

**REPORT OF SERVICE DIRECTOR – FINANCE, INFRASTRUCTURE &
IMPROVEMENT****PENSION FUND TREASURY MANAGEMENT MID-YEAR REPORT 2022/23****Purpose of the Report**

1. To provide a mid-year review of the Pension Fund's treasury management activities in 2022/23 for the 6 months to 30 September 2022.

Information

2. Treasury management is defined as the management of a council's cash deposits; its banking, money market and capital market transactions; the effective control of the risks associated with those activities; and the pursuit of optimum performance consistent with those risks. In other words, it is concerned with managing day-to-day cashflow, and ensuring that bills can be paid as and when they fall due. With respect to the Pension Fund, treasury management should be distinguished from the separate process of making long-term investments with the aim of making a return such that should cover the liability to pay out future pensions.
3. The Council approves the Treasury Management Policy and Strategy - and also receives mid-year and full year outturn reports – on Council-held cash balances. Since April 2020 this role in relation to Pension Fund cash balances has been delegated to the Pension Fund Committee. In turn, this Committee delegates responsibility for the implementation, scrutiny and monitoring of its Pension Fund treasury management policies and practices to the Treasury Management Group, comprising the Service Director (Finance, Infrastructure & Improvement), the Group Manager (Financial Management), the Senior Accountant (Pensions & Treasury Management), the Senior Accountant (Financial Strategy & Compliance) and the Investments Officer.
4. The Pension Fund's treasury management strategy and associated policies and practices for 2022/23 were approved by Pension Fund Committee in March 2022.
5. The Fund manages its cash investments in-house and invests only with institutions on its approved lending list. The aim to achieve the optimum return on cash investments commensurate with appropriate levels of security and liquidity.
6. In the first half of 2022/23, cash investment activities have been in accordance with the approved limits as set out in the Pension Fund's Treasury Management Policy and Strategy. The main points to note are:

- All treasury management activities were undertaken by authorised officers within the limits agreed by the Council
- All deposits were made to counterparties on the Fund's approved lending list
- No changes made to the Fund's lending criteria during the first half of the year
- Over the 6 month period covered by this report the Fund earned 1.21% on its short-term lending

