

GP IT

Infrastructure

- Maintenance of Clinical systems on going
 - Upkeep of clinical system; PC's, network etc
- Implementation of “federated” Wi-Fi
 - Allows GP sites secure access to Wi-Fi across ~200 public health sites and allows others to access at GP sites
- GP Mobile
 - Implementation of laptops to support secure mobile working e.g. in Care Homes
- Community of interest network
 - New network connections put into practices to improve speed of working

Infrastructure developments

- Old on site “servers” replaced
 - Legacy servers replaced with improved solution & better backup & security
- Community of interest network
 - New network connections put into practices to improve speed
- Networks prepared for free public Wi-Fi
 - In line with national direction to allow public access in GP sites

System developments

- Electronic Prescribing Software rolled out
 - Delivery of prescriptions to a chosen Pharmacy
- GP2GP
 - Electronic transfers of GP records between practices when patients transfer
- Patient on-line access
 - Electronic booking of appointments, ordering of prescriptions and access to the Detailed Coded Record

Integrated care developments

- Availability of GP records to support direct care
 - Moved from #15% to 93% of records now available *with consent* to other health professionals
 - The Medical Interoperability Gateway (MIG) implemented across all Health care providers to support secure sharing of GP records
 - Care Home access to Care plans and records
- Tool in place to alert GP and multidisciplinary teams to gaps in care and care planning
 - A tool called eHealthscope now allows GP practices and care co-ordinators to see gaps in patient care pathways and delivery better care planning
 - Arden – best practice templates

2017/18 developments

- **Infrastructure**; continued support of essential equipment e.g. printers, completion of GP mobile rollout and enablement of public Wi-Fi
- **System developments**; continued rollout of Patient on line access
- **Integrated care**; more information coming back into the GP electronically e.g. mental health information, hospital information & Social Care information
