which excludes those not seeking or available for work. Unemployment rates are not the proportion of the total population who are unemployed. They are the proportion of the economically active population (those in work plus those seeking and available to work) who are

unemployed. The long-term increase in the proportion of young people going into full-time education reduces the size of the economically active population and therefore increases the unemployment rate.

The seasonally adjusted claimant count figure for the United Kingdom increased by 23,231 last month to 1,102,795 and was up 224,307 over the year.

The number of people in employment aged 16 and over increased by 32,000 over the quarter to reach 32.75 million. The employment rate for those aged 16 to 64 is now 76.1%.

The Employment Bulletin uses the Claimant Count rather than the count of JSA claimants. This experimental series counts the number of people claiming Jobseeker's Allowance plus those who claim Universal Credit and are required to seek work and be available for work. It replaces the of people number claiming Jobseeker's Allowance as the headline indicator of the number people claiming benefits principally for the reason of being unemployed.

The unadjusted claimant count figure for the United Kingdom has increased by 14,330 over the month to 1,120,935. The proportion unemployed calculated on the residence base now stands at 2.7% of the population aged 16-64.

Claimant count.

This experimental series counts the number of people claiming Jobseeker's Allowance plus those who claim Universal Credit and are required to seek work and be available for work and replaces the number of people claiming Jobseeker's Allowance as the headline indicator of the number of people claiming benefits principally for the reason of being unemployed.

All data are rounded to the nearest 5 and may not precisely add to the sum of the number of people claiming JSA, published on Nomis, and the number of people claiming Universal Credit required to seek work, published by DWP, due to independent rounding.
