

Employment Bulletin

A Monthly Analysis of Employment, Unemployment and Jobs

EB 6/15

May 2015

Unemployment according to the Government's preferred measure was 1.81 million in the three months to April 2015, down 43,000 from the previous three months and down 349,000 from the same period a year ago. The unemployment rate was 5.5%, down 0.2 from the previous three months and down 1.1 from a year earlier.

The unemployment rate for 18-24 year olds was 14.3% in the three months to April 2015, down by 0.1% on the quarter and down 2.0% on the year. There were 585,000 unemployed young people aged from 18 to 24 in the quarter to April 2015. This is down by 2,000 on the quarter and down by 90,000 over the year. Comparisons of youth unemployment over time are complicated by the fact that unemployment rates are calculated as the number of unemployed people divided by the economically active

Key Facts

- * **Claimant count in Nottinghamshire falls by 837 over the month.**
- * **Jobless total now 16,187.**
- * **Claimant count rates in May (residence based);**
United Kingdom 1.9%
East Midlands 1.7%
Nottinghamshire 2.3%
County 1.7%
City 3.7%
- * **LFS Unemployment in the United Kingdom 1,810,000 or 5.5% of the workforce.**

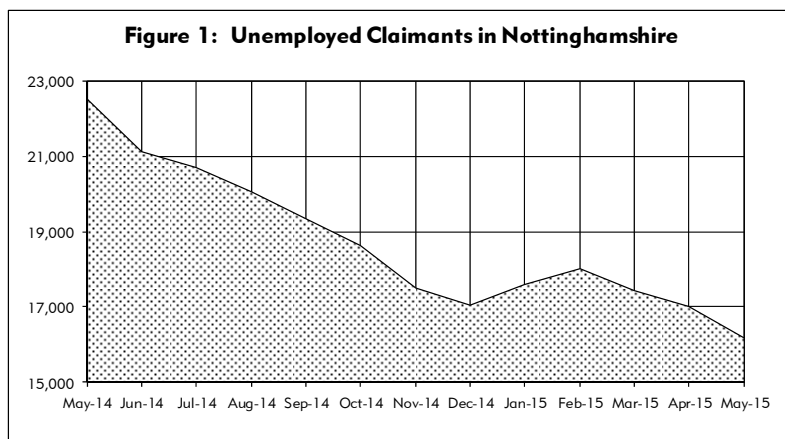

population which excludes those not seeking or available for work. Unemployment rates are not the proportion of the total population who are unemployed. They are the proportion of the economically active population (those in work plus those seeking and available to work) who are

unemployed. The long-term increase in the proportion of young people going into full-time education reduces the size of the economically active population and therefore increases the unemployment rate.

The seasonally adjusted claimant figure for the United Kingdom decreased by 6,505 last month to 791,793 and was down 290,928 over the year.

The number of people in employment aged 16 and over increased by 114,000 over the quarter to reach 31.05 million. The employment rate for those aged 16 to 64 is now 73.4%, up 0.1 from the previous quarter and up 0.7 from a year earlier.

The number of people in full-time employment increased

New Disclosure Control Procedures with JSA Claimant Count Data

The procedure follows an interim review of the confidentiality of JSA claimant count data, and is required for compliance with the National Statistics Code of Practice for Data Access and Confidentiality.

The procedure is the primary suppression of any cell count of 1 or 2, which is instead denoted by the symbol '#'. A true value of zero continues to be shown as 0.

Migrant Workers in Nottinghamshire

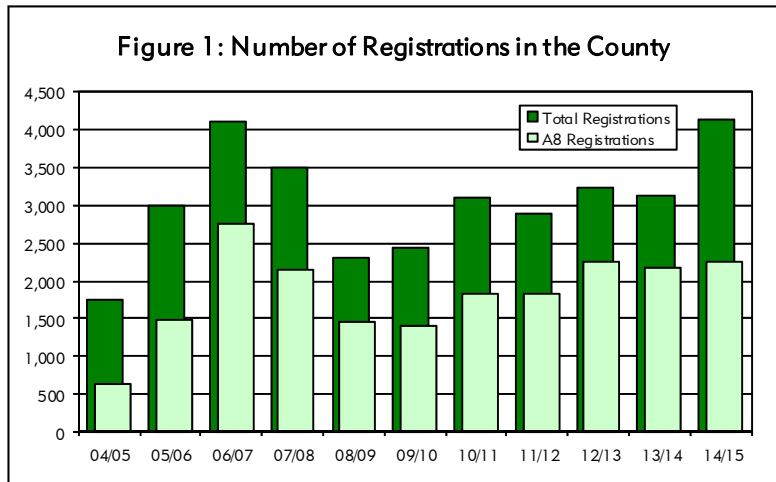

National Insurance Number allocations to overseas nationals entering the UK - 2014/15

This report provides statistics regarding National Insurance Numbers (NINo) allocated to adult overseas nationals entering the United Kingdom during the financial year 2014/15 as released by the Department for Work and Pensions on 21st May 2015.

A NINo is generally required by any overseas national looking to work or claim benefits/tax credits in the UK, including the self employed or students working part time.

The figures provide a measure of in-migration but do not reflect emigration or the overall migrant population.

The figures reflect adult overseas nationals allocated a NINo through the adult registration scheme. In addition there will be a small number of overseas nationals (aged 16-19 years) allocated a NINo automatically through the Juvenile Registration scheme. This occurs when the

individual has previously been allocated a child registration number. These juvenile cases are not captured by the statistics.

