1 Introduction

1.1 PREAMBLE

1.1.1 WYG has been appointed by the Homes and Communities Agency (HCA) to provide transport planning support in relation to proposals for a new link road, known as the Gedling Access Road (GAR), in Gedling, Nottingham.

1.1.2 The proposed 3.8km long GAR is located in the Gedling Borough of Nottinghamshire, to the east of Nottingham City Centre and will link the B684 Mapperley Plains Road north of Gedling with the A612 Nottingham Road south of Gedling.

1.1.3 Gedling Borough Council (GBC) is the local planning authority and Nottinghamshire County Council (NCC) is the local highway authority. The location of the GAR is remote from the nearest Trunk Road or Motorway and as such there is no requirement to consult with the Highways Agency (HA).

1.1.4 The GAR is planned to facilitate redevelopment of the Gedling Colliery/Chase Farm site for mixed-uses as well as providing a 'bypass' around Gedling to help ease traffic congestion on local roads.

1.1.5 Plans showing the proposed alignment of the GAR and the location of the Gedling Colliery/Chase Farm site can be found in **Appendix A**.

1.1.6 Full planning permission was sought for the GAR in 2008 however; the application was not determined because, at the time the applicant couldn't demonstrate that funding for the full scheme was achievable. Recent work by the HCA with Gedling Borough Council (GBC) and Nottinghamshire County Council (NCC) has given greater clarity to the financial viability of GAR and updated transport modelling has been undertaken establishing the implications for a possible phased programme of delivery for both the colliery redevelopment development and the GAR.

1.1.7 The HCA therefore proposes to submit a full (detailed) planning application for the GAR in early 2014 and a new, updated Transport Assessment (TA) is required in support of the planning application.

1.1.8 This TA report has therefore been prepared to update the 2008 TA for submission in support of the latest planning application. The scope and methodology for this assessment was identified in

a TA Scoping Report dated February 2014 (see copy in **Appendix B**) which was agreed with the local highway authority, Nottinghamshire County Council (NCC). This TA has therefore been prepared on an agreed basis.

1.2 TRANSPORT WORKING GROUP

1.2.1 A project inception meeting was held on Friday 17th January 2014. The meeting was attended by officers from the HCA, GBC, NCC and WYG. In the meeting it was agreed that a 'Transport Working Group' be established and that this should consist of officers from NCC and WYG and other stakeholder representatives, as appropriate.

1.2.2 WYG met with NCC on Thursday 13th February 2014 to discuss and agree the content of the TA Scoping Study Report. The proposed scope and methodology for the study was agreed and a copy of the TA Scoping Study Report can be found in **Appendix B** together with a covering note detailing a few minor updates which were agreed in the meeting.

1.2.3 A further meeting was held between NCC and WYG on Thursday 3rd April 2014 to discuss and agree the junction modelling methodology.

1.2.4 Monthly Steering Group Meetings have also been held between the HCA, GBC, NCC and WYG to discuss progress on the preparation of the planning application and supporting studies. Regular telephone and email contact has also been maintained with NCC throughout the preparation of this assessment.

1.3 FORMAT OF REPORT

1.3.1 The layout of this report is as follows:

- Chapter 2 describes existing transport conditions
- Chapter 3 presents a review of relevant planning policy documents
- Chapter 4 describes the proposed GAR scheme
- Chapter 5 defines the assessment years and design flows
- Chapter 6 reviews sustainable travel
- Chapter 7 presents the highway impacts
- Chapter 8 summarises the findings of the report

2 Existing Conditions

2.1 LOCATION

2.1.1 The proposed GAR is located approximately 6 km north east of Nottingham City Centre and its route is contained wholly within the Borough of Gedling. The planned road is situated directly to the north of the settlements of Gedling, Carlton and Colwick, to the east of Mapperley and to the south-west of the settlement of Burton Joyce.

2.2 ROUTE OF THE GAR

2.2.1 The proposed GAR will follow a route south from a new junction with the B684 Mapperley Plains Road, parallel with the A6211 Arnold Lane through Chase Farm before following a route through the centre of the Gedling Colliery site. From here, the GAR will continue southeast to terminate at a new junction with the A612 Nottingham Road. See plans in **Appendix C**.

2.3 EXISTING CHARACTERISTICS

2.3.1 Key characteristics of the land that will be crossed by the route of the GAR are summarised as follows:

- Agricultural fields (arable and pastoral)
- Part of a former, dismantled railway and associated railway tunnel (part filled)
- The former Gedling Colliery site (former spoil tipping land which has been restored to scrub and pasture land).
- The vacant Glebe Farm House and outbuildings
- A small area of woodland (Gedling Wood)
- A section of the Walled Garden at the Grade II Listed Gedling House
- A small section of the grounds of Carlton le Willows Academy

2.3.2 The majority of the development which lies to the south and west of the proposed GAR route is predominantly residential in nature with the densely populated residential areas of Gedling and Carlton to the south and Woodthorpe and Arnold to the west.

2.3.3 To the north and east of the proposed GAR route lie the less populated areas of Mapperley Plains and Lambley. Beyond the residential areas to the north and east are large areas of pastoral and arable farm land interspersed by the settlement of Burton Joyce and the River Trent to the east.

DETAILED STUDY AREA

2.3.4 The agreed study area for detailed assessment is indicated in **Appendix C**. The study area covers the route of the GAR including its terminal junctions with the B684 Mapperley Plains Road, the A612 Nottingham Road and all intermediate junctions, plus the route of the A6211 Arnold Lane between its junctions with the B684 Mapperley Plains Road, the A612 Nottingham Road and intermediate junctions. This is the existing route that the GAR will provide traffic relief to once it is complete.

2.3.5 The B684 Mapperley Plains Road passes through the northern end of the detailed study area on an approximate southwest to northeast alignment. The B684 is subject to a 30mph speed limit, is street lit with footways and verges on both sides of the carriageway and has a carriageway width of approximately 7.3m. The B684 is urban in character with continuous residential development on both sides of the road. Through its signal controlled junction with the A6211 Arnold Lane/Gedling Road the carriageway widens to provide two through lanes and right turn lanes from the B684 in both directions.

2.3.6 The A6211 Arnold Lane runs approximately parallel to the line of the proposed Gedling Access Road on an approximate north west to south east alignment. At its north western end the A6211 Arnold Lane is a single carriageway road subject to the national speed limit (60mph), the section past the Gedling Colliery site has a rural character with limited frontage development, a single footway on the south western side and street lighting present.

2.3.7 In the vicinity of its junction with Linsdale Gardens the speed limit on the A6211 reduces to 40mph and continuous residential frontage development with direct vehicular access and numerous side road junctions are present on the south western side of the road from this point southeastwards. A short distance to the south (just south of its junction with Besecar Avenue) the A6211 has footways on both sides of the carriageway.

2.3.8 At a point approximately 300m northwest of its junction with Lambley Lane the speed limit on the A6211 reduces to 30mph and from Lambley Lane southeast the road has continuous residential

development on both sides with direct vehicular accesses and numerous side road junctions, with a carriageway width in the order of 6.5m.

2.3.9 The existing junction of the A6211 with Lambley Lane is a simple priority T-Junction and there is a signal controlled pedestrian crossing located a short distance to the southeast of the junction. Further to the southeast the footway on the north eastern side of the A6211 narrows and adjacent to the All Hallows Church the footway terminates for a distance of approximately 80m with an off-carriageway route provided through the church grounds over this section. A short distance to the south east of the church there is a mini-roundabout junction with Main Road, at which point the A6211 becomes Main Road travelling south before its name changes again to Shearing Hill.

2.3.10 The junction of the A6211 Shearing Hill with Burton Road is a signal controlled T-Junction located immediately to the west of a railway bridge over the eastern Burton Road arm of the junction. A short distance to the west of this junction is the signal controlled T-Junction of the B686 with the A6211 Colwick Loop Road/Burton Road. The signal control at both of these junctions is linked to manage traffic travelling between the junctions.

2.3.11 From the A6211 Shearing Hill/Burton Road junction Burton Road continues northeast to its junction with the A612 Trent Valley Way. The character of this section of the road is still predominantly urban/residential, although there is less frontage development to the northern side as the road passes the playing fields associated with the Carlton le Willows Academy. Over this section Burton Road is street lit and is subject to a 30mph speed limit. On its southern side there is a continuous footway, whilst on its northern side is a continuous shared footway/cycleway from its junction with Coronation Walk (approx' 150m northeast of the A6211 Shearing Hill/Burton Road junction) to its junction with the A612 Trent Valley Way approximately 1km to the northeast.

2.3.12 There is a signal controlled pedestrian crossing on Burton Road just to the east of its junction with Coronation Walk and a couple of physical refuges in the carriageway opposite the Carlton le Willows Academy to assist pedestrian crossing movements. There are also several bus stops with associated laybys over this section and at a point approximately 200m southwest of its junction with the A612 Trent Valley Way there is a signal controlled Bus Gate with associated carriageway narrowing and vehicle turning facilities provided on either side of the Bus Gate.

2.3.13 The A612 Trent Valley Way is at the southern end of the detailed study area and is a wide single carriageway road (9.3m kerbed) subject to a 40mph speed limit and is street lit. In the vicinity of its junction with Burton Road the A612 carriageway widens out to provide an additional lane in both directions through the signal junction and a right turn lane from the A612 into Burton Road. This section of the Trent Valley Way is rural in character with only limited development on the northwestern side of the junction, served from Whitworth Drive. There is a shared footway/cycleway running along the western side of Trent Valley Way linking Burton Joyce to the north with Netherfield and Colwick to the south. There is no footway provision on the eastern side in the vicinity of the junction.

2.4 ACCIDENT HISTORY

2.4.1 NCC has provided Personal Injury Accident (PIA) information for the existing highway network for the detailed study area shown in **Appendix C**. The data covers the most recently available 5 year time period up to 30th September 2013. A copy of the accident data, including a plan showing the search area, is presented in **Appendix D**.

2.4.2 A total of 73 accidents have occurred during this period within the detailed study area (*note*: the data presented in **Appendix D** details a total of 85 accidents however 12 of these occurred at locations where it is considered that the provision of Gedling Access Road will have no impact; i.e. within residential areas where the Gedling Access Road will not affect future traffic conditions. These accidents have therefore been ignored for the purposes of this review).

2.4.3 Included in the total of 73 accidents there was 1 fatal accident, 11 'serious' and 61 'slight' accidents resulting in a total of 105 casualties which were classified as 2 fatal, 13 serious and 90 slight in severity. **Table 1** on the following page provides a summary of the recorded accidents by year and severity.

Table 1 – Existing Accident Record

Year	Slight	Serious	Fatal	Totals Accidents (Casualties)
2008	12 (17)	1 (2)	1 (2)	14 (21)
2009	13 (21)	3 (4)	0 (0)	16 (25)
2010	11 (18)	2 (2)	0 (0)	13 (20)
2011	8 (11)	3 (3)	0 (0)	11 (14)
2012	6 (9)	1 (1)	0 (0)	7 (10)
2013	11 (14)	1 (1)	0 (0)	12 (15)
Totals	61(90)	11(13)	1 (2)	73 (105)

2.4.4 The fatal accident occurred on the B684 Mapperley Plains Road and involved a motorcycle colliding with the rear of a car and then an oncoming car. This resulted in the motorcycle rider and passenger receiving fatal injuries and an occupant of the oncoming car suffering a slight injury. The accident occurred within the existing 30mph speed limit during daylight hours in fine weather and on a dry road surface.

2.4.5 Within the detailed study area there have been a total of 10 accidents that involved a pedestrian of which 3 resulted in a serious injury to the pedestrian. Further analysis of the pedestrian accidents shows that five of them occurred between 15:00hrs and 16:00hrs and involved pedestrians between the age of 11 and 13. Four of these occurred at various locations on the A6211 and one occurred on Lambley Lane.

2.4.6 Seven of the recorded accidents occurred on Lambley Lane and these were classified as two serious injury accidents and five slight injury accidents. One serious accident involved a young pedestrian being in collision with a car and the other serious accident involved a vehicle colliding with the rear of a stationary vehicle. Four of the slight injury accidents occurred outside of the 30mph speed limit. Two of these accidents involved a single vehicle, one involved opposing vehicles and one involved a rear end shunt type collision. The other slight injury accident involved a collision between a vehicle turning right into a side road across the path of an oncoming vehicle.

2.4.7 There have been 42 recorded accidents at various locations along the A6211 Arnold Lane/Main Road/Shearing Hill/Colwick Loop Road corridor. The recorded accidents were classified as 7 serious injury and 35 slight injury. The following text provides a summary of these accidents taken geographically from north to south.

2.4.8 A cluster of 10 slight injury accidents have occurred at the traffic signal controlled crossroads junction of the A6211 Gedling Road/A6211 Arnold Road/B684 Mapperley Plains Road. Four of the recorded accidents involved rear end shunts, three involved a vehicle turning right across the path of an oncoming vehicle and three involved a collision between vehicles where it appears that one of the vehicles entered the junction injudiciously. Six of these accidents occurred during daylight hours of which two occurred on a wet road surface. The area has street lighting and this is recorded as being lit at the time of each of the four remaining accidents. Two of these accidents were on a wet road surface and one on a snow covered surface. Five of the accidents occurred in 2009, two in 2012, and one in each of 2008, 2011 and 2013.

