** The indicator represents two measures of GCSE performance: Average Points Scores (APS) and capped APS. APS are values calculated from all pupils' scores from GCSEs and equivalent examinations. Capped APS are calculated from each pupil's best eight GCSEs or equivalent.

[Source: DCSF Achievement + Attainment Tables]

**Health warning:** These figures include mainstream schools only (i.e. no special schools or independent schools are included). Therefore figures may be different from DCSF published figures.

**Discontinuous Yearly Data.** From 2004 figures are calculated from a wider range of GCSE-equivalent pre-16 qualifications as well as GCSEs. Therefore, extra care should be taken when comparing post 2004 performance with previous years that do not include the wider range of qualifications and are based on a different point scoring system.
