

Examples of Good Practice

Planters can be used as part of the means of enclosure, but must be removed outside of operating times unless there is specific approval to the contrary which must be agreed during the application procedure.

Furniture and equipment may only be present within the designated area during the hours of operation and whilst the means of enclosure is fully in place.

Furniture must be of high quality, uniform style and should compliment the surrounding area. The use of plastic garden furniture or picnic tables will not be permitted. At all times, the furniture must be in a clean and serviceable condition.