2.4.9 Six of the recorded accidents occurred on the section of the A6211 between Lambley Lane and Mapperley Plains. One was classified as a serious accident and involved a collision between opposing vehicles during the hours of darkness in fine weather but on a wet road surface. The street lighting was confirmed as being in operation. Of the other five slight injury accidents, one involved a vehicle waiting to turn right into a side road being hit from behind, one involved a vehicle on the main carriageway turning right across the path of an oncoming vehicle, one involved a vehicle entering the main carriageway into the path of an oncoming vehicle, one involved a powered two-wheeler losing control and one involved a slowing vehicle being hit from behind.

2.4.10 A serious accident occurred on the A6211 Arnold Lane and involved a single vehicle being driven by a young driver in the early hours of the morning. The weather conditions were fine and dry and street lighting was in operation. The accident also resulted in two slight injury casualties.

2.4.11 Two slight injury accidents were recorded at the junction of the A6211 Arnold Lane at its junction with Lambley Lane. Both occurred during daylight hours with one involving a vehicle turning right out of the side road across the path of an oncoming powered two-wheeler and the other involved a vehicle turning right out of the side road across the path of an oncoming vehicle.

2.4.12 Three slight injury accidents occurred on the A6211 Shearing Hill at its crossroads junction with Brooklands Drive and Shearing Close. One involved a vehicle turning right onto the main carriageway across the path of an oncoming vehicle, one involved a vehicle entering the main carriageway across the path of an oncoming pedal cycle and one involved a young pedestrian crossing the A6211 from behind a parked vehicle and being in collision with an oncoming vehicle.

2.4.13 There is a cluster of seven accidents that occurred at the junction of A6211 Shearing Hill/A6211 Burton Road/Burton Road traffic signal junction. One of these accidents involved a pedestrian being in collision with a right turning vehicle resulting in a serious injury. The other six accidents were all classed as slight injury accidents, of which two involved a pedal cycle, one involved a powered two wheeler, one involved a pedestrian and two involved vehicles approaching down Shearing Hill. One of these involved a single vehicle on an icy road.

2.4.14 Five of the recorded accidents occurred on the A6211 Colwick Loop Road at its traffic signal controlled junction with Burton Road of which one was classified as a serious injury accident and the remaining four were classified as slight injury accidents. The serious accident involved a pedal cycle turning right into the side road across the path of an oncoming vehicle. One slight injury accident involved a young pedestrian crossing the road during the hours of darkness being in collision with a moving vehicle and another involved a powered two wheeler being side swiped as it was overtaken on the main carriageway. The fourth recorded accident involved a vehicle turning right out of the side road being in collision with a bus waiting on the main carriageway to turn right into the side road. The final accident involved two queuing vehicles waiting to turn left from the side road being hit by a third vehicle approaching the junction along the side road.

2.4.15 Two of the recorded serious injury accidents within the study area involved a single vehicle and occurred within the 40mph speed limit on the A6211 Colwick Loop Road. Both occurred during the hours of darkness under street lighting that was confirmed to be operational. One involved a young driver in fine, dry conditions and the other an elderly driver during rain and on a wet road surface.

2.4.16 Five of the recorded accidents occurred on Burton Road and all were classified as slight injury. Three of the accidents involved pedestrians of which two involved reversing vehicles and one involved a young pedestrian using a pedestrian crossing being in collision with a passing vehicle. The other two involved a vehicle turning right across the path of an oncoming vehicle.

2.4.17 Four of the accidents occurred on the A612 Trent Valley Way and two were classified as serious and two as slight injury accidents. Both of the serious accidents involved a single vehicle resulting in two serious injury casualties in each case. One vehicle was driven by an elderly person and the other vehicle by a young person. One of the slight injury accidents involved a car overtaking a motorcycle and the other involved a car turning left into a side road across the path of a pedal cycle travelling in the same direction.

2.4.18 Analysis has shown that there are no particular trends for the accidents recorded within the study area. There are a number of locations where small clusters of accidents have occurred but no common contributory factors have been identified. The main area of concern surrounds the number of young school age children that have been involved in accidents soon after the end of the school day.

2.5 FORECAST FLOW CHANGES

2.5.1 **Table 2** below summarises the change in traffic flows forecast on the A6211 corridor between the B684 Mapperley Plains Road and the A612 Nottingham Road as a result of the provision of the Gedling Access Road and full redevelopment of the Gedling Colliery/Chase Farm site (flow changes on the wider network are summarised in **Section 7.3**). As can be seen from the summary below traffic flows are forecast to reduce on all sections of the route with the exception of Burton Road where a modest flow increase is forecast in the 2034 PM peak.

Table 2 – Forecast Change in 2-Way Flows on the A6211 Corridor

Location	2-Way Flow Changes Due to the Provision of Gedling Access Road and Redevelopment of Gedling Colliery (VPH)			
	2019		2034	
	AM	PM	AM	PM
A6211 Arnold Lane (B684 to Shelford Road)	-346	-456	-495	-406
A6211 Arnold Lane (Shelford Road to Lambley Lane)	-304	-386	-431	-309
A6211 Arnold Lane (Lambley Lane to Shearing Hill)	-345	-556	-484	-511
A6211 Shearing Hill	-298	-454	-408	-490
Burton Road (Shearing Hill NE to A612)	-181	-200	-83	127
Averages across all sections	-295	-410	-380	-318

2.5.2 As can be seen from **Table 2** the average peak hour flow changes across all sections of the A6211 corridor are between approximately 300 to 400 vehicles per hour (2-way). This equates to a reduction of between approximately 5 and 7 vehicles per minute on the A6211 corridor as through traffic movements make use of the new road.

2.5.3 Given the overall reduction in traffic flows that are forecast on the A6211 corridor it is considered that the construction of the Gedling Access Road should therefore have a beneficial effect on road safety on this area of the highway network. The type of safety benefits that could be expected may include:

- Pedestrians finding it easier to cross the road, with fewer potential conflicts.
- Cyclists benefiting from reduced traffic flows, making shared use of the carriageway generally safer.
- Reduced conflicts for right turn movements to/from the A6211.
- Improved junction performance, with reduced potential for queues and delays, which could help minimise incidents of drivers taking unnecessary risks due to frustration.

2.5.4 In addition, comparison of the performance of the existing A6211 Shearing Hill/Burton Road and the B686 Burton Road/Colwick Loop Road junctions demonstrate that the forecast reduction in traffic flows will assist with the operation of both of these signal controlled junctions. Details of the capacity assessment results can be found in **Section 7.2**.

2.5.5 At the A6211 Shearing Hill/Burton Road junction practical reserve capacity increases from 0% in the 2028 AM peak Reference Case (i.e. without the Gedling Access Road) to 81% in the 2028 Design Year (i.e. with the new road and completion of the Gedling Colliery/Chase Farm redevelopment). With similar benefits forecast in all other scenarios. At the B686 Burton Road/Colwick Loop Road junction practical reserve capacity increases from 25% in the 2028 AM Reference Case to 68% in the 2028 Design Year with slightly smaller benefits in all other scenarios.

2.5.6 These types of improvement in existing junction performance have the potential to assist road safety at these locations if drivers are generally less frustrated by delays.

2.5.7 Any reduction in traffic flow does however have the potential to increase traffic speeds, particularly on the initial section of the A6211 Arnold Lane between its junctions with Mapperley Plains Road and Linsdale Gardens where the road is currently rural in nature and subject to the national speed limit (60mph). However, it is anticipated that the introduction of the new roundabout junction onto the A6211 Arnold Lane will act as a 'gateway' into Gedling, helping to manage vehicle speeds. In addition, the new residential development on the Gedling Colliery/Chase Farm site will introduce new frontage development and frontage activity onto this section of the A6211 which will help to further manage vehicle speeds. Possible further complementary measures are discussed in section 2.6 below.

2.6 COMPLEMENTARY MEASURES

2.6.1 A package of complementary measures will be developed to effectively integrate the road scheme and redevelopment proposals into the existing transport network and to encourage use of the Gedling Access Road for through movements, thereby helping to relieve local roads.

2.6.2 In addition, the operation of the existing highway network will be monitored before and after the Gedling Access Road and Colliery/Chase Farm redevelopment is introduced to determine whether any off-site complementary measures are required to address any adverse changes due to the scheme.

2.6.3 Some of the complementary measures will need to be implemented in parallel with the scheme, to be effective as soon as the Gedling Access Road and redevelopment is open, whereas others will be considered after a period of monitoring.

2.6.4 It is anticipated that complementary measures will be funded and delivered through a combination of scheme funding (i.e. delivered as part of the scheme) and as part of the redevelopment proposals, delivered either as part of the development, or via developer financial contributions.

2.6.5 The exact nature of the complementary measures has yet to be determined but potential measures are set out below, with the sub-headings providing an indication of when they will be required:

Measures Required in Parallel with the Scheme Opening

- Classification of the Gedling Access Road as an 'A' road and downgrading of the classification of Arnold Lane.
- Appropriate signage at the terminal junctions of the Gedling Access Road to encourage use of the new road for through vehicle movements and to access the new development served off the access road.
- Introduction of appropriate mandatory speed limits on Arnold Lane between its junctions with the B684 Mapperley Plains Road and the new roundabout junction with the Gedling Access Road, and between the new roundabout and the start of the existing 30mph speed limit at a point approximately 100m north west of its junction with Besecar Avenue.

- Potential traffic calming features on Arnold Lane adjacent to the proposed residential development on the Gedling Colliery/Chase Farm site. This could take the form of 'speed tables' at access junctions, chicanes with priority movements, 'speed cushions' etc. The final form will need to be designed to complement the proposed residential development and cater for appropriate vehicle movements (e.g. buses).
- Potential pedestrian crossing facilities on Arnold Lane adjacent to the proposed residential development on the Gedling Colliery/Chase Farm site to help integrate the development with the existing residential development to the southwest of Arnold Lane.

Potential Longer-Term Measures (Details subject to monitoring results)

- Traffic signing (including Vehicle Activated Signs)
- Road markings
- Speed control features (e.g. speed limits, rumble strips, speed tables, speed cushions, chicanes etc)
- Anti-skid surfacing
- Refuge/traffic islands
- Crossings (e.g. zebra, Pelican, Toucan crossings)
- Parking (e.g. restrictions in inappropriate locations, bollards, sheltered parking etc).

3 Planning Policy

3.1 PREAMBLE

3.1.1 The objectives for the Gedling Access Road have been defined taking into account national and local policies that seek to safeguard the environment and resources and to put into practice the principles of sustainable development.

National

- National Planning Policy Framework
- Transport White Paper: 'Creating Growth, Cutting Carbon: Making Sustainable Local Transport Happen'

Local

- Nottinghamshire Local Transport Plan 3
- Emerging Local Plan for Gedling
- Adopted Gedling Replacement Local Plan 2005

3.2 NATIONAL

National Planning Policy Framework

3.2.1 The National Planning Policy Framework (NPPF) was published on 27 March 2012 and constitutes guidance for local planning authorities and decision-takers both in drawing up development plans and as a material consideration in determining applications. The NPPF replaces previous planning policy statements and planning policy guidance, including PPG13. However, the principles of good transport planning contained within PPG13, whilst no longer material planning considerations, remain useful as a guide when preparing supporting transport planning documents.

3.2.2 At the heart of the NPPF is a presumption in favour of sustainable development. Paragraph 7 of the NPPF states that:

> *"There are three dimensions to sustainable development: economic, social and environmental. These dimensions give rise to the need for the planning system to perform a number of roles:*

- *an economic role – contributing to building a strong, responsive and competitive economy, by ensuring that sufficient land of the right type is available in the right places and at the right time to support growth and innovation; and by identifying and coordinating development requirements, including the provision of infrastructure;"*

3.2.3 Provision of the Gedling Access Road is required to facilitate regeneration of the Gedling Colliery/Chase Farm site and is therefore considered to contribute towards the economic role of sustainable development within the Gedling Borough.

3.2.4 The NPPF makes further mention of infrastructure provision as summarised in the following extracts:

Paragraph 20 – *"In drawing up Local Plans, local planning authorities should:*

- *identify priority areas for economic regeneration, infrastructure provision and environmental enhancement…"*

Paragraph 157 – *"Crucially, Local Plans should:*

- *plan positively for the development and infrastructure required in the area to meet the objectives, principles and policies of this Framework…"*

Paragraph 162 – "*Local planning authorities should work with other authorities and providers to:*

- *assess the quality and capacity of infrastructure for transport, water supply,*
- *wastewater and its treatment, energy (including heat), telecommunications,*
- *utilities, waste, health, social care, education, flood risk and coastal change*
- *management, and its ability to meet forecast demands…"*

3.2.5 The Gedling Access Road has been identified as essential infrastructure to facilitate regeneration of the Gedling Colliery/Chase Farm site (see following text relating to the adopted and emerging Local Plan) and is therefore considered to accord with the aims and policies of the NPPF.

3.3 LOCAL

Nottinghamshire – Local Transport Plan 3 (2011 – 2026)

3.3.1 The Nottinghamshire Local Transport Plan 2011 to 2026 (LTP3) is the third Local Transport Plan (LTP3) for the County of Nottinghamshire and came into effect on 1 April 2011. The document details the transport strategy for the whole of the county of Nottinghamshire for the fifteen year period 2011-2026. The county of Nottinghamshire comprises the seven districts of Ashfield, Bassetlaw, Broxtowe, Gedling, Mansfield, Newark & Sherwood, and Rushcliffe.

3.3.2 The document comprises:

- The **Local Transport Plan Strategy** which sets out how the County Council aims to make transport improvements in Nottinghamshire during the plan period. Including a review at least every five years to make sure that it considers any changes in transport conditions and priorities; and to make sure that it is effective.

- The **Implementation Plan** that runs for the same period as Central Government's capital funding allocations to ensure it takes account of realistic funding levels. The first implementation plan covers the four year period 1 April 2011 to 31 March 2015.

