

APPENDIX 1

INDEX OF WASTE LOCAL PLAN POLICIES

	Page
Chapter 2 - The Waste Management Strategy	
W2.1 Hierarchy of Waste Management Options	17
Chapter 3 - Environmental Protection	
W3.1 Information in Support of Waste Planning Applications	20
W3.2 Planning Obligations	23
W3.3 Visual Impact of Plant, Building and Stockpiles	24
W3.4 Visual Impact - Screening and Landscaping Measures	25
W3.5 Water Resources – Pollution Issues	29
W3.6 Water Resources – Planning Conditions	29
W3.7 Odour	31
W3.8 Litter	32
W3.9 Noise	33
W3.10 Dust	33
W3.11 Mud	34
W3.12 Birdstrike	35
W3.13 Flood Defences	35
W3.14 Vehicular Movements	37
W3.15 Vehicular Routing	37
W3.16 Bulk Transport of Waste	38
W3.17 Green Belt	39
W3.18 Best and Most Versatile Agricultural Land	40
W3.19 Ancient and Amenity Woodlands	41
W3.20 Heathlands	42
W3.21 Water Features	43
W3.22 Biodiversity	44
W3.23 Nature Conservation and Geological Sites	47

W3.24	Protected Species	48
W3.25	Mature Landscape Areas	51
W3.26	Public access	51
W3.27	Archaeology	53
W3.28	Listed Buildings and Conservation Areas	54
W3.29	Cumulative Impact	54

Chapter 4: Reclamation

W4.1	Phasing	57
W4.2	Availability and Timescales	58
W4.3	Single Source of Fill	58
W4.4	Settlement	58
W4.5	Soil Conservation & Use of Alternative Materials	59
W4.6	Landscaping	60
W4.7	Premature Cessation of Waste Disposal	60
W4.8	Reclamation of Existing Disposal Sites	61
W4.9	Aftercare Conditions	62
W4.10	After-use - Details Required and Objectives	63
W4.11	After-use - Management and Other Agreements	63
W4.12	Agricultural Reclamation - Enhancing Wildlife and Landscape Interest	63
W4.13	Agricultural Reclamation Impact of Landfill Gas Infrastructure	64
W4.14	Woodland Reclamation - Protection of Landfill Caps	65
W4.15	Built Development After-use - Ground Stability Measures	66

Chapter 5: Waste Recycling

W5.1	Household Waste Recycling Centres - Areas of Search	72
W5.2	Household Waste Recycling Centres in Disposal Sites	72
W5.3	Mini Recycling Centres	75
W5.4	Material Recovery Facility - Eastcroft	75
W5.5	Material Recovery Facilities - Industrial Areas	75
W5.6	Material Recovery Facilities - Waste Disposal Sites	76
W5.7	Permanent Aggregate Recycling Centres	77
W5.8	Mobile Aggregate Recycling Centres	77
W5.9	Recycling Soils	78
W5.10	Scrapyards - Areas of Search	81
W5.11	Scrapyards - Existing Sites	82

Chapter 6: Waste Treatment & Energy Recovery from Waste		
W6.1	Future Provision of Municipal Incinerators	88
W6.2	Clinical Waste Incinerators	88
W6.3	Other Technologies	90
W6.4	Refuse Derived Fuel	91
W6.5	Energy Recovery from Incineration – Environmental Impact	97
W6.6	Energy Recovery from Incineration – Economic Viability	97
W6.7	Energy Recovery from Waste Disposal - Economic Viability	98
W6.8	Energy Recovery from Waste Disposal – Environmental Impact	98
Chapter 7: Composting and Landspreading		
W7.1	Commercial Composting Sites - Areas of Search	103
W7.2	Commercial Composting - Waste Disposal Sites	103
W7.3	Small Scale Composting Schemes in Agricultural Areas	103
Chapter 8 - Waste Water & Sewage Treatment		
W8.1	Future Requirements	107
Chapter 9 - Waste Transfer Stations		
W9.1	General Waste Transfer Stations - Areas of Search	115
Chapter 10 - Waste Disposal		
W10.1	Waste Disposal in Mineral sites, other Voids and incompleted Colliery Spoil Heaps	131
W10.2	Waste Disposal in Derelict or Degraded Land	132
W10.3	Waste Disposal in Greenfield Sites	132
W10.4	Bentinck Void & Colliery Tip - Allocation	142

APPENDIX 2

INDEX OF FIGURES

	Page
1.1 Nottinghamshire - Annual Waste Arisings	6
3.1 Diagram of a Typical Gas Monitoring Borehole	30
5.1 UK Percentage Contents in Average Refuse Bin	70
5.2 Illustration of a Typical Household Waste Recycling Centre	71
6.1 Effect of Incineration on Waste	85
6.2 Diagram of a Typical, Modern, Energy from Waste Plant with combined Heat and Power	87
7.1 Diagram of Langar Composting Scheme	101
9.1 Role of a Waste Transfer Station (General Type)	113
9.2 Illustration of a Typical Waste Transfer Station (General Type)	114
10.1 Illustration of a Typical Non-inert Landfill Site	121
10.2 Adequacy of Disposal Facilities Serving Greater Nottingham	129
10.3 Adequacy of Disposal Facilities Serving Mansfield/Ashfield	129
10.4 Forecast Shortfalls, Best and Worst Case Scenarios	130

APPENDIX 3

INDEX OF PLANS

(Excluding Proposal Maps)

	Page	
3.1	Location of Aquifers and Public Supply Sources	27
3.2	Countryside Appraisal - Mature Landscape Areas	49
5.1	Location of HWRC's	73
6.1	Energy Recovery sites in Nottinghamshire	93
6.2	Eastcroft Incinerator and Developments which Benefit from District Heating Scheme	95
9.1	Location of Waste Transfer Stations in Nottinghamshire	111
10.1	Location of Permitted Disposal Sites in Nottinghamshire	119
10.2	Disposal Capacity - Shortfall Areas in Nottinghamshire	125
10.3	Potential Void Capacity in Nottinghamshire	135

APPENDIX 4

INDEX OF TABLES

	Page	
1.1	Estimated Total Annual Waste Arisings in the UK, by Sector	2
1.2	Examples of Estimated Disposal Routes in the UK for Waste Categories where data is available	3
1.3	Waste Production and Current Management Practices in Nottinghamshire	4
2.1	Hierarchy of Waste Management Options	15
3.1	Site Designations	46
4.1	Nottinghamshire - Mineral Workings Reclaimed with Imported Fill	56
10.1	Disposal Sites Accepting Household, Commercial and Non-Hazardous Industrial Waste in Nottinghamshire	122
10.2	Disposal Sites Accepting Inert Construction and Demolition Waste In Nottinghamshire	123
10.3	Disposal Sites Accepting Power Station Ash in Nottinghamshire	124
10.4	Summaries of Shortfall in Disposal Capacity over the Plan Period	130
