Sue Jones

For the attention of Joel Marshall

14th January 2021

Proposal: V/4202 Vary Condition 4 of planning permission 1/15/01498/CDM to extend the evaluation and restoration period of the site for a further 3 years until November 2023 and to relinquish drilling the horizontal well

Applicant: Island Gas Limited

Location: Land off Springs Road, Misson, DN10 6ET

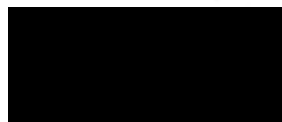

Dear Mr Marshall,

Thank you for consulting Nottinghamshire Area Ramblers on the above planning application. We do not see why an extension would be justified and wish to object to this.

The site is spoiling the views of the surrounding countryside for the walkers and horse riders who make use of the nearby rights of way, and has been left in this unsightly condition for long enough. Following the recent publication by the OGA of studies on the earthquakes caused by fracking at a site in Lancashire, and their conclusion that induced seismicity from fracking was unpredictable and difficult to manage, it seems highly unlikely that the government will change its views regarding the moratorium on fracking. Hence we do not consider it necessary to leave the site mothballed for another three years, and instead it should be restored to its original state as soon as possible once the original application has lapsed.

Yours sincerely,

Sue Jones