3.3.3 The Implementation Plan seeks to deliver proposals and measures that will help to achieve the five overarching strategic objectives for transport which are to;

- Provide a reliable, resilient transport system which supports a thriving economy and growth whilst encouraging sustainable and healthy travel

- Improve access to key services, particularly enabling employment and training opportunities, and

- Minimise the impacts of transport on people's lives, maximise opportunities to improve the environment and help tackle carbon emissions.

3.3.4 Whilst the LTP3 doesn't specifically mention the Gedling Access Road the proposal is considered to accord well with its strategic objectives in terms of; supporting growth through the regeneration of the former colliery site, delivering traffic relief to adjacent roads within Gedling which will help to support a thriving local economy and minimise the impacts of transport on people's lives as well as improving access to new employment opportunities.

Emerging Gedling Local Plan - Greater Nottingham Aligned Core Strategies

3.3.5 Gedling Borough Council is currently consulting on the latest stage of its Aligned Core Strategy which has been jointly prepared with the Aligned Core Strategies for Broxtowe Borough Council and Nottingham City Council.

3.3.6 The Aligned Core Strategies were submitted to the Planning Inspectorate in June 2013, a public examination followed in October 2013 and additional hearing sessions were held in November 2013 and February 2014 to examine proposed changes.

3.3.7 The District Council is currently undertaking a consultation on the main modifications to the submitted Gedling Borough Aligned Core Strategy and this consultation is open until Wednesday 30th April 2014.

3.3.8 Subject to the Planning Inspector agreeing that the Gedling Borough Aligned Core Strategy is sound it will be adopted as planning policy for the Borough. Once adopted, the Aligned Core Strategy will set out the strategic policy direction for future development in Gedling Borough. It will be used to help decide planning applications and guide the location and design of development in Gedling Borough.

3.3.9 The Core Strategy will provide a broad guide to development and growth in the Borough, setting out possible locations for major sites (over 500 houses). Detailed policies to control future development and set out sites for smaller development (less than 500 houses) will be set out in the Local Planning Document. Within the Core Strategy the Gedling Access Road is identified as follows:

- Policy 2; The Spatial Strategy – 3a v) *Gedling Colliery/Chase Farm in Gedling subject to funding of the Gedling Access Road (at least 600 homes)*
- Policy 7: Regeneration – e) "*Gedling Colliery/Chase Farm offers the opportunity for the redevelopment and reuse of brownfield land to create a new sustainable neighbourhood. It will be designed to engender a safe and strong community and to create a place of distinction, and will require the construction of the Gedling Access Road.*"

- Policy 15: Transport Infrastructure Priorities – "*Other schemes with no committed funding but which remain important to the delivery of the Core Strategy include: Highway Improvements: b) Gedling Access Road.*"

- Appendix B – Critical Infrastructure Requirements Critical Site Specific transport infrastructure – "*Gedling Access Road to facilitate development of Gedling Colliery/Chase Farm.*"

Emerging Local Plan - Local Planning Document

3.3.10 The Local Planning Document will work with the Aligned Core Strategy to shape future development in Gedling Borough by planning for new homes, jobs and infrastructure. The Local Planning Document is being prepared by Gedling Borough Council and will cover the whole borough. The document will include; site-specific policies, allocations (of non-strategic sites) and designations for new housing, employment, retail, community facilities, recreation and open space, nature conservation and other land uses. It will also set out detailed policies to help deliver specific allocations and help in the day to day assessment of planning applications.

3.3.11 Once adopted, both the Aligned Core Strategy and the Local Planning Document will be used to help decide planning applications and guide the location and design of development in Gedling Borough.

3.3.12 The Issues and Options stage of the Local Planning Document was published for consultation in October 2013. The consultation closed in December 2013 and publication of the submission document is anticipated towards the end of 2014. The Issues and Options publication sought feedback on the Gedling Colliery/Chase Farm regeneration as follows:

> *"Regeneration - REG 1a - 1 - Gedling Colliery/Chase Farm - is a major part brownfield site adjacent to the urban area. Redevelopment of the site is a priority for the Borough Council. However, due to the cost of necessary infrastructure, specifically the Gedling Access Road, the site is not currently financially viable and cannot be counted on to deliver housing during the plan period. The Aligned Core Strategy identifies Gedling Colliery/Chase Farm as a regeneration site and allows for its redevelopment, should economic conditions improve and public funding may become available. The Replacement Local Plan identifies the Gedling Colliery/Chase Farm site as suitable for 1,100 homes, 6ha of employment land, a new*

community hub and a new district centre. This scheme will need to be updated to reflect the current situation.

Gedling Replacement Local Plan 2005

3.3.13 Gedling's Replacement Local Plan was adopted in 2005 and provides the main planning framework for the Borough until replaced by the planning documents being prepared under the Local Development Framework (i.e. the Aligned Core Strategy and Local Planning Document mentioned above). In July 2008 the adopted Local Plan policies were reviewed and either saved or deleted.

3.3.14 The following extract from policy (H3) is saved and relates to redevelopment of land at the former Gedling Colliery and Chase Farm, setting out the requirement to provide a new access road from Burton Road to Arnold Lane:

POLICY H3 LAND AT FORMER GEDLING COLLIERY AND CHASE FARM

"Planning permission will be granted for the mixed development of land at, and adjoining, the former Gedling Colliery site, as identified on the Proposals Map.

The development will provide for up to 1120 dwellings, with 700 to be completed by 2011, and 6 hectares of employment land subject to:

a. a phased programme of implementation to be agreed with the Borough Council and County Council through joint Legal Agreements to ensure a comprehensive development solution and that the following are provided:

(i) construction of an access road, (as identified on the proposals map, from Burton Road to Arnold Lane) and necessary junction improvements; the construction of the access road shall be completed before any of the dwellings are occupied….."

3.3.15 Paragraph 2.35 of the adopted Local Plan expands further on the requirement for the access road to facilitate redevelopment of the site:

"Providing adequate facilities and infrastructure to accommodate the transportation needs resulting from the development of the site is an important component in the successful integration of the site with the existing urban area. An independent study commissioned

jointly by the Borough Council and the County Council concluded that the access road, as identified on the proposals map, and junction improvements will be required to serve the development. The access road will have the added benefit of reducing the level of traffic on the A6211, and providing environmental improvement for residents along this route. The Gedling By-Pass is identified as a long term proposal by the County Council in the 1996 Structure Plan Review which predates the Government's White Paper on Transport in 1998. Since then it has been made clear it will not receive public funding within the plan period. The access road will therefore require to be funded entirely by the development of the site. The construction of the access road shall be completed before any of the dwellings are occupied or any of the employment development is brought into use. The access road is to incorporate a satisfactory junction at Mapperley Plains (including any traffic management measures on the approach roads to that junction)."

3.4 SUMMARY

3.4.1 Provision of the Gedling Access Road is identified as an essential requirement for regeneration of the Gedling Colliery/Chase Farm site in both the adopted and emerging planning policy for Gedling Borough and is therefore considered to accord with the aims and policies of the NPPF.

3.4.2 Provision of the access road is also considered to accord with the strategic objectives of the third Nottinghamshire Local Transport Plan in terms of; supporting growth through the regeneration of the former colliery site, delivering traffic relief to adjacent roads within Gedling which will help to support a thriving local economy and minimise the impacts of transport on people's lives as well as improving access to new employment opportunities.

4 Proposed Scheme

4.1 PROPOSED ROAD ALIGNMENT

4.1.1 A plan depicting the alignment of the proposed road and the red-line boundary for the planning application can be found in **Appendix A**. The current scheme is very similar to the 2008 scheme design but has been amended following recent public consultation events to minimise the impacts on local residents, this has involved minor adjustments to the planning application red-line boundary and consists of the following elements and characteristics:

- A new 7.3m wide single-carriageway road, 3.8km in length with a maximum speed limit of 40mph (70kph design speed).

- Street lighting and a shared footway/cycleway along the whole length of the new road which between its junctions with the B684 Mapperley Plains Road and the new 5-arm roundabout junction will run along the northern side of the Gedling Access Road. To the south east of the 5-arm roundabout the footway/cycleway way will run along the southern side to its junction with the A612 Trent Valley Way/Burton Road/Whitworth Drive.

- At the north western end a new signal-controlled T-Junction onto the B684 Mapperley Plains Road located approximately 170m to the east of the existing B684 Mapperley Plains Road/A6211 Arnold Lane/Gedling Road signal controlled cross roads junction. The new junction includes a signal controlled pedestrian crossings on the eastern Mapperley Plains Road and Gedling Access Road arms and a central refuge to assist pedestrian movements across the other Mapperley Plains Road arm. The operation of the signal control at this new junction will be linked to the operation of the existing B684 Mapperley Plains/A6211 Arnold Lane/Gedling Road junction, with both junctions effectively operating together as one large junction. The right turn from Mapperley Plains Road into Arnold Lane will be banned and the lanes on this approach to the existing signal junction will be reallocated to provide one left-turn lane into Gedling Road and two ahead lanes on Mapperley Plains Road eastbound. The banned right turn will be catered for at the new Gedling Access Road junction onto Mapperley Plains Road approximately 170m to the east.

- At its south eastern end a new signal-controlled junction onto the A612 Trent Valley Way at the location of the existing junction between Burton Road and the A612 Trent Valley Way. The new junction ties into Burton Road and Whitworth Drive and incorporates signal-controlled pedestrian crossing facilities on the Gedling Access Road and Burton Road arms of the junction.

- A new 5-arm roundabout connecting the Gedling Access Road with the A6211 Arnold Lane and future development on the Gedling Colliery/Chase Farm site.

- A new 4-arm roundabout connecting the Gedling Access Road with future residential and employment development on the Gedling Colliery/Chase Farm site.

- Two new priority 'Ghost-Island' T-junctions providing links with the northern and southern sections of Lambley Lane.

- A new 3-arm mini-roundabout connecting on Lambley Lane connecting the southern section of Lambley Lane to the Gedling Access Road, with the option of a fourth arm to serve potential development land immediately to the east of Lambley Lane.

- A new private access road with a simple priority junction onto the Gedling Access Road to allow future maintenance access to balancing ponds to the north of the Gedling Access Road (located approximately 350m to the southeast of the proposed new junction between the Gedling Access Road and the northern section of Lambley Lane).

- A new simple priority private access junction onto the Gedling Access Road to serve Gedling Wood Farm (located approximately 500m to the southeast of the proposed new junction between the Gedling Access Road and the northern section of Lambley Lane).

- Diversion of an existing footpath at the point where it crosses Gedling Access Road (located approximately 350m to the southeast of the proposed new junction between the Gedling Access Road and the northern section of Lambley Lane). The diverted footpath will cross the Gedling Access Road at an uncontrolled crossing point with a pedestrian refuge provided in the carriageway.

- Embankments along much of the northern section of the road (north of the 5-arm roundabout), up to a maximum of around 14m in height above existing ground levels.

- Cuttings on the southern section of the road, up to around 15m in depth below existing ground levels south of Lambley Lane, but shallow (up to 4m depth) further south.

- Provision of a climbing lane on the southern section of the Gedling Access Road over a distance of approximately 900m from its junction with the A612 Trent Valley Way. This is to allow northwest bound drivers to safely overtake slow moving vehicles on the uphill gradient over this section.

- Pedestrian crossing facilities will be provided at the Gedling Access Road/B684 Mapperley Plains Road and Gedling Access Road/A612 Trent Valley Way junctions as part of the signal control arrangements at these locations. A "TOUCAN" signal-controlled crossing will be provided across the Gedling Access Road on the south eastern arm of the new 4-arm roundabout provided to serve future development on the Gedling Colliery/Chase Farm site. Safe uncontrolled pedestrian crossing points will also be provided as follows:

    - On the northern arm of the new 4-arm roundabout provided to serve future development on the Gedling Colliery/Chase Farm site.

    - On the eastern Gedling Access Road arm of the new 5-arm roundabout with the A6211 Arnold Lane (at the point where the footway/cycleway switches from the northern to southern sides of GAR).

    - On the Lambley Lane arm of the 'Ghost-Island' junction with Lambley Lane south.

    - On the Gedling Access Road at the point where the diverted footpath crosses it (approximately 350m to the southeast of the proposed new junction between the Gedling Access Road and the northern section of Lambley Lane), as mentioned above.

4.1.2 The following text briefly describes the route of the Gedling Access Road from its southern junction with the A612 Trent Valley Way to its northern junction with the B684 Mapperley Plains Road by reference to land, topography, ecology and other known engineering constraints. The design of the Gedling Access Road has evolved having regard to these constraints and the preferred alignment now proposed is considered to be the best solution to fit within these constraints, whilst meeting the objectives of the access road.

4.1.3 From its southern junction with the A612 Trent Valley Way the Gedling Access Road will climb on a shallow embankment, heading north-westwards, roughly parallel to Whitworth Drive and passing through land which is currently part of the grounds and playing fields of Carlton-le-Willows Academy; and land which forms part of the grounds of Gedling House, including a walled garden. The gradient of the road will be up to 8%, and has been designed to include measures to permit overtaking on the incline.

4.1.4 The proposed route will cut through the south eastern tip of the Gedling House Wood Nature Reserve through a cutting of approximately 2.0m depth and running immediately to the south of Gedling Wood Farm before continuing northwest across open farm land. Just to the south of Lambley Lane the alignment of the road bends to the west through Glebe Farm, which would be demolished, before bending back to the north west, and passing through the former Gedling Colliery site and continuing on to join the B684 Mapperley Plains Road at its northern end.

