## A Monthly Analysis of Employment, Unemployment and Jobs

EB 10/16

### September 2016

Unemployment according to the Government's preferred measure was 1.66 million in the three months to August 2016, up 10,000 from the previous three months but down 118,000 from the same period a year ago. The unemployment rate was 4.9%, unchanged from the previous three months but down 0.5% from a year earlier.

The unemployment rate for 18-24 year olds was 12.1% in the three months to August 2016, up 0.4% on the quarter but down 1.1% on the year. There were 491,000 unemployed young people aged from 18 to 24 in the quarter to July 2016. This is up by 16,000 on the quarter but down by 51,000 over the year. Comparisons of youth unemployment over time are complicated by the fact that unemployment rates are calculated as the number of unemployed people divided by the economically active

population which excludes those not seeking or available for work. Unemployment rates are not the proportion of the total population who are unemployed. They are the proportion of the economically active population (those in work plus those seeking and available to work) who are

unemployed. The long-term increase in the proportion of young people going into full-time education reduces the size of the economically active population and therefore increases the unemployment rate.

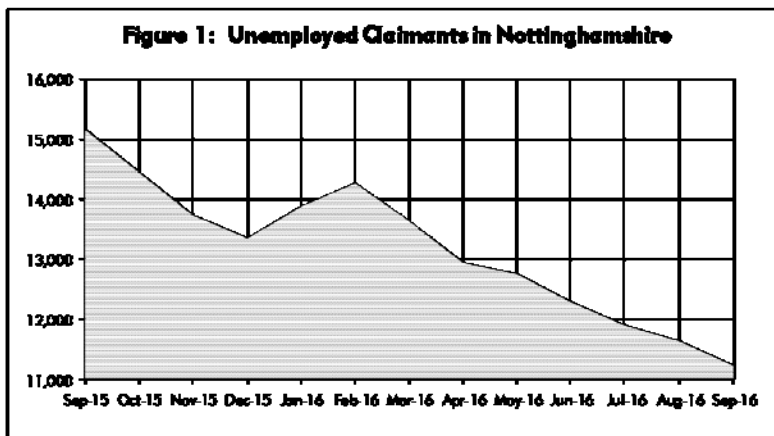

The seasonally adjusted claimant figure for the United Kingdom decreased by 9,600 last month to 550,700 and was down 155,900 over the year.

The number of people in employment aged 16 and over increased by 106,000 over the quarter to reach 31.81 million. The employment rate for those aged 16 to 64 is now 74.5%, the joint highest since comparable records began in 1971.

The number of people in full-time employment increased

**New Disclosure Control Procedures with JSA Claimant Count Data**

The procedure follows an interim review of the confidentiality of JSA claimant count data, and is required for compliance with the National Statistics Code of Practice for Data Access and Confidentiality.

The procedure is the primary suppression of any cell count of 1 or 2, which is instead denoted by the symbol '#'. A true value of zero continues to be shown as 0.
