Nottinghamshire County Council's Strategic Plan, 'Building a Future', published in January 2002, outlined the vision and priorities which the County Council was to focus upon over the next four years. Once again this edition of Condition of Nottinghamshire presents information and statistics under each of the priorities contained within the Strategic Plan and can be used as a guide to measure changes in context or progress on the Plan priorities.

This publication presents information both in tables and graphically at various geographical levels and the number of indicators for which statistics are given is once again expanded from previous editions.

Much of the data presented is sourced from the Research Team in the Culture and Community Department of Nottinghamshire County Council but other data sets have been supplied by research sections in other County Council departments. In addition, several partnership organisations including Nottinghamshire Police, Borough and District Councils and health organisations have also provided significant input. The assistance of all these organisations is gratefully acknowledged.

This publication can also be viewed on the County Council web site at **www.nottinghamshire.gov.uk** alongside other more regular statistical reports including Population, Economic and Employment Bulletins.