4.1.5 The new road will be constructed in several cuttings along its length which will vary in depth from approximately 2.0m to 15.0m. It is proposed that a slope stabilisation technique called "Soil Nailing" will be used to strengthen cutting slopes and reduce the area of land take required. In addition to the cuttings along the course of the road there will also be an embankment at the northern end measuring up to 14m in height.

4.1.6 The scheme has been designed to achieve an earthwork 'cut/fill' balance across the whole of the road construction with the earth removal required to create the cuttings on the southern section being reused to create the embankments required for the northern section. This will minimise the need to import/export large quantities of material thereby achieving cost effective construction and helping to minimise construction traffic impacts.

4.2 PROPOSED REDEVELOPMENT

4.2.1 The primary purpose of the Gedling Access Road is to facilitate redevelopment of the Gedling Colliery/Chase Farm site with mixed residential and employment uses. A masterplan of the proposed redevelopment can be found in **Appendix E** and the redevelopment comprises the following:

- Up to 1,120 residential dwellings
- 4,500 sqm of B1 (office) use-class employment
- 18,000 sqm of B2 (light industrial) use-class employment
- A new Country Park (which is currently under construction and will benefit from the Gedling Access Road but is not dependent upon its delivery)
- The safeguarding of land for a future rail station, car park and associated features.

4.2.2 Access to the proposed new residential development will principally be provided from the south eastern arm of the new 5-arm roundabout connecting the Gedling Access Road with the A6211 Arnold Lane, from the southern arm of the new 4-arm roundabout on GAR and from Arnold Lane. The proposed highway layout within the residential site has yet to be designed however, it will provide for an internal highway link between the two roundabout junctions suitable for buses to pass through the site as well as providing a link to Arnold Lane. The internal highway layout will be designed to discourage inappropriate vehicular movements through the development (i.e. by making the routes indirect and through the use of speed control features).

4.2.3 The employment development will be situated to the north of the Gedling Access Road (see masterplan in **Appendix E**) and will be accessed via the northern arm of the proposed new 4-arm roundabout junction.

4.2.4 To the north of the employment area is Gedling Country Park which is currently being formed and is expected to be open in the autumn of 2014. Two options are currently being considered for providing a small car park (circa 50 spaces) for use by visitors to the Country Park. These are; on the employment land to the north of the Gedling Access Road with vehicular access shared from the northern arm of the proposed new 4-arm roundabout; or on the residential land to the south of the Gedling Access Road with vehicular access shared from the southern arm of the

proposed new 4-arm roundabout. The latter option would also include an appropriate pedestrian route between the car park and the Country Park across the Gedling Access Road. At the time of writing the final details are subject to ongoing negotiation with the respective landowners and will be confirmed in due course.

4.3 TIMESCALES

4.3.1 Construction of Gedling Access Road is planned in two phases which are summarised as follows:

- **Phase 1** – Construction of the new 5-arm roundabout onto the A6211 Arnold Lane is expected to commence in early 2015. This will facilitate development of an initial stage of residential development on the Gedling Colliery/Chase Farm site.
- **Phase 2** – completion of the Gedling Access Road between the B684 Mapperley Plains Road to the northwest and the A612 Burton Road to the southeast enabling the complete redevelopment of the Gedling Colliery/Chase Farm site.

4.3.2 The exact timescale for Phase 2 has yet to be confirmed and will be partly dependent upon developer interest in the Gedling Colliery/Chase Farm redevelopment. However, for the purposes of this TA it has been assumed that Gedling Access Road will be constructed in its entirety by 2019.

4.4 COMPLEMENTARY MEASURES

4.4.1 As mentioned in Section 2.6 it is expected that the scheme will include complementary measures to effectively integrate the road scheme and redevelopment proposals into the existing transport network and to encourage use of the Gedling Access Road for through movements, thereby helping to relieve local roads.

5 Design Flows & Assessment Years

5.1 2013 TRANSPORT MODELLING WORK

5.1.1 In 2013 transport consultants (formerly MVA now called Systra) were appointed by HCA to undertake a strategic transport assessment of the proposed development of the Gedling Colliery/Chase Farm site and the provision of the Gedling Access Road. This work used the Greater Nottingham Transport Model (GNTM) which is a multi-modal transport model consisting of a (SATURN) highway model, (Cube Voyager) public transport model and a (Cube) Variable Demand Model (VDM).

5.1.2 The modelling work applied an assessment year of 2028, which is consistent with the end of plan period for the Greater Nottingham Aligned Core Strategy, and examined the following time periods:

- AM Peak (08:00 – 09:00)
- Interpeak hour (11:00 – 14:00 average hour)
- PM Peak (17:00 – 18:00)

5.1.3 The modelling work examined 2028 'Reference Case' and 2028 'With Development' scenarios. The 2028 'Reference Case' includes the 2028 'Base' situation plus all committed transport infrastructure schemes and planning land-use developments that are expected to be complete by 2028. The 'With Development' scenario examined the 2028 'Reference Case' plus development of the Gedling Colliery/Chase Farm site and provision of the Gedling Access Road.

5.1.4 The 'With Development' scenarios examined a potential phased delivery of the Gedling Access Road and associated phased delivery of development on the Gedling Colliery/Chase Farm site. Development of the Gedling Colliery/Chase Farm site was assumed to comprise:

- 1,120 Residential Dwellings
- 4,500 sqm of B1 Employment
- 18,000 sqm of B2 Employment

5.1.5 The development modelled by Systra is consistent with the development for which planning permission is now being sought. The only exception is the omission of the Country Park. However

as this will generate minimal trips during the morning and evening peak hours it was ignored for the purposes of the Systra modelling and has been ignored for the purposes of this TA.

5.1.6 The methodology and findings from the 2013 GNTM assessment are presented in the Systra report titled "Gedling Colliery Development Assessment" dated 24 July 2013. This report was approved by NCC. Further sensitivity testing of the operation of the Gedling Access Road terminal junctions onto the B684 Mapperley Plains Road has subsequently been completed by Systra and this data has been made available by NCC to assist with preparation of this TA.

5.1.7 A summary of the estimated total vehicular trip generation from the completed Gedling Colliery/Chase Farm redevelopment is presented below. This information is taken from Table 2 on page 14 of the "Gedling Colliery Development Assessment" report produced by Systra. The effects of these traffic flows have been modelled in the 'with development' scenarios.

Table 3 - Summary of Gedling Colliery Development Trip Generation (PCU)

Use	AM Peak (08:00-09:00 hrs)		PM Peak (17:00-18:00 hrs)	
	In	Out	In	Out
Total Development	337	664	526	415

5.2 ASSESSMENT FLOWS

5.2.1 Outputs from the latest Systra modeling work have therefore been used to form the basis for the junction capacity assessments presented in **Section 7** of this report.

5.2.2 Modelled turning flows have been provided for the following scenarios:

- **2028 Reference Case Flows** – Includes the 2028 'Base' situation plus all committed transport infrastructure schemes and planning land-use developments that are expected to be complete by 2028.
- **2028 Design Flows with Gedling Access Road and Development** - 2028 'Reference Case' plus provision of the full Gedling Access Road and complete redevelopment of the Gedling Colliery/Chase Farm site.

5.2.3 As the planning application is for the whole GAR it has been agreed with NCC that the TA needs to examine the implications of the new road in its completed form. The 'With Development'

scenario therefore assumes that the Gedling Access Road is completed in its entirety and the Gedling Colliery/Chase Farm site has been fully redeveloped.

5.2.4 The Greater Nottingham Transport Model (GNTM) works to a 2028 forecast year (see above) however NCC require the operation of junctions on the Gedling Access Road to be assessed at a 15 year design horizon post completion of the whole Gedling Access Road. Therefore, assuming a 2019 completion year gives a 15 year design year of 2034.

5.2.5 To estimate 2034 design year flows NCC has provided the following local traffic growth factors, derived from TEMPRO data (TEMPRO stands for the **T**rip **E**nd **M**odel **Pr**esentation **Pro**gram and this is the industry standard tool for estimating traffic growth based on outputs from the National Trip End Model), to apply to the 2028 'With Development' flows:

- 2028 to 2034 AM Peak = 1.035
- 2028 to 2034 PM Peak = 1.040

5.2.6 A summary of the 2028 'Reference Case' and 2028 and 2034 'Design Flows' is presented in **Appendix F.**

5.2.7 In addition to the turning flow information mentioned above, modelled link flows have also been provided for the detailed study area and surrounding network, for the following scenarios:

- 2019 Completion Year (DM) – Annual Average Daily Traffic Flows (AADT) and AM/PM peaks
- 2019 Completion Year (DS) – Annual Average Daily Traffic Flows (AADT) and AM/PM peaks
- 2034 Design Year (DM) – Annual Average Daily Traffic Flows (AADT) and AM/PM peaks
- 2034 Design Year (DS) – Annual Average Daily Traffic Flows (AADT) and AM/PM peaks

Note: DM stands for 'Do Minimum' i.e. without the Gedling Access Road and Colliery Redevelopment. DS stands for 'Do Something' i.e. with the Gedling Access Road and Colliery Redevelopment.

5.2.8 These flows are presented in **Figures 1** to **12** for information. The 2019 Completion Year and 2034 Design Year data is consistent with the assessment years applied in the Business Case for the Gedling Access Road. All junction capacity assessments have been undertaken at the 2028 and 2034 Design Years mentioned earlier in this chapter.

6 Sustainable Transport

6.1 EXISTING CONDITIONS

6.1.1 Existing sustainable transport provision within the detailed study area has been reviewed and summarised. This includes a review of walking/cycling infrastructure and existing bus services passing through the study area that may be affected by the Gedling Access Road.

6.2 WALKING AND CYCLING

6.2.1 The proposed Gedling Access Road will intersect with existing walking/cycling infrastructure at the following locations:

1. It's northern terminal junction onto the B684 Mapperley Plains Road.
2. At its junction with the A6211 Arnold Lane at the proposed new 5-arm roundabout.
3. At the location of the proposed new mini-roundabout onto Lambley Lane (south).
4. The location of the proposed tie-in point to Lambley Lane (north).
5. Approximately 400m southeast of the northern junction of the Gedling Access Road with Lambley Lane where the line of the new road is crossed by an existing public footpath.
6. At its southern terminal junction with the A612 Trent Valley Way/Burton Road/Whitworth Drive.

6.2.2 The proposed Gedling Access Road will provide a new 3.0m wide shared footway/cycleway with a 0.5m wide safety buffer strip along its entire length between the B684 Mapperley Plains Road and the A612 Trent Valley Way/Burton Road/Whitworth Drive junctions. A plan showing the route of the shared footway/cycleway can be found in **Appendix A**.

6.2.3 Between its junctions with the B684 Mapperley Plains Road and the new 5-arm roundabout junction with the A6211 Arnold Lane the footway/cycleway will run along the northern side of the Gedling Access Road. At the new 5-arm roundabout an uncontrolled crossing point will be provided on the Gedling Access Road (south eastern) arm of the roundabout, with a physical central splitter island provided to assist pedestrian and cycle crossing movements.

6.2.4 To the southeast of the 5-arm roundabout the footway/cycleway will run along the southern side of the Gedling Access Road to its junction with the new 4-arm roundabout to link the proposed employment and residential development areas. At this junction the footway/cycleway will be extended into the residential and employment sites (by developers) as these are developed out. A signal controlled TOUCAN crossing is proposed across the Gedling Access Road on the south eastern arm of the 4-arm roundabout and an uncontrolled crossing point will be provided on the southern arm of the roundabout with a physical central splitter island provided to assist pedestrian and cycle crossing movements

6.2.5 To the southeast of the new 4-arm roundabout to the A612 Trent Valley Way/Burton Road/Whitworth Drive junction the new footway/cycleway will run along the northern side of the Gedling Access Road.

6.2.6 At the location where the realigned northern section of Lambley Lane ties back into the existing road (approx' 300 north of its junction with the Gedling Access Road) there is no existing footpath provision on either side of Lambley Lane and footway provision does not commence for some distance (approximately 250m further to the north). The scheme therefore provides footway to the back of the splitter island at the Gedling Access Road/Lambley Lane (north) junction, on both sides of the minor road to allow pedestrians to safely cross the mouth of the junction.

6.2.7 Approximately 400m to the east of the northern junction of the Gedling Access Road with Lambley Lane the line of the new road is crossed by an existing public footpath. This will be relocated approximately 75m to the northwest and an uncontrolled crossing point provided.

6.2.8 At the A612 Trent Valley Way/Burton Road/Whitworth Drive junction there is an existing 3.0m wide shared footway/cycleway on the northern side of Burton Road which links to an existing 3.0m wide shared footway/cycleway on the western side of the A612 Trent Valley Way. Whitworth Drive is served by a single footway (approximately 2.0m wide) on its northern side. The proposed shared footway/cycleway on the northern side of the Gedling Access Road will therefore tie into this existing infrastructure with controlled crossing points provided across the Gedling Access Road and across the mouth of Burton Road at its junction with Gedling Access Road.

6.3 BUS

INTRODUCTION

6.3.1 As mentioned in paragraph 4.2.2 the highway layout within the proposed residential development on the Gedling Colliery/Chase Farm site will provide a route through the site between the two proposed roundabout junctions onto the Gedling Access road to enable buses to pass through the site and serve the development.

6.3.2 It is anticipated that planning permissions for future residential development on the site will be conditioned to require developers to secure either; an extension to an existing bus service, or provision of a new bus service to serve the site in this manner, thereby ensuring that all new dwellings are located within the recommended 400m walking distance of bus stops served by regular bus services.