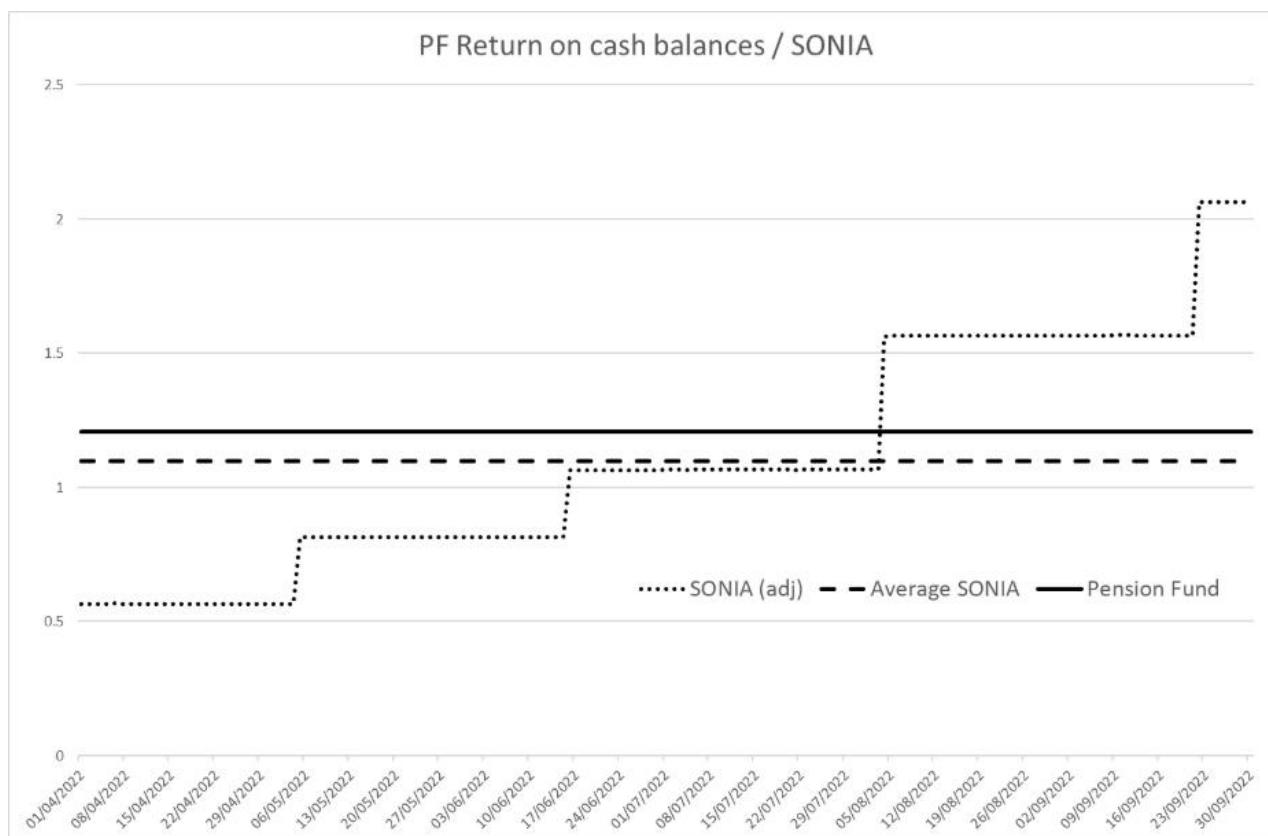

7. The table below shows that cash deposits as at the end of September totalled £163.5m, and also provides an analysis of the Fund's treasury management activity:

	Total B/f	Total Raised	Total Repaid	Outstanding
	£000	£000	£000	£000
BANK OF SCOTLAND	20,000	0	-20,000	0
LLOYDS BANK	20,000	0	-20,000	0
INSIGHT MMF	40,000	40,100	-40,100	40,000
LGIM MMF	2,500	39,100	-2,050	39,550
BLACK ROCK	22,750	31,400	-29,350	24,800
JP MORGAN	0	40,100	-40,000	100
ABERDEEN STANDARD	0	73,740	-54,740	19,000
FEDERATED	40,000	32,850	-32,850	40,000
	145,250	257,290	-239,090	163,450

8. This shows that active use has been made of the instant-access money market funds (MMFs) on the Pension Fund's counterparty list. This approach stems from needing to keep the Fund's cash liquid, available not only to pay pensions but also for the various external managers who may require cash for long-term investment at short notice.
9. The cash balance at any point in time is the snapshot sum of pension fund contributions (from both employees and employers) and investment income, less retirement lump sums, monthly pension payments, and immediate or future investment commitments. As at 30 September, the estimated Pension Fund commitments were as follows:

Investment Commitment	Estimated £m	When required
Schroders	49.3	Immediately
Private Equity commitments	88.4	Unpredictable
Infrastructure commitments	191.1	Unpredictable
Total	328.8	

10. It should be noted that the rate of return on cash deposits was fairly low at the beginning of the financial year, but increased steadily during the six months to September, reflecting the wider economic environment. The average adjusted SONIA (Sterling Overnight Index Average) rate over this period was 1.10%.
11. For comparison, the Fund earned 1.21% on average on its short-term lending over the same period, summarized in the graph below:

Reasons for Recommendation/s

12. It is considered good practice for Members to consider treasury management planned and actual performance at least three times per financial year, firstly in the Strategy Report before the start of the year, then in this Mid-Year Report, and also in the Outturn Report, after the close of the financial year.

Statutory and Policy Implications

13. This report has been compiled after consideration of implications in respect of crime and disorder, data protection and information governance finance, human resources, human rights, the NHS Constitution (public health services), the public sector equality duty, safeguarding of children and adults at risk, service users, smarter working, sustainability and the environment and where such implications are material they are described below. Appropriate consultation has been undertaken and advice sought on these issues as required.

Financial Implications

14. There are no direct financial implications arising from this report.

RECOMMENDATION/S

15. That Pension Fund Committee members endorse the actions taken by the Section 151 Officer to date as set out in the report.

Nigel Stevenson
Service Director – Finance, Infrastructure and Improvement
