Employment Bulletin

A Monthly Analysis of Employment, Unemployment and Jobs

EB 07/18

June 2018

Unemployment according to the Government's preferred measure was 1.41 million in the three months to May 2018, down 12,000 from the previous three months and down 84,000 from the same period a year ago. The unemployment rate was 4.2%, unchanged from the previous three months but down 0.3% from a year earlier.

The unemployment rate for 18-24 year olds was 10.6% in the three months to May 2018, up 0.3% on the quarter but down 0.4% on the year. There were 414,000 unemployed young people aged from 18 to 24 in the quarter to May 2018. This is up 15,000 on the quarter but down 27,000 over the year. Comparisons of youth unemployment over time are complicated by the fact that unemployment rates are calculated as the number of unemployed people divided by the economically active population

Key Facts

- * Claimant count in Nottinghamshire decreases by 535 over the month.
- * Jobless total now 15,345.
- * Claimant count rates in June (residence based);
 United Kingdom 2.2%

which excludes those not seeking or available for work. Unemployment rates are not the proportion of the total population who are unemployed. They are the proportion of the economically active population (those in work plus those seeking and available to work) who are

unemployed. The long-term increase in the proportion of young people going into full-time education reduces the size of the economically active population and therefore increases the unemployment rate.

The seasonally adjusted claimant count figure for the United Kingdom increased by 7,812 last month to 898,743 and was up 97,465 over the year.

The Employment Bulletin uses the Claimant Count rather than the count of JSA claimants. This experimental series counts the number of people claiming Jobseeker's Allowance plus those who claim Universal Credit and are required to seek work and be available for work. It replaces the number of people claiming Jobseeker's Allowance as the headline indicator of the number of people claiming benefits principally for the reason of being unemployed.

The unadjusted claimant count figure for the United Kingdom has decreased by 7,420 over the month to 899,955. The proportion unemployed calculated on the residence base now stands at 2.2% of the population aged 16-64.

The proportion unemployed in Nottinghamshire is now 2.1%. This is higher than the East Midlands (1.8%) but below the United Kingdom (2.2%).

Claimant count.

This experimental series counts the number of people claiming Jobseeker's Allowance plus those who claim Universal Credit and are required to seek work and be available for work and replaces the number of people claiming Jobseeker's Allowance as the headline indicator of the number of people claiming benefits principally for the reason of being unemployed.

All data are rounded to the nearest 5 and may not precisely add to the sum of the number of people claiming JSA, published on Nomis, and the number of people claiming Universal Credit required to seek work, published