6.3.3 Nottinghamshire County Council has confirmed that developers will be expected to liaise directly with Nottinghamshire County Council's Transport and Travel Services to determine details of what contributions towards bus service support are expected. The County Council would expect residential developers to make free travel passes available to all new residents on occupation as part of a package of travel plan measures.

6.3.4 In terms of new infrastructure the County Council would expect all new residential properties to be located within 400m walking distance of a bus stop and developers will be expected to provide new/additional stops to ensure this is achieved. The estimated cost per new stop is £10,700 excluding VAT and fees, which includes for a; shelter (£2,500), hard standing (£1,500), Bus Stop Clearway Order (£700) and real-time displays and associated electrical connections (£6,000). Any new stops provided within the development will be expected to meet this same standard.

6.3.5 In addition, the County Council will expect a contingency fund to be made available to mitigate impacts on existing bus services, should construction works interfere with these.

6.3.6 The following paragraphs summarise the existing bus services operating within the TA study area and examines their potential for diversion/extension to serve the proposed redevelopment of the Gedling Colliery/Chase Farm site.

EXISTING SERVICE SUMMARY

6.3.7 The main bus services within the study area are operated by Nottingham City Transport and copies of relevant service route maps and timetables can be found in **Appendix G**. The main services are summarised in **Table 4** as follows:

Table 4 – Existing Bus Services Within the Study Area

Service Number	Operator	Route	Approximate Frequency		
			(Mon to Sat) Daytimes	(Mon to Sat) Evenings	Sundays
44	Nott'm City Transport	City Centre – Sneinton Hermitage – Colwick Village – Netherfield - Gedling	10 min's	30 min's	20 min's
46/47/47B	Nott'm City Transport	City Centre – Mapperley – Mapperley Plains – Arnold (46) or Lambley – Woodborough – Claverton - Gunthorpe	30 min's	40 min's	Every 2 Hours
100/N100/ 26/26C	Nott'm City Transport	City Centre – Gedling – Burton Joyce – Lowdham – NTU Brackenhurst - Southwell	20 min's	Hourly	Hourly

6.3.1 Service 100/26/26C runs between the City Centre and Southwell along the A612 Trent Valley Way/Nottingham Road corridor and would therefore pass through the southern terminal junction of the Gedling Access Road with the A612 Trent Valley Way. Service 100//N100/26/26C is operated commercially. Some timetable revisions to Service 100 are to be introduced from 4th August 2014.

6.3.2 Whilst serving stops within the TA study area Service 100/26/26C is considered to offer little opportunity for diversion/extension to serve the proposed redevelopment of the Gedling Colliery/Chase Farm site due to the distance of its route from the site and the length of diversion that would be required.

6.3.3 Service 44/Night Bus 100 (N100) runs between the City Centre and Gedling. At the Gedling end of its route it passes along the A6211 Arnold Lane between its junctions with Main Road and Shelford Road. This service therefore passes immediately adjacent to the proposed residential

development site and offers a good opportunity to be extended to pass through the completed residential development, thereby linking it to the city centre with a high frequency bus service. This potential should therefore be explored further at the planning application stage for the redevelopment of the Gedling Colliery/Chase Farm site. This service is operated commercially.

6.3.4 Service 46 runs between the City Centre and Arnold and Services 47/47B continue on to serve Lambley, Woodborough, Calverton, Lowdham and Gunthorpe. All of these services pass through the study area on the B684 Mapperley Plains Road and will therefore pass through the improved B684 Mapperley Plains Road/A6211 Arnold Lane junction and the new B684 Mapperley Plains Road/Gedling Access Road junction. These services are operated with financial support from Nottinghamshire County Council. A route revision to Service 46/47/47B is to be introduced from 4th August 2014.

6.3.5 Whilst serving stops within the TA study area Service 46/47/47B is considered to offer little opportunity for diversion/extension to serve the proposed redevelopment of the Gedling Colliery/Chase Farm site due to the distance of its route from the site and the length of diversion that would be required.

RAIL

6.3.6 The Gedling Colliery site is connected to the South Nottinghamshire Rail Network (SNRN) via a disused freight line which links the colliery to the Nottingham to Grantham line at Netherfield. Various studies have previously been undertaken to examine the feasibility of opening the freight line for passenger use and Nottinghamshire County Council is currently safeguarding a scheme for possible construction during the third Local Transport Plan for Nottinghamshire, 2011-2026. This scheme does not however feature in the LTP3 implementation programme for 2014/15 and is unlikely to be included in any 2015/16 programme for construction.

SUMMARY

6.3.7 The study area is well served by frequent bus services which link the area with Nottingham City Centre and local villages to the north and northeast.

6.3.8 Service 44 currently passes along the A6211 Arnold Lane immediately adjacent to the proposed development site and is therefore considered to offer a good opportunity to be extended into the

completed residential development, thereby linking it to the city centre with a high frequency bus service.

6.3.9 It is therefore recommended that this potential be explored further at the planning application stage for the redevelopment of the Gedling Colliery/Chase Farm site.

7 Highway Impact Assessment

7.1 INTRODUCTION

7.1.1 The operation of all the proposed junctions on the Gedling Access Road have been assessed for the 2028 and 2034 'With Development' design flows which assume completion of the Gedling Access Road and all development at the Gedling Colliery/Chase Farm site.

7.1.2 In addition to the proposed new junctions the operation of 5 existing junctions has also been assessed with the 2028 'Reference Case' flows (see **Section 5** for further details) and the 2028 and 2034 'Design Flows' (see **Section 5** and **Appendix F** for further details) so the effect of providing the Gedling Access Road can be determined at these locations.

7.1.3 All junctions have been assessed for the AM and PM peak hours and a summary of the junction capacity assessments undertaken is presented in **Table 5** below.

Table 5 – Junction Capacity Assessments Undertaken

Junction	Junction Type	Junction Capacity Assessments Undertaken					
		2028 Reference Case		2028 With GAR and Development		2034 With GAR and Development	
		AM	PM	AM	PM	AM	PM
A6211 Arnold Lane/ B684 Mapperley Plains Road	Signal Controlled	X	X	X	X	X	X
A6211 Arnold Lane/Lambley Lane	Simple Priority	X	X	X	X	X	X
A6211 Shearing Hill/A6211 Burton Road	Signal Controlled	X	X	X	X	X	X
Burton Road/A612 Nottingham Road	Signal Controlled	X	X	X	X	X	X
GAR/B684 Mapperley Plains Road	Signal Controlled	N/A	N/A	X	X	X	X
GAR/A6211 Arnold Lane	Priority Roundabout	N/A	N/A	X	X	X	X
GAR/Gedling Colliery Site Access	Priority Roundabout	N/A	N/A	X	X	X	X
GAR/Lambley Lane (S)	Ghost Island Priority	N/A	N/A	X	X	X	X
GAR/Lambley Lane (S)	Mini-Roundabout	N/A	N/A	X	X	X	X
GAR/Lambley Lane (N)	Ghost Island Priority	N/A	N/A	X	X	X	X
GAR/A612 Nottingham Road	Signal Controlled	X	X	X	X	X	X

Note: Junctions marked as N/A do not exist until the Gedling Access Road is constructed

7.2 JUNCTION CAPACITY ASSESSMENTS

7.2.1 The assessment of the junctions has been undertaken using the ARCADY 7, PICADY 5 and LINSIG 3 computer programmes which are the 'industry standard' traffic modelling computer software packages used for assessing the traffic capacity of roundabouts, simple priority junctions and signalised junctions respectively.

7.2.2 Junction geometry has been taken from the layout drawings presented in **Appendix H** and **Table 6** below summarises which software has been used to assess each junction.

Table 6 – Junction Modelling Software Used

Junction	Junction Type	Junction Modelling Software
A6211 Arnold Lane/ B684 Mapperley Plains Rd	Signal Controlled	LINSIG 3
A6211 Arnold Lane/Lambley Lane	Simple Priority	PICADY 5
A6211 Shearing Hill/A6211 Burton Road	Signal Controlled	LINSIG 3
Burton Road/A612 Nottingham Road	Signal Controlled	LINSIG 3
GAR/B684 Mapperley Plains Road	Signal Controlled	LINSIG 3
GAR/A6211 Arnold Lane	Priority Roundabout	ARCADY 7
GAR/Gedling Colliery Site Access	Priority Roundabout	ARCADY 7
GAR/Lambley Lane (S)	Ghost Island Priority	PICADY 5
GAR/Lambley Lane (S)	Mini-Roundabout	ARCADY 7
GAR/Lambley Lane (N)	Ghost Island Priority	PICADY 5
GAR/A612 Nottingham Road	Signal Controlled	LINSIG 3

7.2.3 For priority junction and roundabout assessments a Ratio of Flow to Capacity (RFC) value below 0.85 indicates that a junction operates 'within' its theoretical capacity. Typically junctions can satisfactorily operate with RFC values between 0.85 and 1.00. An RFC value greater than 1.00 indicates that a junction operates 'above' its capacity.

7.2.4 For traffic signal junction assessments, a Reserve Capacity (RC) or degree of overload is used to indicate whether or not a junction operates 'within' its theoretical capacity. When there is no RC, a degree of overload is the percentage by which the traffic flows exceed the capacity of the junction. Experience with RC calculations at existing junctions indicates that queuing does not become particularly noticeable until the degree of overload reaches 10% (i.e. -10% RC) and this is approximately comparable to an RFC of 1.0 at a priority junction.

7.2.5 Full details of the traffic flows used in the capacity assessments can be found in **Appendix F**. The results of the junction capacity assessments are contained in full in **Appendix H** and summarised on the following page in **Table 7**.

7.2.6 For the sake of simplicity the results presented in **Table 7** overleaf are the 'worst case' RFC / RC values forecast at each junction.

Table 7 – Junction Capacity Assessment Results

Junction	AM Peak (08:00 – 09:00)		PM Peak (17:00 – 18:00)	
	Max. RFC/RC	Max. Queue (PCU)/Total Delay (PCU/Hour)	Max. RFC/RC	Max. Queue (PCU)/Total Delay (PCU/Hour)
2028 Reference Case Flows

GAR/Lambley Lane (S)	0.403	0.67	0.860	5.23
GAR/Lambley Lane (S) – Mini Roundabout	0.455	0.83	0.494	0.97
GAR/Lambley Lane (N)	0.909	6.62	0.916	7.22
A612/GAR/Burton Road/Whitworth Drive	23.6%	28.0	1.7%	42.4
A6211 Shearing Hill/A6211 Burton Road	80.8%	5.2	75.1%	5.0
B686 Burton Road/A6211 Colwick Loop Road	68.2%	7.2	33.1%	10.4
Arnold Lane/Lambley Lane	0.663	1.9	0.743	5.96
2034 With GAR and Development Design Flows				
Mapperley Plains/Gedling Road/Arnold Lane	-11.0%	75.7	-12.4%	62.8
Mapperley Plains Road/GAR	-4.2%	25.2	17.1%	8.8
Arnold Lane/GAR/Site	0.579	1.36	0.541	1.17
GAR/Site Access	0.497	0.96	0.219	0.28
GAR/Lambley Lane (S)	0.423	0.72	0.905	7.1
GAR/Lambley Lane (S) – Mini Roundabout	0.472	0.88	0.514	1.05
GAR/Lambley Lane (N)	0.983	10.76	0.997	12.71
A612/GAR/Burton Road/Whitworth Drive	19.6%	29.6	-2.3%	48
A6211 Shearing Hill/A6211 Burton Road	74.7%	5.4	68.3%	5.3
B686 Burton Road/A6211 Colwick Loop Road	62.4%	7.5	27.9%	11.1
Arnold Lane/Lambley Lane	0.696	2.19	0.777	7.45

7.2.7 As can be seen from **Table 7** all of the existing and proposed junctions are forecast to operate satisfactorily at the 2028 and 2034 Design Years with the completion of the Gedling Colliery/Chase Farm development and the completion of the Gedling Access Road.

7.2.8 The Mapperley Plains/Gedling Road/Arnold Lane junction is forecast to be operating at a level where queuing will start to be noticeable at the 2034 Design Year (PRC values of -11.0% in the AM and -12.4% in the PM). However, this level of performance is deemed to be acceptable considering it is a 20 year forecast and the junction operation is significantly improved in comparison to the existing junction in the 2028 Reference Case scenario.

7.2.9 The 'Ghost-Island' priority junctions between the Gedling Access Road and Lambley Lane (North and South) are forecast to be operating close to their theoretical capacity at the 2034 Design Year, with RFC values of between 0.85 and 1.00 in both peaks. However, the forecast maximum queue lengths are small (maximum of 13 PCU) so this level of performance is considered acceptable, particularly given that it is a 20 year forecast (maximum forecast queue length is 7 PCU at 2028).

7.2.10 Comparing the operation of the existing A6211 Shearing Hill/Burton Road and the B686 Burton Road/Colwick Loop Road junction layouts in the 'Reference Case' scenario with their operation in the 2028 and 2034 'With Development and Gedling Access Road' scenarios it can be seen that provision of the new road will assist with the operation of both of these signal controlled junctions, with significant performance increases.

7.2.11 On the basis of the junction capacity results all of the existing and proposed junction layouts depicted in **Appendix H** are therefore considered to be appropriate to accommodate the forecast design flows.

7.3 LINK FLOW SUMMARY

7.3.1 Diagrams presenting link flow summaries for the Detailed Study Area and surrounding network are presented as **Figures 1** to **12** at the end of this report. A summary of key link flows in the AM/PM peak hours is presented in **Table 8** as follows.

Table 8 – Peak Hour Link Flow Summary

Notes: New Gedling Access Road links highlighted in grey.

