

Employment Bulletin

A Monthly Analysis of Employment, Unemployment and Jobs

EB 12/16

November 2016

Unemployment according to the Government's preferred measure was 1.62 million in the three months to October 2016, down 16,000 from the previous three months and down 103,000 from the same period a year ago. The unemployment rate was 4.8%, unchanged from the previous three months and down 0.3% from a year earlier.

The unemployment rate for 18-24 year olds was 11.5% in the three months to October 2016, down 0.3% on the quarter and down 0.8% on the year. There were 465,000 unemployed young people aged from 18 to 24 in the quarter to October 2016. This is down by 17,000 on the quarter and down by 38,000 over the year. Comparisons of youth unemployment over time are complicated by the fact that unemployment rates are calculated as the number of unemployed people divided by the economically active

population which excludes those not seeking or available for work. Unemployment rates are not the proportion of the total population who are unemployed. They are the proportion of the economically active population (those in work plus those seeking and available to work) who are

unemployed. The long-term increase in the proportion of young people going into full-time education reduces the size of the economically active population and therefore increases the unemployment rate.

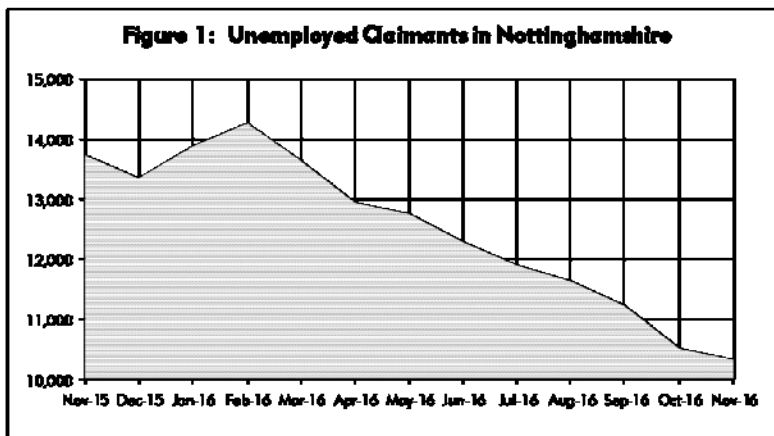

The seasonally adjusted claimant figure for the United Kingdom decreased by 5,500 last month to 538,800 and was down 143,700 over the year.

The number of people in employment aged 16 and over decreased by 6,000 over the quarter to reach 31.76 million. The employment rate for those aged 16 to 64 is now 74.4%.

The number of people in full-time employment increased by 51,000 on the quarter to reach 23.20 million. The
