

Objectives

1. The objectives of the Risk Register are to:
 - identify key risks to the achievement of the Fund's objectives
 - assess the significance of the risks
 - consider existing controls to mitigate the risks identified
 - Identify additional action required.

Risk Assessment

2. Identified risks are assessed separately and for each the following is determined:
 - the likelihood of the risk materialising
 - the severity of the impact/potential consequences if it does occur.
3. Each factor is evaluated on a sliding scale of 1 to 5 with 5 being the highest value i.e. highest likelihood/most severe impact/consequences. The risk evaluation tables below have been used in order to assess specific risks and to introduce a measure of consistency into the risk assessment process. The overall rating for each risk is calculated by multiplying the likelihood value against the impact value.

LIKELIHOOD:		
1	Rare	0 to 5% chance
2	Unlikely	6 to 20% chance
3	Possible	21 to 50% chance
4	Likely	51 to 80% chance
5	Almost certain	81%+ chance

IMPACT:		
1	Insignificant	0 to 5% effect
2	Minor	6 to 20% effect
3	Moderate	21 to 50% effect
4	Significant	51 to 80% effect
5	Catastrophic	81%+ effect

4. Having scored each risk for likelihood and impact, the risk ratings can be plotted onto the following matrix to enable risks to be categorised into Low, Medium, High and Very High Risk.

Risk Rating Matrix

Relative Impact	Catastrophic (5)	M	H	VH	VH	VH
	Significant (4)	M	H	VH	VH	VH
	Moderate (3)	M	M	H	H	H
	Minor (2)	L	L	M	M	M
	Insignificant (1)	L	L	L	L	L
		(1)	(2)	(3)	(4)	(5)
		Rare	Unlikely	Possible	Likely	Almost Certain
		Relative Likelihood				

5. This initial assessment gives the inherent risk level. Existing controls are then identified and each risk is re-assessed to determine if the controls are effective at reducing the risk rating. This gives the current (or residual) risk level. The current risk rating scores and categories are then used to prioritise the risks shown in the register in order to determine where additional action is required in accordance with the following order of priority:

Red = Very High Priority

Take urgent action to mitigate the risk.

Orange = High Priority

Take action to mitigate the risk.

Yellow = Medium Priority

Check current controls and consider if others are required.

Green = Low Priority

No immediate action other than to set a review date to re-consider your assessment.

NOTTINGHAMSHIRE PENSION FUND RISK REGISTER - SUMMARY

Key to risk rating change since previous version of Risk Register:

↑ Increase

↓ Decrease

↔ No Change

★ New

Risk Description	Inherent Risk			Current Risk		
	Rating	Change		Rating	Change