7.3.2 Overall, across the whole existing highway network summarised in **Table 8,** there is a forecast reduction in traffic flows when comparing the Reference Case flows to the Design Flows in both peaks at 2019 and at 2034. The links with the most significant flow increase is the A612 Trent Valley Way towards Nottingham, with smaller increases forecast on Burton Road in the PM peak, Spring Lane in the AM peak and on Lambley Lane. These increases are due to traffic re-routing to use the new Gedling Access Road and corresponding flow reductions are observed on the A6211 Arnold Lane corridor.

Table 9 – Annual Average Daily Traffic (AADT) Link Flow Summary

Location	2019 2-Way Traffic Flows AADT			2034 2-Way Traffic Flows AADT

Notes: New Gedling Access Road links highlighted in grey.

7.3.1 Overall, across the whole existing highway network summarised in **Table 9** there is a forecast reduction in traffic flows when comparing the daily Reference Case flows to the Design Flows at the 2019 opening and 2034 design years. The links with significant flow increases are the A612 Trent Valley Way (SW of Burton Road, towards Nottingham) which is forecast to experience a daily traffic flow increase of 3,204 vehicles per day (VPD) at the 2019 Opening Year and 3,987 VPD at the 2034 Design Year. Lambley Lane (GAR to Spring Lane section) is forecast to experience a daily traffic flow increase of 363 VPD at the 2019 Opening Year and 1,271 VPD at the 2034 Design Year. The A612 Nottingham Road (NE of Burton Road) is forecast to experience a small daily traffic flow increases of 191 VPD at the 2019 opening year and 699 VPD at the 2034 design year. Daily flow increases are also forecast on Westdale Lane at both the 2019 opening and 2034 design years.

7.3.2 Forecast flows on the wider highway network are summarised in **Table 10** and **Table 11** below.

Table 10 – Peak Hour Link Flow Summary – Wider Network

Table 11 – Annual Average Daily Traffic (AADT) Link Flow Summary – Wider Network

Location	2019 2-Way Traffic Flows AADT			2034 2-Way Traffic Flows AADT		
	Reference Case	Design flows	Difference	Reference Case	Design flows	Difference
A612 Through Burton Joyce (NE of Meadow Ln)	14,089	14,057	-31	18,524	18,885	361
A612 Colwick Loop Road (W of Victoria Pk Way)	21,687	22,517	830	28,344	29,432	1,088
B684 Mapperley Plains Road (N of Catfoot Ln)	14,451	14,231	-220	18,371	18,169	-202
B684 Mapperley Plains Road (S of Westdale Ln)	22,834	22,080	-755	25,529	24,530	-999
A6211 Gedling Road (NW of Rollestone Dr)	6,503	6,375	-127	7,270	7,211	-60
Main Street Lambley	9,248	9,453	205	10,501	10,521	20
A612 Through Burton Joyce (NE of Meadow Ln)	14,089	14,057	-31	18,524	18,885	361

7.3.3 As can be seen from **Table 10** and **Table 11** the provision of GAR and the full redevelopment of the Gedling Colliery/Chase Farm site results in relatively small peak hour flow changes on the wider highway network at both the 2019 opening and 2034 design years when compared to the reference case. Flows on the A612 through Burton Joyce, on the B684 Mapperley Plains Road north of GAR and on the A6211 Gedling Road towards Arnold remain essentially unchanged, whereas flows on the B684 Mapperley Plains Road towards Nottingham (south of Westdale Lane) are forecast to be reduced. Flows on Main Street in Lambley increase by a very small amount, although the forecast differences are small and therefore unlikely to be noticeable in practice. Flows on the A612 Colwick Loop Road towards Nottingham (west of Victoria Park Way) are forecast to increase by approximately 5% to 7% in the PM peak hour and by approximately 4% on a daily basis in both the opening and 2034 design years when compared to the reference case.

8 Summary

8.1.1 WYG has been appointed by the Homes and Communities Agency (HCA) to provide transport planning support in relation to proposals for a new link road, known as the Gedling Access Road (GAR), in Gedling, Nottingham.

8.1.2 The proposed 3.8 km long GAR is located in the Gedling Borough of Nottinghamshire, to the east of Nottingham city centre and will link the B684 Mapperley Plains Road north of Gedling with the A612 Nottingham Road south of Gedling.

8.1.3 Gedling Access Road is planned to facilitate development of the Gedling Colliery/Chase Farm site for mixed-uses as well as providing a 'bypass' around Gedling to help ease traffic congestion on local roads. Its provision is identified as an essential requirement for regeneration of the Gedling Colliery/Chase Farm site in both the adopted and emerging planning policy for Gedling Borough.

8.1.4 A full (detailed) planning application is to be submitted for Gedling Access Road in 2014 and this Transport Assessment has been prepared to support the planning application for the new road. Future redevelopment of the Gedling Colliery/Chase Farm will be subject to separate planning applications.

8.1.5 The scope and methodology for this Transport Assessment have been agreed with Nottinghamshire County Council and regular contact has been maintained with the County Council throughout the preparation of the assessment. This TA has therefore been prepared on an agreed basis.

8.1.6 Provision of the Gedling Access Road is forecast to reduce traffic flows on the adjacent A6211 corridor in all scenarios tested as traffic reassigns to make use of the new route. The forecast flow reductions are expected to have an overall beneficial effect on road safety on the A6211 corridor. In addition, the operation of existing junctions on the A6211 corridor will also benefit from the general reduction in traffic with fewer delays and queues experienced in the peak hours.

8.1.7 A range of complementary traffic management measures will be developed to effectively integrate the road scheme and redevelopment proposals into the exiting transport network. A list of potential measures has been identified in this report however; the final package will be subject to agreement with Nottinghamshire County Council. It is anticipated that some complementary

measures will be delivered in parallel with the road scheme, whereas others will be considered following a period of monitoring.

8.1.8 The operation of the proposed junctions on the Gedling Access Road have been tested and demonstrated to operate within acceptable parameters at the 2034 Design Year assuming full redevelopment of the Gedling Colliery/Chase Farm site. The proposed junction layouts are therefore considered appropriate to accommodate forecast traffic flows.

8.1.9 Overall, provision of the Gedling Access Road is considered to be beneficial in terms of impacts on the local highway network and the scheme is therefore considered acceptable on transport grounds.

1 Introduction

1.1 PREAMBLE

1.1.1 WYG has been appointed by the Homes and Communities Agency (HCA) to provide transport planning support in relation to proposals for a new link road, known as the Gedling Access Road (GAR), in Gedling, Nottingham.

1.1.2 The proposed 5km long GAR is located in the Gedling Borough of Nottinghamshire, to the east of Nottingham city centre and will link the B684 Mapperley Plains Road north of Gedling with the A612 Burton Road south of Gedling.

1.1.3 The GAR is planned to facilitate development of the Gedling Colliery/Chase Farm site for mixed-uses as well as providing a 'bypass' around Gedling to ease traffic congestion on local roads.

1.1.4 Plans showing the proposed alignment of the GAR and the location of the Gedling Colliery/Chase Farm site can be found in **Appendix A**.

1.1.5 Full planning permission was sought for the GAR in 2008 however; the application was not determined as there was a requirement for the GAR as a whole to be funded. Recent work by the HCA with Gedling Borough Council (GBC) and Nottinghamshire County Council (NCC) has led to a phased approach to delivery of the GAR. Updated transport modelling has been undertaken establishing the basis for a phased programme of both development and the GAR.

1.1.6 The HCA therefore proposes to submit a full (detailed) planning application for the GAR in early 2014 and a new, updated Transport Assessment (TA) is required in support of the planning application.

1.1.7 This note has been prepared to outline the methodology for the TA, for discussion and agreement with the local highway authority, Nottinghamshire County Council (NCC).

1.1.8 The location of the GAR is remote from the nearest Trunk Road or Motorway and as such there is no requirement to consult with the Highways Agency (HA).

1.2 TRANSPORT WORKING GROUP

1.2.1 A project inception meeting was held on Friday 17th January 2014. The meeting was attended by officers from the HCA, GBC, NCC and WYG. In the meeting it was agreed that a 'Transport Working Group' be established and that this should consist of officers from NCC and WYG and other stakeholder representatives, as appropriate.

1.2.2 This scoping report will form the basis for discussions at the first meeting of the Transport Working Group.

1.3 FORMAT OF REPORT

1.3.1 The layout of this report is as follows:

- Chapter 2 describes existing conditions
- Chapter 3 identifies planning policy documents that will be reviewed in the TA
- Chapter 4 identifies the sources of information that the TA will refer to
- Chapter 5 outlines assessment years and design flows
- Chapter 6 describes how road safety will be reviewed
- Chapter 7 describes how sustainable travel will be reviewed
- Chapter 8 describes the proposed junction modelling approach
- Chapter 9 summarises the report

2 Existing Conditions

2.1 LOCATION

2.1.1 The proposed GAR is located approximately 6 km northeast of Nottingham City Centre and its route is contained wholly within the Borough of Gedling. The planned road is situated directly to the north of the settlements of Gedling, Carlton and Colwick, to the east of Mapperley Plains and to the west of the settlement of Burton Joyce.

2.2 ROUTE OF THE GAR

2.2.1 The proposed GAR will follow a route south from a new junction with the B684 Mapperley Plains Road, parallel with the A6211 Arnold Lane before following a route through the centre of the former Gedling Colliery site. From here, the GAR will continue south-east to terminate at a new junction with the A612 Burton Road. See plans in **Appendix A**.

2.3 EXISTING CHARACTERISTICS

2.3.1 Key characteristics of the land that will be crossed by the route of the GAR are summarised as follows:

- Agricultural fields (arable and pastoral)
- Part of a former, dismantled railway and associated railway tunnel (part filled)
- The former Gedling Colliery site (former spoil tipping land which has been restored to scrub and pasture land).
- The vacant Glebe Farm House and outbuildings
- A small area of woodland (Gedling Wood)
- A section of the Walled Garden at the Grade II Listed Gedling House
- A small section of the grounds of Carlton le Willows school.

2.3.2 The majority of the development which lies to the south and west of the proposed GAR route is predominantly residential in nature with the densely populated residential areas of Gedling and Carlton to the south and Woodthorpe and Arnold to the west.

2.3.3 To the north and east of the proposed GAR route lie the less populated areas of Mapperley Plains and Lambley. Beyond the residential areas to the north and east are large areas of pastoral and arable farm land interspersed by the settlement of Burton Joyce and the River Trent to the east.

PROPOSED TA STUDY AREA

2.3.4 The proposed TA study area is indicated in **Appendix B**. The study area covers the route of the GAR including its terminal junctions with the B684 Mapperley Plains Road, the A612 Burton Road and all intermediate junctions, plus the route of the A6211 Arnold Lane between its junctions with the B684 Mapperley Plains Road, the A612 Burton Road and intermediate junctions. This is the existing route that the GAR will provide traffic relief to once it is complete.

REFERENCE CASE TRAFFIC FLOWS

2.3.5 Traffic flows (2028 Reference Case – see **Section 5** for further details) for the existing highway network within the study area will be obtained from NCC and summarised in tabular and graphical formats.

EXISTING JUNCTION OPERATION

2.3.6 The operation of the following existing junctions will be tested using the appropriate junction modelling software for the 2028 Reference Case (see **Section 5** for further details):

- A6211 Arnold Lane/ B684 Mapperley Plains Road
- A6211 Arnold Lane/Lambley Lane
- A6211 Shearing Hill/A6211 Burton Road
- Burton Road/A612 Nottingham Road

ROAD SAFETY

2.3.7 The most recently available 5 year period of personal injury accident (PIA) data will be obtained from NCC for the study area. The data will be analysed and summarised to determine any trends in accident causational factors that may be affected by the proposed GAR. Road safety is discussed further in **Section 6**.

2.4 SUSTAINABLE TRANSPORT

2.4.1 Existing sustainable transport provision within the study area will be reviewed and summarised. This will include a review of existing bus services passing through the study area that may be affected by the provision of the GAR. Sustainable travel modes are discussed further in **Section 7**.

3 Planning Policy

3.1.1 The following planning policy documents will be reviewed and transport policy relevant to the GAR summarised as part of the TA:

National

- Transport White Paper: Creating Growth, Cutting Carbon Making Sustainable Local Transport Happen (January 2011)
- National Planning Policy Framework (NPPF)

Local

- Nottinghamshire County Council – Local Transport Plan 3
- Aligned Core Strategy for Gedling Borough
- Gedling Borough Council Replacement Local Plan 2005 (saved policies)

3.1.2 The preparation of the TA will also have regard to the following design standards and guidance:

- Design Manual for Roads and Bridges (DMRB)
- Manual for Streets (1 and 2)
- 6C's Design Guide

4 Proposed Scheme

4.1 PROPOSED DESIGN

4.1.1 The TA will be based on a review of the 2008 GAR scheme design produced by Faber Maunsell consultants. See relevant extracts in **Appendix C**.

4.1.2 It has been assumed that NCC will be able to provide the electronic (AutoCAD) files of the 2008 Faber Maunsell scheme design to facilitate the review.

4.1.3 Other documents that will be referred to as part of the preparation of the TA are:

- MVA report titled "Gedling Colliery Development Assessment" dated 24 July 2013
- Scott Wilson report titled "Gedling Colliery and Adjacent Lands Transport Assessment" dated May 2008

4.1.4 For ease of reference a list of information required from NCC to facilitate the preparation of the TA is included in **Appendix D**.

