

Purpose

1. This report provides Members with an introduction to adult services provided in partnership by the County Council and the district and borough councils.

Information

2. At the meeting on 1 March 2010 Members identified a potential area for review - the co-operation between the County Council and district and borough councils in providing adult services.
3. Introductory information on this subject has been provided to the Standing Committee by the County Council's Adult Social Care and Health Department. This can be found as an appendix to the report.
4. Officers from the Adult Social Care and Health Department will attend the meeting to discuss the information with the Committee.

Scrutiny Review

5. The Standing Committee has proposed that this should be an area for a detailed scrutiny review. This is expected to be undertaken by a review group of 8 Members.
6. To inform the scope of this review, Members are invited to consider the following questions and put forward suggestions for the focus of the review.
 - What are the concerns?
 - What should the review achieve?
 - How should the review be undertaken?

Recommendation

7. It is recommended that the Health & Wellbeing committee establish a Review Group of 8 Members to scrutinise the partnership working to provide adult services.

Councillor Ged Clarke**Chair of Health & Wellbeing**
