A Monthly Analysis of Employment, Unemployment and Jobs

EB 1/16

December 2015

Unemployment according to the Government's preferred measure was 1.68 million in the three months to November 2015, down 99,000 from the previous three months and down 239,000 from the same period a year ago. The unemployment rate was 5.1%, down 0.3% from the previous three months and down 0.8% from a year earlier.

population which excludes those not seeking or available for work. Unemployment rates are not the proportion of the total population who are unemployed. They are the proportion of the economically active population (those in work plus those seeking and available to work) who are

unemployed. The long-term increase in the proportion of young people going into full-time education reduces the size of the economically active population and therefore increases the unemployment rate.