Nationally, the total number of NINo registrations to adult overseas nationals entering the UK in 2014/15 was 820,600 an increase of 220,000 (37%) on the previous year and an increase of 393,500 (92%) from 2004/5.

An increase in number

was also experienced in Nottinghamshire where there were 4,135 NINo allocations to non-UK nationals registered in the County in 2014/15. This is up by 1,000 from the previous year, an increase of almost 32%.

Of the total, 2,267 or around 55% were from the 'Accession 8' or 'A8' countries which joined the European Union in 2004. This is up by 90 over the year.

Table 1: National Insurance Registrations of non-UK Nationals 2014/15

| Ashfield | Bassetlaw | Broxtowe | Gedling | Mansfield | Newark & Sherwood | Rushcliffe | Notts County |
|----------|-----------|----------|---------|-----------|-------------------|------------|--------------|
| 379 | 681 | 561 | 248 | 1,376 | 641 | 249 | 4,135 |
| 9.2% | 16.5% | 13.6% | 6.0% | 33.3% | 15.5% | 6.0% | 100.0% |

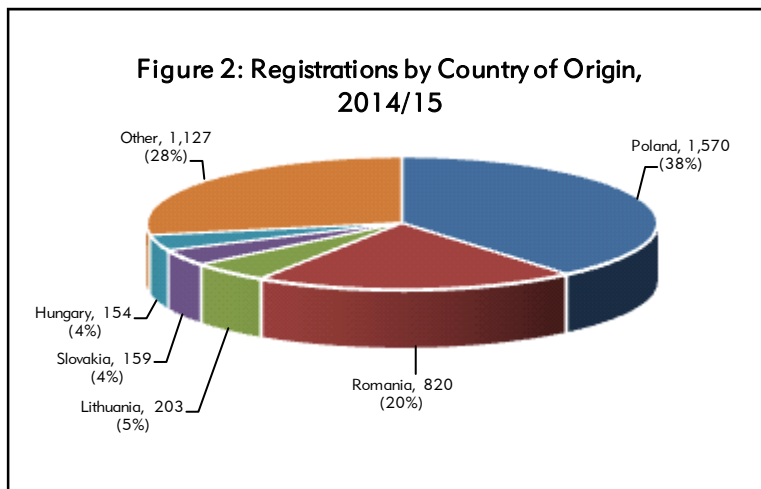

Figure 1 illustrates the trend in the number of NINo allocations for both total registrations and for those people originating from the A8 countries since 2004/05. It can be seen that the number of NINo allocations to people coming from the A8 countries has increased slightly in the last year after showing a small decrease the previous year. Prior to that there had been a continuing decrease to 2009/10 since its previous peak

of 4,120 allocations in 2006/07.

The NINo data contains details of the district in which people were living when they registered and this is shown in Table 1.

Of the total 4,135 NINo registrations in the County in 2014/15, the largest proportion (33%) were living in Mansfield. This is followed by Bassetlaw with 16.5% and Newark & Sherwood with 15.5%.

Figure 2 shows NINo registrations by country of origin. As can be seen, the largest number of people (1,570) from any one country originate from Poland. This is down from 1,747 in the previous year and represents 38% of all registrations in the County. Romania is second with 820 registrations and Lithuania is third with 203. Registrations from Romania are up by 618 from last year but Lithuania is down by 35. Slovakia has 159 registrations, up by 9 from last year. There were 154 registrations by people from Hungary, down from 163 last year. The remaining 29% is made up from registrations of people from all other countries.

A similar pattern is evident at the district level. In Bassetlaw for example, over

66% of all NINo registrations were from people originating from Poland. For the other districts in the County the comparable figures are: Mansfield 48%, Ashfield 38%, Newark & Sherwood 29%, Gedling 29%, Broxtowe 5% and Rushcliffe 9%.

Over 71% of NINo registrations in Bassetlaw, 67% in Mansfield and over 58% of registrations in Ashfield were from people originating from the A8 countries.

Broxtowe and to a lesser extent Rushcliffe show a different pattern by having registrations from people who originate from a broader spread of countries.

In Broxtowe, only 5% of registrations were from people originating from Poland whilst 14% were from Hungary, 11% were from Romania and 7% from China.

In Rushcliffe, the largest proportion of people from any one country originated from Italy (11%), but there were still sizeable proportions originating from Romania (10%), Poland (9%), Spain (9%) and India (8%).

In total for the County there were 203 registrations from people from Lithuania. Interestingly, 100 or over 49% of them were for people

located in Mansfield.

Overall, Broxtowe had registrations from people originating from 34 different countries, followed by Gedling 22, Newark & Sherwood 21, Rushcliffe 21, Ashfield 19, Mansfield 17, and Bassetlaw 15.

The information contained in this report concentrates on the area covered by Nottinghamshire County Council, but readers may be interested to know that there were more NINo registrations in Nottingham City than in the whole of the rest of Nottinghamshire. There were 6,608 registrations in Nottingham in the financial year 2015/15, up from 5,170 last year. The registrations came from people originating from 88 different countries.

Of the total number of NINo registrations in Nottingham, 27% were from Poland, 12.5% from Romania, 5.5% from both Italy and India, 4.5% from Spain and around 3% each from Hungary and China.