5 Design Flows & Assessment Years

5.1 2013 MODELLING WORK

5.1.1 In 2013 MVA consultants were appointed to undertake a strategic transport assessment of the proposed development of the Gedling Colliery/Chase Farm site and the provision of the GAR. This work used the Greater Nottingham Transport Model (GNTM) which is a multi-modal model consisting of a SATURN highway model, Cube Voyager public transport model and a Cube Variable Demand Model (VDM).

5.1.2 The modelling work applied an assessment year of 2028 and examined the following time periods:

- AM Peak (08:00 – 09:00)
- PM Peak (17:00 – 18:00)

5.1.3 The modelling work examined 2028 'Reference Case' and 2028 'With Development' scenarios. The 2028 'Reference Case' includes the 2028 'Base' situation plus all committed transport infrastructure schemes and planning land-use developments that are expected to be complete by 2028. The 'With Development' scenario examined the 2028 'Reference Case' plus development of the Gedling Colliery/Chase Farm site and provision of the GAR.

5.1.4 The 'With Development' scenarios examined a potential phased delivery of the GAR and associated phased delivery of development on the Gedling Colliery/Chase Farm site. Development of the Gedling Colliery/Chase Farm site was assumed to comprise:

- Up to 1,120 Residential Dwellings
- 4,500 sqm of B1 Employment
- 18,000 sqm of B2 Employment

5.1.5 The methodology and findings from the 2013 GNTM assessment are presented in the MVA report titled "Gedling Colliery Development Assessment" dated 24 July 2013. The report has been approved by NCC. Further sensitivity testing of the operation of the GAR terminal junctions onto the B684 Mapperley Plains Road has subsequently been completed by MVA and it is understood that NCC will also make this data available to assist with preparation of the TA.

5.1.6 Outputs from the MVA modeling work will therefore be used to form the basis for the TA required in support of the forthcoming planning application for the GAR.

5.1.7 NCC require the operation of GAR junctions to be tested at the 2028 assessment year, assuming completion of GAR and the redevelopment of the Gedling Colliery/Chase Farm site. In addition, NCC requires all junctions to be assessed at a design year 15 years post completion of GAR. Assuming a 2019 completion year this gives a 15 year design year of 2034. NCC will provide local traffic growth factors to estimate 2034 flows from the 2028 model outputs.

5.2 PROPOSED JUNCTION CAPACITY ASSESSMENTS

5.2.1 The operation of all junctions on the proposed GAR and the existing junctions identified at paragraph 2.3.6 will be assessed for the AM and PM peak hours at the 2028 and 2034 design years. The table below summarises the assessments that will be undertaken for the TA.

Table 1 – Junction Assessments to be Undertaken

Junction	Junction Type	Junction Assessments to be Undertaken					
		2028 Reference Case		2028 With GAR & Development		2034 With GAR & Development	
		AM	PM	AM	PM	AM	PM
A6211 Arnold Lane/ B684 Mapperley Plains Road	Signal Controlled	X	X	X	X	X	X
A6211 Arnold Lane/Lambley Lane	Simple Priority	X	X	X	X	X	X
A6211 Shearing Hill/A6211 Burton Road	Signal Controlled	X	X	X	X	X	X
Burton Road/A612 Nottingham Road	Signal Controlled	X	X	X	X	X	X
GAR/B684 Mapperley Plains Road	Signal Controlled			X	X	X	X
GAR/A6211 Arnold Lane	Priority Roundabout			X	X	X	X
GAR/Gedling Colliery Site Access	Priority Roundabout			X	X	X	X
GAR/Lambley Lane (S)	Ghost Island Priority			X	X	X	X
GAR/Lambley Lane (S)	Mini-Roundabout			X	X	X	X
GAR/Lambley Lane (N)	Ghost Island Priority			X	X	X	X
GAR/A612 Nottingham Road	Signal Controlled	X	X	X	X	X	X

5.2.2 As the planning application is for the whole GAR it has been agreed with NCC that the TA needs to examine the implications of the new road in its completed form and there is no requirement to assess a phased GAR delivery.

5.2.3 As agreed with NCC, capacity assessments for the 'With Development' scenario will therefore assume full completion of the GAR and all development on the Gedling Colliery/Chase Farm site.

5.3 REQUIRED DATA

For the purposes of this TA it is understood that NCC will provide junction turning counts from the MVA modelling work for the assessment scenarios summarised in **Table 1**.

6 Road Safety

6.1 ACCIDENT ANALYSIS

6.1.1 As mentioned earlier the most recently available 5 year period of personal injury accident (PIA) data will be obtained from NCC for the study area shown in **Appendix B**. The data will be analysed and summarised to determine any trends in accident causational factors that may be affected by the proposed GAR.

6.1.2 The analysis will identify any accident cluster sites within the study area for further investigation to determine the likely effects of forecast changes in traffic patterns due to provision of the GAR.

6.1.3 Forecast traffic flows will be obtained from the 2013 MVA modelling work discussed in Section 5 for the 2028 'Reference Case' and 2028 'With Development' scenarios. Comparing these flows will enable the change in traffic due to the GAR to be estimated and the likely impacts of any change related to existing road safety. The operation of the existing junctions discussed in Section 8 will also be related to road safety.

6.1.4 If necessary, the TA will make recommendations for remedial works to address any adverse road safety impacts identified due to the GAR on the existing highway network within the study area.

7 Sustainable Transport

7.1 EXISTING CONDITIONS

7.1.1 As mentioned earlier, existing sustainable travel conditions will be reviewed and summarised within the study area shown in **Appendix B**. This will involve the following tasks.

7.2 WALKING AND CYCLING

7.2.1 Existing cycle and walking routes that will be affected by the proposed alignment of the GAR will be identified and reviewed with regards to any potential severance issues.

7.2.2 The proposed tie-in points to existing walking and cycling routes shown in the 2008 Faber Maunsell scheme design will be reviewed. If necessary, design modifications will be identified to ensure the proposed road integrates effectively with existing infrastructure and any adverse impacts are minimised.

7.3 BUS

7.3.1 Existing bus service routes and frequencies within the study area will be identified and summarised.

7.3.2 Accessibility of the proposed Gedling Colliery/Chase Farm development site for existing/potential bus services will be examined having regard to the recommended highway design criteria to allow for safe bus access to/from the GAR

7.3.3 The potential benefits that the GAR offers in terms of traffic relief to existing bus service routes using the A6211 Arnold Lane will be examined and discussed.

8 Junction Capacity Assessments

8.1 INTRODUCTION

8.1.1 Traffic capacity assessments will be undertaken at the junctions identified in **Table 1** using the appropriate 'industry standard' junction modelling software which is summarised as follows:

Table 2 – Junction Modelling Software

Junction	Junction Type	Junction Modelling Software
A6211 Arnold Lane/ B684 Mapperley Plains Road	Signal Controlled	LINSIG 3 (+)
A6211 Arnold Lane/Lambley Lane	Simple Priority	PICADY 5
A6211 Shearing Hill/A6211 Burton Road	Signal Controlled	LINSIG 3*
Burton Road/A612 Nottingham Road	Signal Controlled	LINSIG 3*
GAR/B684 Mapperley Plains Road	Signal Controlled	LINSIG 3 (+)
GAR/A6211 Arnold Lane	Priority Roundabout	ARCADY 7
GAR/Gedling Colliery Site Access	Priority Roundabout	ARCADY 7
GAR/Lambley Lane (S)	Ghost Island Priority	PICADY 5
GAR/Lambley Lane (S)	Mini-Roundabout	ARCADY 7
GAR/Lambley Lane (N)	Ghost Island Priority	PICADY 5
GAR/A612 Nottingham Road	Signal Controlled	LINSIG 3

Note: the junctions marked with (*) and (+) above are/will be linked in their operation.

8.1.2 The assessments will seek to demonstrate that existing junctions within the study area will benefit from the provision of the GAR, through a general reduction in traffic flows.

8.1.3 The assessments will also seek to demonstrate that the GAR junction designs produced in 2008 by Faber Maunsell consultants (**Appendix C**) are still appropriate in terms of their ability to satisfactorily accommodate the latest design flows. If necessary the Faber Maunsell junction layouts will be amended, as appropriate.

9 Summary

9.1.1 WYG has been appointed by the Homes and Communities Agency (HCA) to provide transport planning support in relation to proposals for a new link road, known as the Gedling Access Road (GAR), in Gedling, Nottingham.

9.1.2 The proposed 5km long GAR is located in the Gedling Borough of Nottinghamshire, to the east of Nottingham city centre and will link the B684 Mapperley Plains Road north of Gedling with the A612 Burton Road south of Gedling.

9.1.3 The GAR is planned to facilitate development of the Gedling Colliery/Chase Farm site for mixed-uses as well as providing a 'bypass' around Gedling to ease traffic congestion on local roads.

9.1.4 A full (detailed) planning application is to be submitted for the GAR in early 2014. This note has been prepared to outline the methodology for the TA required in support of the planning application for discussion and agreement with the local highway authority, Nottinghamshire County Council (NCC).

9.1.5 The location of the GAR is remote from the nearest Trunk Road or Motorway and as such there is no requirement to consult with the Highways Agency (HA).

9.1.6 This scoping report will form the basis for discussions at the first meeting of the Transport Working Group. The 'Transport Working Group' consists of officers from NCC and WYG and other stakeholder representatives, as appropriate.

9.1.7 The scope of the proposed study area for the TA has been identified, together with key data inputs and methodology for assessing impacts on road safety, sustainable travel and traffic capacity.

9.1.8 For ease of reference a list of information required from NCC to enable the TA to be prepared is included in **Appendix D**.

Appendix E – Proposed Redevelopment

DO NOT SCALE: CONTRACTOR TO CHECK ALL DIMENSIONS AND REPORT ANY OMISSIONS OR ERRORS

KEY

Gedling Borough Replacement Local Plan Adopted July 2005

	Policy H3 Allocation Boundary	circa 42 ha
	Policy E1(c) Allocation Boundary	circa 5 ha
	Net Residential Area (Housing, Streets, Public Open Space) 40 dph Density required to reach 1120 dwellings	27.53 ha 1101 Dwellings = 41
	Additional Land Needed Beyond Local Plan Boundary to Achieve 1120 Dwellings	2.22 ha
	Public Open Space/ Childrens Play Within NRA (Includes 2 LEAPS)	0.60 ha
	Employment Area	5.30 ha
E	B1 Employment	1.77 ha
BD	Land for NCC Bus Depot	2.14 ha
HWC	Relocated Household Waste Centre	0.75 ha
SS	Relocated Substation	0.64 ha
LC	Local Centre (Includes Convenience Store 500m2 Health Centre 346m2, Other Small Retail Units, Parking, & Public Square	0.60 ha
S	Primary School	1.21 ha
	Potential Future Tram/ Train Stop	
P+R	Land for Potential Park and Ride	0.80 ha
	Existing Vegetation	
	Structural Landscape	8.34 ha
	Formal Sports Provision	8.0 ha
	Indicative Main Street

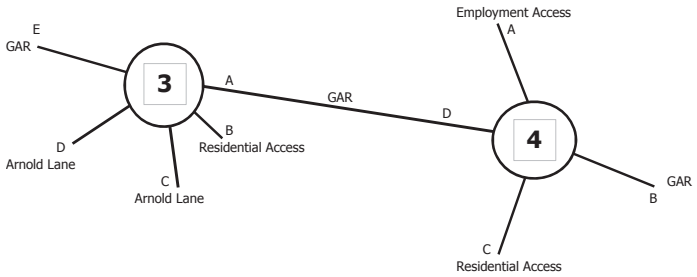
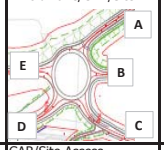
Reassignment of Development Trips

The SATURN model assigns all westbound residential development traffic via the western roundabout and eastbound traffic via the eastern roundabout.
This is unlikley to occur in practice so the residential development flows have been manually reassigned, split 50/50 between each junction as follows.



Turning Flows Taken from SATURN Model Outputs:

3 — Arnold Lane/GAR/Site



AM	A	B	C	D	E
A	0	0	0	80	40
B	0	0	19	146	232
C	0	5	0	158	524
D	269	34	179	0	0
E	265	51	180	0	0

= Residential flows

PM	A	B	C	D	E
A	0	0	0	86	123
B	0	0	14	42	111
C	0	17	0	227	432
D	194	125	172	0	0
E	16	101	161	0	0

= Residential flows

Note:

A Operated by an NCT 'exact fare' bus. All Pathfinder tickets valid, but change is not available from the driver.

C Operates along Daleside Road and Colwick Loop Road, not Carlton Hill

FS Operates on Friday and Saturday night only. A flat fare of £3.00 applies to journeys as far as Carlton-le-Willows School and £5 to Burton Joyce, Lowdham and Southwell. Easyrider Citycards valid to Lowdham.

M Terminates at Southwell Minster School, arriving 08.32

SA Terminates at Shaftesbury Avenue

SM In Southwell, operates along the normal 100 route through to Church Street (Minster) but does not serve Norwood Gardens

User and Project Details

Project:	**Gedling Colliery Access Road**
Title:	**Mapperly Plains / Arnold Lane / GAR**
Location:	
File name:	A085361 - Mapperly Plains (21-07-14).lsg3x
Author:	R Bishop
Company:	WYG
Address:	Leicester
Notes:	Scheme differences to AECOM Layout.Arnold Lane: (1) 2 ahead Lanes from Gedling Road; (2) additional left turn lane on Plains Road; (3) Arnold Lane ahead and right turn lanes combined into one 5m wide lane (very low right turn) to improve sat-flow on the steep approach; (4) single ahead lane from Mapperley Plains and more generous lane widths. Intergreens for ahead traffic on roads with limit 40mph or higher have been increased by 2s as per NCoC policy. GAR T Junction: (1) Pedestrian crossing staggers reversed to improve flare lengths; (2) Existing wider Northern footway way necessitate slightly a slightly narrowed East-bound lane 2.

