New Disclosure Control Procedures with JSA Claimant Count Data

A new disclosure control procedure has been introduced with JSA claimant count data on NOMIS with effect from 15th November. The procedure follows an interim review of the confidentiality of JSA claimant count data, and is required for compliance with the National Statistics Code of Practice for Data Access and Confidentiality. This is an interim measure pending a thorough assessment of the risk to the confidentiality of claimant count data early next year.

The procedure is the primary suppression of any cell count of 1 or 2, which is instead denoted by the symbol '#'. A true value of zero continues to be shown as 0.