File: N:\Projects\A085361 - Gedling Colliery Access Road\calculations\Junction Capacity Assessments\ARCADY\GAR - Site Access roundabout.arc7
Report generation date: 20/05/2014 14:55:26

File summary

File Description

Title	GAR / Site Access Roundabout
Location	Gedling
Date	12/03/2014
Status	(new file)
Jobnumber	A085361
Enumerator	WYG\robert.holland
Results Upto Date	True

Analysis Options

RFC Threshold	Vehicle Length (m)	Do Queue Variations
0.85	5.75	

Sorting and Display

Show Arm Names	Arm Grouping	Sorting Direction	Sorting Type	Data Matrix Style	Time Style
	Order	Ascending	Numerical	By Destination	Absolute Time

Units

Distance Units	Speed Units	Traffic Units Input	Traffic Units Results	Flow Units	Average Delay Units	Total Delay Units	Rate Of Delay Units
m	kph	PCU	PCU	perHour	min	-Min	perMin

A1 - (Default Analysis Set) - D1 - 2028 Design AM, AM

Data Errors and Warnings

No errors or warnings

Analysis Set Details

Name	Description	Include In Report	Use Specific Demand Set	Demand Set	Locked	Network Flow Scaling Factor (%)	Network Capacity Scaling Factor (%)	Reason For Scaling Factors
(Default Analysis Set)		Yes		(D1)		100.000	100.000	

Demand Set Details

Name	Scenario Name	Time Period Name	Description	Locked	Run Automatically	Use Relationship	Relationship	Start Time (HH:mm)	Finish Time (HH:mm)	Time Period Length (min)	Time Segment Length (min)	Traffic Profile Type
2028 Design AM, AM	2028 Design AM	AM			Yes			07:45	09:15	90	15	ONE HOUR

Roundabout Network

Roundabout Type(s)

Arm Slope/ Intercept and Capacity

Slope and Intercept used in model

Arm	Enter Directly	Slope	Intercept (PCU/hr)	Final Slope	Final Intercept (PCU/hr)
1		((calculated))	((calculated))	0.546	1655.797
2		((calculated))	((calculated))	0.487	1416.846
3		((calculated))	((calculated))	0.498	1416.762
4		((calculated))	((calculated))	0.483	1372.801

The slope and intercept shown above include any corrections and adjustments.

Traffic Flows

PICADY Assessments

CAPACITIES, QUEUES, AND DELAYS AT 3 OR 4-ARM MAJOR/MINOR PRIORITY JUNCTIONS

PICADY 5.1 ANALYSIS PROGRAM
RELEASE 4.0 (SEPT 2008)

FOR SALES AND DISTRIBUTION INFORMATION,
PROGRAM ADVICE AND MAINTENANCE CONTACT:
TRL SOFTWARE BUREAU
TEL: CROWTHORNE (01344) 770758, FAX: 770356
EMAIL: Software@trl.co.uk

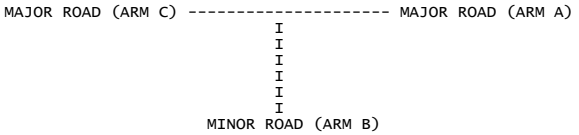
Run with file:-
"N:\Projects\AO85361 - Gedling Colliery Access Road\calculations\Junction Capacity Assessments\PICADY\
Arnold Lane - Lambley Lane.vpi"
(drive-on-the-left) at 15:03:36 on Tuesday, 20 May 2014

.RUN INFORMATION

RUN TITLE	: Arnold Lane / Lambley Lane
LOCATION	: Gedling
DATE	: 12/03/14
CLIENT	:
ENUMERATOR	: robert.holland [1918LT]
JOB NUMBER	: AO85361
STATUS	:
DESCRIPTION	:

.MAJOR/MINOR JUNCTION CAPACITY AND DELAY

INPUT DATA



ARM A IS Arnold Lane (north)
ARM B IS Lambley Lane
ARM C IS Arnold Lane (south)

.STREAM LABELLING CONVENTION

STREAM A-B CONTAINS TRAFFIC GOING FROM ARM A TO ARM B
STREAM B-AC CONTAINS TRAFFIC GOING FROM ARM B TO ARM A AND TO ARM C
ETC.

.GEOMETRIC DATA

DATA ITEM		MINOR ROAD B
TOTAL MAJOR ROAD CARRIAGEWAY WIDTH	(W)	6.25 M.
CENTRAL RESERVE WIDTH	(WCR)	0.00 M.
MAJOR ROAD RIGHT TURN - WIDTH	(WC-B)	2.20 M.
- VISIBILITY	(VC-B)	0.00 M.
- BLOCKS TRAFFIC		YES
MINOR ROAD - VISIBILITY TO LEFT	(VB-C)	10.0 M.
- VISIBILITY TO RIGHT	(VB-A)	15.0 M.
- LANE 1 WIDTH	(WB-C)	3.20 M.
- LANE 2 WIDTH	(WB-A)	0.00 M.

.SLOPES AND INTERCEPT

(NB:Streams may be combined, in which case capacity will be adjusted)

Intercept For STREAM B-C	Slope For Opposing STREAM A-C	Slope For Opposing STREAM A-B
646.06	0.25	0.10

Intercept For STREAM B-A	Slope For Opposing STREAM A-C	Slope For Opposing STREAM A-B	Slope For Opposing STREAM C-A	Slope For Opposing STREAM C-B
498.06	0.23	0.09	0.14	0.32

Intercept For STREAM C-B	Slope For Opposing STREAM A-C	Slope For Opposing STREAM A-B
573.96	0.22	0.22

(NB These values do not allow for any site specific corrections)

.TRAFFIC DEMAND DATA

ARM	FLOW SCALE(%)
A	100
B	100
C	100

.Demand set: 2028 Reference AM

TIME PERIOD BEGINS 07.45 AND ENDS 09.15

LENGTH OF TIME PERIOD - 90 MIN.
LENGTH OF TIME SEGMENT - 15 MIN.

.DEMAND FLOW PROFILES ARE SYNTHESISED FROM TURNING COUNT DATA

ARM	NUMBER OF MINUTES FROM START WHEN FLOW STARTS TO RISE	NUMBER OF MINUTES FROM START WHEN TOP OF PEAK IS REACHED	NUMBER OF MINUTES FROM START WHEN FLOW STOPS FALLING	RATE OF FLOW (VEH/MIN) BEFORE PEAK	RATE OF FLOW (VEH/MIN) AT TOP OF PEAK	RATE OF FLOW (VEH/MIN) AFTER PEAK
ARM A	15.00	45.00	75.00	9.82	14.74	9.82
ARM B	15.00	45.00	75.00	3.41	5.12	3.41
ARM C	15.00	45.00	75.00	13.76	20.64	13.76

.Demand set: 2028 Reference AM

TIME	FROM/TO	TURNING PROPORTIONS TURNING COUNTS (PERCENTAGE OF H.V.S) ARM A	ARM B	ARM C
07.45 - 08.00	ARM A	0.000	0.127	0.873
		0.0	100.0	686.0
		(0.0)%	(0.0)%	(0.0)%
	ARM B	0.081	0.000	0.919
		22.0	0.0	251.0
		(0.0)%	(0.0)%	(0.0)%
	ARM C	0.703	0.297	0.000
		774.0	327.0	0.0
		(0.0)%	(0.0)%	(0.0)%

TURNING PROPORTIONS ARE CALCULATED FROM TURNING COUNT DATA

WARNING NO MARGINAL ANALYSIS OF CAPACITIES AS MAJOR ROAD BLOCKING MAY OCCUR

QUEUE FOR STREAM B-AC

TIME SEGMENT ENDING	NO. OF VEHICLES IN QUEUE	
08.00	0.8	*
08.15	1.4	*
08.30	6.7	*******
08.45	14.3	**************
09.00	1.8	**
09.15	0.8	*

QUEUE FOR STREAM C-AB

TIME SEGMENT ENDING	NO. OF VEHICLES IN QUEUE	
08.00	2.0	**
08.15	4.6	*****
08.30	19.8	********************
08.45	25.4	*************************
09.00	5.8	******
09.15	2.3	**

QUEUEING DELAY INFORMATION OVER WHOLE PERIOD

STREAM	TOTAL DEMAND (VEH)	TOTAL DEMAND (VEH/H)	* QUEUEING * DELAY * (MIN)	* QUEUEING * DELAY * (MIN/VEH)	* INCLUSIVE QUEUEING * DELAY * (MIN)	* INCLUSIVE QUEUEING * DELAY * (MIN/VEH)
B-AC	375.8	250.5	342.3	0.91	342.4	0.91
C-AB	450.1	300.1	854.7	1.90	855.0	1.90
A-B	137.6	91.8				
A-C	944.2	629.5				
ALL	2973.1	1982.1	1197.0	0.40	1197.4	0.40

* DELAY IS THAT OCCURRING ONLY WITHIN THE TIME PERIOD
* INCLUSIVE DELAY INCLUDES DELAY SUFFERED BY VEHICLES
WHICH ARE STILL QUEUEING AFTER THE END OF THE TIME PERIOD
* THESE WILL ONLY BE SIGNIFICANTLY DIFFERENT IF THERE IS
A LARGE QUEUE REMAINING AT THE END OF THE TIME PERIOD.

*******END OF RUN*******

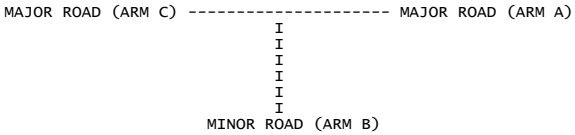
GAR-Lambley Lane north.vpi"
(drive-on-the-left) at 15:50:57 on Friday, 28 March 2014

.RUN INFORMATION

RUN TITLE	: GAR/Lambley Lane (north)
LOCATION	: Gedling
DATE	: 12/03/14
CLIENT	:
ENUMERATOR	: robert.holland [1918LT]
JOB NUMBER	: A085361
STATUS	:
DESCRIPTION	:

.MAJOR/MINOR JUNCTION CAPACITY AND DELAY

INPUT DATA



ARM A IS GAR (west)
ARM B IS Lambley Lane
ARM C IS GAR (east)

.STREAM LABELLING CONVENTION

STREAM A-B CONTAINS TRAFFIC GOING FROM ARM A TO ARM B
STREAM B-AC CONTAINS TRAFFIC GOING FROM ARM B TO ARM A AND TO ARM C
ETC.

.GEOMETRIC DATA

DATA ITEM	MINOR ROAD B
TOTAL MAJOR ROAD CARRIAGEWAY WIDTH	(W) 7.00 M.
CENTRAL RESERVE WIDTH	(WCR) 0.00 M.
MAJOR ROAD RIGHT TURN - WIDTH	(WC-B) 3.50 M.
- VISIBILITY	(VC-B)100.00 M.
- BLOCKS TRAFFIC (SPACES)	NO (0)
MINOR ROAD - VISIBILITY TO LEFT	(VB-C) 44.0 M.
- VISIBILITY TO RIGHT	(VB-A) 39.0 M.
- LANE 1 WIDTH	(WB-C) 4.70 M.
- LANE 2 WIDTH	(WB-A) 0.00 M.

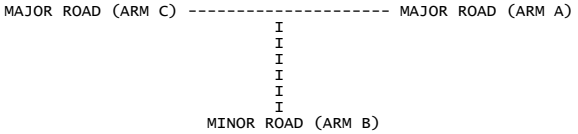
.RUN INFORMATION

RUN TITLE	: GAR / Lambley Lane
LOCATION	: Gedling
DATE	: 12/03/14
CLIENT	:
ENUMERATOR	: robert.holland [1918LT]
JOB NUMBER	: A085361
STATUS	:
DESCRIPTION	:

.MAJOR/MINOR JUNCTION CAPACITY AND DELAY

INPUT DATA



ARM A IS GAR (east)
ARM B IS Lambley Lane
ARM C IS GAR (west)

.STREAM LABELLING CONVENTION

STREAM A-B CONTAINS TRAFFIC GOING FROM ARM A TO ARM B
STREAM B-AC CONTAINS TRAFFIC GOING FROM ARM B TO ARM A AND TO ARM C
ETC.

.GEOMETRIC DATA

DATA ITEM	MINOR ROAD B
TOTAL MAJOR ROAD CARRIAGEWAY WIDTH	(W) 7.30 M.
CENTRAL RESERVE WIDTH	(WCR) 0.00 M.
MAJOR ROAD RIGHT TURN - WIDTH	(WC-B) 3.50 M.
- VISIBILITY	(VC-B)100.00 M.
- BLOCKS TRAFFIC (SPACES)	NO (0)
MINOR ROAD - VISIBILITY TO LEFT	(VB-C) 43.0 M.
- VISIBILITY TO RIGHT	(VB-A) 32.0 M.
- LANE 1 WIDTH	(WB-C) 4.78 M.
- LANE 2 WIDTH	(WB-A) 0.00 M.

* DELAY IS THAT OCCURRING ONLY WITHIN THE TIME PERIOD
* INCLUSIVE DELAY INCLUDES DELAY SUFFERED BY VEHICLES
WHICH ARE STILL QUEUEING AFTER THE END OF THE TIME PERIOD
* THESE WILL ONLY BE SIGNIFICANTLY DIFFERENT IF THERE IS
A LARGE QUEUE REMAINING AT THE END OF THE TIME PERIOD.

*******END OF RUN*******
